Manual abstract:

Take care not to spill any food or liquid on iPhone. In case iPhone gets wet, unplug all cables, turn off iPhone (press and hold the Sleep/Wake button, and then slide the onscreen slider) before cleaning, and allow it to dry thoroughly before turning it on again. Do not attempt to dry iPhone with an external heat source, such as a microwave oven or hair dryer. An iPhone that has been damaged as a result of exposure to liquids is not serviceable. Repairing or Modifying iPhone Never attempt to repair or modify iPhone yourself. Disassembling iPhone, including the removal of external screws, may cause damage that is not covered under the warranty. iPhone does not contain any user-serviceable parts, except for the SIM card and SIM tray. Service should only be provided by an Apple authorized wireless service provider. If iPhone has been submerged in water, punctured, or subjected to a severe fall, do not use it until you take it to an Apple authorized wireless service provider. For service information, choose iPhone Help from the Help menu in iTunes or go to: www.apple.com/uk/support/iphone/service/faq Battery Replacement The rechargeable battery in iPhone should be replaced only by Apple or an Apple authorized wireless service provider. For more information about battery replacement service, go to: www.apple.com/uk/support/iphone/service/battery Charging iPhone To charge iPhone, only use the Apple Dock Connector to USB Cable with an Apple USB Power Adapter or a high-power USB port on another device that is compliant with the USB 2.

0 or 1.1 standards, another Apple-branded product or accessory designed to work with iPhone, or a third-party accessory certified to use Apple's "Works with iPhone" logo. Read all safety instructions for any products and accessories before using with iPhone. Apple is not responsible for the operation of third-party accessories or their compliance with safety and regulatory standards. When you use the Apple USB Power Adapter to charge iPhone, make sure that the power adapter is fully assembled before you plug it into a power outlet.

Then insert the Apple USB Power Adapter firmly into the power outlet. Do not connect or disconnect the Apple USB Power Adapter with wet hands. 2 The Apple USB Power Adapter may become warm during normal use. Always allow adequate ventilation around the Apple USB Power Adapter and use care when handling. Unplug the Apple USB Power Adapter if any of the following conditions exist: • The power cord or plug has become frayed or damaged. • The adapter is exposed to rain, liquid, or excessive moisture. • The adapter case has become damaged. • You suspect the adapter needs service or repair. • You want to clean the adapter. Avoiding Hearing Damage Permanent hearing loss may occur if the receiver, earbuds, headphones, speakerphone, or earpieces are used at high volume.

Set the volume to a safe level. You can adapt over time to a higher volume of sound that may sound normal but can be damaging to your hearing. If you experience ringing in your ears or muffled speech, stop listening and have your hearing checked. The louder the volume, the less time is required before your hearing could be affected. Hearing experts suggest that to protect your hearing: • Limit the amount of time you use the receiver, earbuds, headphones, speakerphone, or earpieces at high volume. • Avoid turning up the volume to block out noisy surroundings. • Turn the volume down if you can't hear people speaking near you. For information about how to set a maximum volume limit on iPhone, see the iPhone User Guide. Emergency Calls You should not rely on wireless devices for essential communications, such as medical emergencies. Use of iPhone to call emergency services may not work in all locations.

Emergency numbers and services vary by region, and sometimes an emergency call cannot be placed due to network availability or environmental interference. Some cellular networks may not accept an emergency call from iPhone if it does not have a SIM, the SIM is PIN-locked, or if you have not activated your iPhone. Driving and Riding Safely Use of iPhone alone or with headphones (even if used only in one ear) while driving a vehicle or riding a bicycle is not recommended and is illegal in some areas. Check and obey the laws and regulations on the use of mobile devices like iPhone in the areas where you drive or ride. Be careful and attentive while driving or riding a bicycle.

If I you decide to use iPhone while driving, keep in mind the following guidelines: • Give full attention to driving or riding and to the road. Using a mobile device while driving or riding may be distracting. If you find it disruptive or distracting while operating any type of vehicle, riding a bicycle, or performing any activity that requires your full attention, pull off the road and park before making or answering a call if driving conditions require. • Get to know iPhone and its features such as Voice Control, favorites, recents, and speakerphone. These features help you to place your call without taking your attention off the road.

See the iPhone User Guide for more information. • Use a hands-free device. Add an extra layer of convenience and safety to your iPhone with one of the many handsfree accessories available. • Position iPhone within easy reach. Keep your eyes on the road. If you get an incoming call at an inconvenient time, let your voicemail answer it for you. • Try to plan calls when your car will be stationary. Assess the traffic before dialing, or place calls when you are not moving or before pulling into traffic. 1 Adapted from the CTIA-The Wireless Association® Safe Driving Tips. 3 • • • Let the person you are speaking with know you are driving.

