Manual abstract:

@@@Important: Remove the protective film covering the 45W MagSafe Power Adapter before setting up your MacBook Air. Chapter 1 Ready, Set Up, Go 9 Setting Up Your MacBook Air Your MacBook Air is designed so that you can set it up quickly and start using it right away. The following pages take you through the setup process, including these tasks: • Plugging in the 45W MagSafe Power Adapter • Turning on your MacBook Air • Using Setup Assistant to access a network and configure a user account and other settings • Setting up the Mac OS X desktop and preferences Step 1: Plug in the 45W MagSafe Power Adapter to provide power to the MacBook Air and charge the battery.

Make sure the AC plug is fully inserted into the power adapter and the electrical prongs on your AC plug are in their completely extended position. Insert the AC plug of your power adapter into a power outlet and the MagSafe connector into the MagSafe power port. As the MagSafe connector gets close to the port, you'll feel a magnetic pull drawing it in. AC plug MagSafe connector ~ MagSafe power port AC power cord 10 Chapter 1 Ready, Set Up, Go To extend the reach of your power adapter, replace the AC plug with the included AC power cord. First pull the AC plug up to remove it from the adapter, and then attach the AC power cord to the adapter, making sure it is seated firmly. Plug the other end into a power outlet.

When disconnecting the power adapter from an outlet or from your MacBook Air, pull the plug, not the cord.

When you connect the power adapter to your MacBook Air, the indicator light on the MagSafe connector starts to glow. A amber light indicates that the battery is charging. A green light indicates that the battery is fully charged. If you don't see a light, make sure the connector is seated properly and the power adapter is plugged into a working power outlet. Chapter 1 Ready, Set Up, Go 11 Step 2: Press the power (⌘) button briefly to turn on your MacBook Air.

The power button is located in the upper right corner of your keyboard. When you turn on your MacBook Air, you hear a start-up tone. ⌘ Power button It takes your MacBook Air a few moments to start up. After it starts up, Setup Assistant opens automatically. If your MacBook Air doesn't turn on, see page 42. 12 Chapter 1 Ready, Set Up, Go Step 3: Configure your MacBook Air with Setup Assistant.

The first time you turn on your MacBook Air, Setup Assistant starts. Setup Assistant helps you enter your Internet information and set up a user account on your MacBook Air. You can also migrate information from another Mac during setup. Note: If you don't use Setup Assistant to transfer information when you first start up your MacBook Air, you can do it later using Migration Assistant. Go to the Applications folder, open Utilities, and double-click Migration Assistant. To set up your MacBook Air: 1 In the Setup Assistant, follow the on-screen instructions until you get to the "Do You Already Own a Mac?" screen. 2 Do a basic setup or a setup with migration: • To do a basic setup, select "Don't transfer my information now" and click Continue. Follow the remaining prompts to select your wireless network, set up an account, and exit Setup Assistant. • To do a setup with migration, select the Mac you want to migrate information from.

You may have to update software if the other Mac doesn't have Mac OS X version 10.5.3 or later installed. Then go to "Migrating Information to Your MacBook Air" on page 16. Note: After you start Setup Assistant on your MacBook Air, you can leave it mid-process without quitting, move to the other computer if you need to update its software, and then return to your MacBook Air to complete the setup. Chapter 1 Ready, Set Up, Go 13 Step 4: Customize the Mac OS X desktop and set preferences. You can quickly make the desktop look the way you want using System Preferences, your command center for most settings on your MacBook Air. Choose Apple (⌘) > System Preferences from the menu bar or click the System Preferences icon in the Dock. Menu bar Help menu Spotlight search icon Finder icon Dock System Preferences icon 14 Chapter 1 Ready, Set Up, Go Setting Up DVD or CD Sharing You can partner your MacBook Air with another Mac or Windows computer that has an optical disc drive and is on the same wired or wireless network. Use this other computer to: • Migrate information to your MacBook Air, if the other computer is a Mac (see "Migrating Information to Your MacBook Air" on page 16) • Share the contents of DVDs or CDs or install applications (see "Sharing Discs with DVD or CD Sharing" on page 19) The computer with the optical drive can be a Mac with Mac OS X v10.4.11 or later, or a Windows XP or Windows Vista computer. If the Mac has Mac OS X v10.5.3 or later, DVD or CD Sharing is already installed.

You can partner with more than one other computer, but you can use only one partner computer at a time. Mac or Windows computer MacBook Air Chapter 1 Ready, Set Up, Go 15 If the other computer is a Windows computer or a Mac with a Mac OS X version earlier than 10.5.3, download the DVD or CD Sharing Setup software for your partner computer: • If the other computer is a Windows computer, go to: http://support.apple.com/downloads/DVD_or_CD_Sharing_Update_1_0_for_Windows • If the other computer is a Mac with Mac OS X v10.4.10 to 10.5.2, go to: <http://support.apple.com/kb/DL113> Important: After you install the DVD or CD Sharing Setup package on your other Mac, make sure you have the latest software by choosing Apple (⌘) > Software Update. Install any available Mac OS X updates. Migrating Information to Your MacBook Air You can migrate existing user accounts, files, applications, and other information from another Mac computer. @ @ @ @ @ @ @ @ @ @ 7 On the other Mac, quit any other open applications and then click Continue.

