Manual abstract:

important: Never force a connector into a port. If the connector and port don't join with reasonable ease, they probably don't match. Make sure that the connector matches the port and that you have positioned the connector correctly in relation to the port. To use the Composite AV Cable to connect iPod, iPhone, or iPad to your TV or receiver: 1 Plug the yellow video connector into the video input port on your TV or receiver. 2 Plug the white and red audio connectors into the left and right analog audio input ports, respectively, on your TV or receiver. 3 Plug the iPod Dock Connector into your iPod, iPhone, iPad, or Universal Dock. 4 Plug the USB connector into your computer or a USB Power Adapter to keep your iPod, iPhone, or iPad charged. Make sure you set your iPod, iPhone, or iPad to send a video signal out to your TV or receiver. For more information, see the user guide for your iPod, iPhone, or iPad, available on the web at www.apple.com. Refer to the manual that came with your TV, receiver, or other device for the location of its ports.

@@This device complies with part 15 of the FCC rules. @@@@Responsible party (contact for FCC matters only): Apple Inc. @@@@If your computer system does cause interference to radio or television reception, try to correct the interference by using one or more of the following measures: Â· Turn the television or radio antenna until the interference stops. â· Move the computer to one side or the other of the television or radio. â· Move the computer farther away from the television or radio.

â· Plug the computer into an outlet that is on a different circuit from the television or radio. (That is, make certain the computer and the television or radio are on circuits controlled by different circuit breakers or fuses.) If necessary, consult an Apple Authorized Service Provider or Apple. See the service and support information that came with your Apple product. This device complies with RSS 210 of Industry Canada.

@@@@@.