If necessary, suspend the call in heavy traffic or hazardous weather conditions. Driving in rain, sleet, snow, ice, fog, and even heavy traffic can be hazardous. Do not text, email, take notes, look up phone numbers, or perform any other activities that require your attention while driving. Composing or reading texts and emails, jotting down a to-do list, or flipping through your address book takes attention away from your primary responsibility, driving safely. Do not engage in stressful or emotional conversations that may be distracting. Make people you are talking with aware you are driving and suspend conversations that have the potential to divert your attention from the road. Navigating Safely If your iPhone has applications that provide maps, digital compass headings, directions or location-based navigation assistance, these applications should only be used for basic navigation assistance and should not be relied on to determine precise locations, proximity, distance, or direction. Maps, digital compass, directions, and location-based applications provided by Apple depend on data collected and services provided by third parties. These data services are subject to change and may not be available in all geographic areas, resulting in maps, digital compass headings, directions or location-based information that may be unavailable, inaccurate, or incomplete.

Some iPhones contain an internal digital compass located in the upper right corner of iPhone.

The accuracy of digital compass headings may be negatively affected by magnetic or other environmental interference, including interference caused by the close proximity of the magnets contained in the iPhone earbuds. Never rely solely on the digital compass for determining direction. Compare the information provided on iPhone to your surroundings and defer to posted signs to resolve any discrepancies. Do not use location-based applications while performing activities that require your full attention. For important information about driving safety, see the "Driving and Riding Safely" section.

Always comply with posted signs and the laws and regulations in the areas where you are using iPhone. Seizures, Blackouts, and Eyestrain A small percentage of people may be susceptible to blackouts or seizures (even if they have never had one before) when exposed to flashing lights or light patterns such as when playing games or watching video. If you have experienced seizures or blackouts or have a family history of such occurrences, you should consult a physician before playing games (if available) or watching videos on your iPhone. Discontinue use of iPhone and consult a physician if you experience headaches, blackouts, seizures, convulsion, eye or muscle twitching, loss of awareness, involuntary movement, or disorientation. To reduce risk of headaches, blackouts, seizures, and eyestrain, avoid prolonged use, hold iPhone some distance from your eyes, use iPhone in a well lit room, and take frequent breaks.

Glass Parts The outside cover of the iPhone screen is made of glass. This glass could break if iPhone is dropped on a hard surface or receives a substantial impact. If the glass chips or cracks, do not touch or attempt to remove the broken glass. Stop using iPhone until the glass is replaced by an Apple authorized wireless service provider. Glass cracked due to misuse or abuse is not covered under the warranty. Choking Hazards iPhone contains small parts, which may present a choking hazard to small children. Keep iPhone and its accessories away from small children. Repetitive Motion When you perform repetitive activities such as typing or playing games on iPhone, you may experience occasional discomfort in your hands, arms, shoulders, neck, or other parts of your body. Take frequent breaks and if you have discomfort during or after such use, stop use and see a physician. 4 Potentially Explosive Atmospheres Turn off iPhone (press and hold the Sleep/Wake button, and then slide the onscreen slider) when in any area with a potentially explosive atmosphere.

Do not charge iPhone, and obey all signs and instructions. Sparks in such areas could cause an explosion or fire, resulting in serious injury or even death. Areas with a potentially explosive atmosphere are often, but not always, marked clearly. Potential areas may include: fueling areas (such as gas stations); below deck on boats; fuel or chemical transfer or storage facilities; vehicles using liquefied petroleum gas (such as propane or butane); areas where the air contains chemicals or particles (such as grain, dust, or metal powders); and any other area where you would normally be advised to turn off your vehicle engine. For Vehicles Equipped with an Air Bag An air bag inflates with great force. Do not store iPhone or any of its accessories in the area over the air bag or in the air bag deployment area. Exposure to Radio Frequency Energy iPhone contains radio transmitters and receivers. When on, iPhone receives and sends out radio frequency (RF) energy through its antenna. The iPhone cellular antenna is located on the back of iPhone near the dock connector. The Wi-Fi and Bluetooth® antenna is located near the back top edge of the iPhone.

iPhone is designed and manufactured not to exceed limits for exposure to RF energy set by the Federal Communications Commission (FCC) of the United States, Industry Canada (IC), and the recommendations of the Council of the European Union. The exposure standard employs a unit of measurement known as the specific absorption rate, or SAR. The SAR limit applicable to iPhone set by the FCC is 1.6 watts per kilogram (W/kg), 1.6 W/kg by Industry Canada,

and 2.0 W/kg by the Council of the European Union. Tests for SAR are conducted using standard operating positions (i.e., at the ear and worn on the body) specified by these agencies, with iPhone transmitting at its highest certified power level in all tested frequency bands. Although SAR is determined at the highest certified native regarding your vehicle.