8 On the other Mac, enter the six-digit passcode displayed in Setup Assistant on your new MacBook Air.

You can choose the items (user accounts, documents, movies, music, photos, and so on) that you want to migrate to your MacBook Air. 9 Click Continue to start the migration. Important: Don't use the other Mac for anything else until the migration is complete. If the connection is terminated during migration, you can resume the migration later using Migration Assistant on your MacBook Air and your other Mac. 18 Chapter 1 Ready, Set Up, Go Getting Additional Information onto Your MacBook Air Your MacBook Air comes with several applications installed, including the iLife suite. Many other applications can be downloaded from the Internet. If you want to install third-party applications from a DVD or CD, you can: • Install applications onto your MacBook Air or share information using the optical disc drive on another Mac or Windows computer (if DVD or CD Sharing is set up and enabled). For more information, see the next section. • Attach the MacBook Air SuperDrive (an external USB optical disc drive available separately at www.apple.com/store) to the USB port on your MacBook Air, and insert your installation disc. Sharing Discs with DVD or CD Sharing

You can enable DVD or CD Sharing on a Mac or Windows computer to use the Remote Disc feature of MacBook Air. Remote Disc allows you to share the discs you insert into the optical disc drive of the other computer. Some discs, such as DVD movies and game discs, may be copy-protected and therefore unusable through DVD or CD Sharing. Make sure DVD or CD Sharing is already set up on any Mac or Windows computer you want to partner with. For information, see page 15. To enable DVD or CD Sharing, if your other computer is a Mac: 1 Make sure your MacBook Air and the other Mac are on the same wireless network. Check the AirPort (Z) status icon in the menu bar to see what network you're connected to. On the other Mac, choose Apple (⌘) > System Preferences and then open Sharing.

[You're reading an excerpt. Click here to read official APPLE MACBOOK AIR 13 INCH user guide](#)

Chapter 1 Ready, Set Up, Go 19 2 In the Sharing panel, select "DVD or CD Sharing" in the Service list. If you want to allow other users to request permission to share a DVD or CD, select "Ask me before allowing others to use my DVD drive." To enable DVD or CD Sharing, if your other computer is a Windows computer: 1 Make sure your MacBook Air and the Windows computer are on the same wireless network. 2 On the Windows computer, open the DVD or CD Sharing control panel. 3 Select "Enable Remote DVD or CD." If you want to allow other users to request permission to share a DVD or CD, select "Ask me before allowing others to use my DVD drive." To use a shared DVD or CD: 1 On the other computer, insert a DVD or CD into the optical disc drive. 2 On your MacBook Air, select the Remote Disc when it appears under Devices in the Finder sidebar. If you see the "Ask to use" button, click it. 3 On the other computer, when prompted, click Accept to allow your MacBook Air to use the DVD or CD. 28 Chapter 2 Life with Your MacBook Air - d MagSafe power port Plug in the included 45W MagSafe Power Adapter to recharge the MacBook Air battery.

USB (Universal Serial Bus) 2.0 ports Connect a MacBook Air SuperDrive, USB to Ethernet adapter, iPod, iPhone, iPad, mouse, keyboard, printer, disk drive, digital camera, joystick, modem, and more to your MacBook Air. Audio out port Connect external speakers and headphones. Built-in microphone Captures sounds with the microphone (located on the left side, next to the audio out port) or talk with friends live over broadband using the included iChat application. f Mini DisplayPort (video out) Connect to an external display or projection system that uses a DVI, Dual-Link DVI, or VGA connector. You can purchase adapters for supported video formats. SD card slot Easily transfer photos, videos, and data to and from your MacBook Air with an SD card. Note:

Adapters and other accessories are sold separately at www.apple.com/store or your local Apple Retail Store. Chapter 2 Life with Your MacBook Air 29 Using the Multi-Touch Trackpad Use the trackpad to move the pointer and to perform a variety of Multi-Touch gestures. Unlike typical trackpads, the entire MacBook Air trackpad is a button, and you can click anywhere on the trackpad. To enable Multi-Touch gestures, view instructional videos of the gestures, and set the trackpad options, choose Apple() > System Preferences, and then click Trackpad. Here are ways to use your MacBook Air trackpad: A Two-finger scrolling lets you drag to scroll quickly up, down, or sideways in the active window. This option is on by default.

