Manual abstract:

When connecting the INA-W910R to the fuse box, make sure the fuse for the intended circuit of the INA-W910R has the appropriate amperage. Failure to do so may result in damage to the unit and/or the vehicle. When in doubt, consult your ALPINE dealer. The Display must be completely retracted in the casing when installing. If it is not, problems may occur. When installing in automobiles, make sure the Display can open/close without coming in contact with the shift lever. About the installation angle, please install as horizontally as possible within the following angle range. If the installation angle is beyond the range, the current position may not be correctly displayed and a maloperation may be caused for the navigation mode. 10°(±5°) Top of the unit The unit can be installed in the mounting sleeve in three positions by aligning its mounting holes (A to C) on the sides of the unit. position A will be used in most cases. If B or C are to be used, the hole positions need to be modified. @@@@*2 If A is used, the supplied face plate may be mounted. If B is used, the face plate must be modified before installing it. to modify the face plate, consult your Alpine dealer. If C is used, the face plate cannot be mounted. Reinforce the head unit with the metal mounting strap (not supplied). @@@@Slide the INA-W910R into the dashboard until it clicks. @@@@ 2. Attach GPS antenna to the center of ground pad. (The cable side faces the back of vehicle.

At the front or back of vehicle roof. When installing the INA-W910R to the vehicle, make sure the back of unit and the cable must not be bent.