Pacemakers The Health Industry Manufacturers Association recommends that a minimum separation of 15 cm (6 inches) be maintained between a handheld wireless phone and a pacemaker to avoid potential interference with the pacemaker. Persons with pacemakers: • Should always keep iPhone more than 15 cm (6 inches) from the pacemaker when the phone is turned on • Should not carry iPhone in a breast pocket • Should use the ear opposite the pacemaker to minimize the potential for interference 6 If you have any reason to suspect that interference is taking place, turn iPhone off immediately. Hearing Aids iPhone may interfere with hearing aids. If it does, consult the hearing aid manufacturer or your physician for alternatives or remedies. Other Medical Devices If you use any other personal medical device, consult the device manufacturer or your physician to determine if it is adequately shielded from radio frequency emissions from iPhone. Health Care Facilities Hospitals and health care facilities may use equipment that is particularly sensitive to external radio frequency emissions. Turn iPhone off when staff or posted signs instruct you to do so. Blasting Areas and Posted Facilities To avoid interfering with blasting operations, turn off iPhone when in a "blasting area" or in areas posted "Turn off two-way radio." Obey all signs and instructions. Important Handling Information NOTICE: Failure to follow these handling instructions could result in damage to iPhone or other property.

Carrying and Handling iPhone iPhone contains sensitive components. Do not bend, drop, or crush iPhone. Some iPhones have an oleophobic coating on the screen that repels oil left by your hands and face. If your iPhone has such a coating, contact with abrasive surfaces will diminish the effectiveness of this coating. If your iPhone's back case has a high-gloss finish, handle with care to maintain its appearance. If you are concerned about scratching or abrasion, you can use one of the many cases sold separately. Using Connectors and Ports Never force a connector into a port. Check for obstructions on the port. If the connector and port don't join with reasonable ease, they probably don't match. Make sure that the connector matches the port and that you have positioned the connector correctly in relation to the port.

Keeping iPhone Within Acceptable Temperatures Operate iPhone in a place where the temperature is between 0° and 35° C (32° to 95° F). Low- or high-temperature conditions might temporarily shorten battery life or cause iPhone to temporarily stop working properly. Avoid dramatic changes in temperature or humidity when using iPhone as condensation may form on or within iPhone. Store iPhone in a place where the temperature is between -20° and 45° C (-4° to 113° F). Don't leave iPhone in your car, because temperatures in parked cars can exceed this range.

When you're using iPhone or charging the battery, it is normal for iPhone to get warm. The exterior of iPhone functions as a cooling surface that transfers heat from inside the unit to the cooler air outside. Keeping the Outside of iPhone Clean To clean iPhone, unplug all cables and turn off iPhone (press and hold the Sleep/Wake button, and then slide the onscreen slider). Then use a soft, slightly damp, lint-free cloth. Avoid getting moisture in openings. Don't use window cleaners, household cleaners, aerosol sprays, solvents, alcohol, ammonia, or abrasives to clean iPhone. If your iPhone has an oleophobic coating on the screen, simply wipe iPhone's screen with a soft, lint-free cloth to remove oil left by your hands and face. Please note that the ability of this coating to repel oil will diminish over time with normal usage, and that rubbing the screen with an abrasive material will further diminish its effect and may scratch your screen. 7 Disposal and Recycling Information Apple Used Mobile Phone Recycling Program (available in some areas) For free recycling of your old mobile phone, a prepaid shipping label, and instructions see: www.apple.com/uk/environment/recycling/iphone Disposal and Recycling You must dispose of iPhone properly according to local laws and regulations. Because iPhone contains electronic components and a battery, iPhone must be disposed of separately from household waste. When iPhone reaches its end of life, contact local authorities to learn about disposal and recycling options, or simply drop it off at your local Apple retail store or return it to Apple. The battery will be removed and recycled in an environmentally friendly manner. For more information, see: www.apple.com/uk/environment/recycling/nationalservices/europe.html Battery Replacement for iPhone The rechargeable battery in iPhone should be replaced only by Apple or an Apple authorized wireless service provider.