30 Chapter 2 Life with Your MacBook Air A Secondary-clicking or "right-clicking" lets you access shortcut menu commands. To set up a one-finger secondary-click zone in the bottom left or right corner of the trackpad, select Secondary Click under the One Finger option in Trackpad preferences. Secondary-click zone To set up two-finger secondary-clicking anywhere on the trackpad, select Secondary Click under the Two Fingers option in Trackpad preferences. Note: You can also secondary-click by holding down the Control key while you click. Chapter 2 Life with Your MacBook Air 31 The following trackpad gestures work in certain applications.

When you perform these gestures, slide your fingers slightly on the surface of the trackpad. For more information, see Trackpad preferences or choose Help > Mac Help and search for "trackpad." A Two-finger pinching lets you zoom in or out on PDFs, images, photos, and more. A Two-finger rotating lets you rotate photos, pages, and more. 32 Chapter 2 Life with Your MacBook Air A Three-finger swiping lets you rapidly page through documents, move to the previous or next photo, and more. A Four-finger swiping works in the Finder and all applications. Swiping four fingers to the left or right activates Application Switcher so you can cycle through open applications. Swiping four fingers up or down causes Exposé to show the desktop or display all open windows. To enable or disable any of the gestures, choose Apple() > System Preferences, and then click Trackpad. Click the checkbox to turn gestures on or off.

Chapter 2 Life with Your MacBook Air 33 Running Your MacBook Air on Battery Power When the MagSafe Power Adapter is connected, your MacBook Air draws power from its built-in rechargeable battery. The length of time that you can run your MacBook Air varies, depending on the applications you use and the external devices connected to your MacBook Air.

Turning off features such as AirPort Extreme or Bluetooth wireless technology and reducing screen brightness can help conserve battery charge. Many of your system preferences are automatically set to optimize battery life. Charging the Battery You can determine whether the battery needs to be charged by looking at the indicator light on the MagSafe connector. If the light is glowing amber, the battery needs to be charged. If the light is glowing green, the battery is fully charged.

You can also check the amount of battery charge left by viewing the Battery () status icon in the menu bar. The battery icon only with a specific application might indicate that the application is not compatible with the version of the Mac OS installed on your MacBook Air. A Any new software that you installed, especially software that added items to the System folder.

Problems That Prevent You from Using Your MacBook Air If your MacBook Air doesn't respond or the pointer doesn't move. On rare occasion, an application might "freeze" on the screen. Mac OS X provides a way to quit a frozen application without restarting your MacBook Air. To force an application to quit: 1 Press Command(x)-Option-Esc or choose Apple() > Force Quit from the menu bar.

The Force Quit Applications dialog appears with the application selected. 2 Click Force Quit. @ @ @ @ @ @ @ @ @ @ @ @ @ @ @ @ 2 Press the power () button to restart the system. @ @ @ @ @ @ 2 Remove the Software Reinstall Drive. 3

Insert the Software Reinstall Drive into one of the USB ports on your MacBook Air, as shown in the illustration on page 48. If you forget your password You can reset your administrator password and passwords for all other accounts. 1 Insert the Software Reinstall Drive into one of the USB ports, as shown in the illustration on page 48.

@ @ @ 2 Double-click the Mac OS X Installer, and then click Restart. 3 When prompted, choose your preferred language. @ @ @ @ 2 Restart your MacBook Air while holding down the D key. @ @ 4 Press the Return key or click the right arrow button.

@ @ @ @ @ @ @ @ @ @ @ @ @ @ @ @ Click the "Assist me" button to open Network Setup Assistant. @ @ To use Network Diagnostics: 1 Choose Apple() > System Preferences. @ @ @ 4 Follow the on-screen instructions. @ @ @ @ @ @ @ @ To check for updated software: 1 Choose Apple() > System Preferences. @ @ @ @ @ @ 2 Make sure your power adapter is connected and plugged in. @ @ @ @ @ @ @ @ 8 Click Install to start the installation.

9 When the installation is complete, click Restart to restart your MacBook Air. 10 Follow the prompts in Setup Assistant to set up your user account. If you want to erase and install, make sure you back up your user data before you start. Use Disk Utility to erase the internal flash storage. You can open Disk Utility from the Mac OS X Installer (choose Disk Utility from the Utilities menu). For information about Disk Utility and its options, see Mac Help, or open Disk Utility (/Applications/Utilities/DiskUtility) and choose Help > Disk Utility Help. You can also view detailed instructions in the following Knowledge Base article: <http://support.apple.com/kb/HT3910> Installing Applications You can reinstall the life applications that came with your MacBook Air if you accidentally delete them, or after you perform a clean install.

[You're reading an excerpt. Click here to read official APPLE MACBOOK AIR 13 INCH user guide](#)

To install the applications that came with your MacBook Air: 1 Make sure your power adapter is connected and plugged in.

2 Insert the Software Reinstall Drive into one of the USB ports, as shown in the illustration on page 48. Important:

Don't disturb or remove the Software Reinstall Drive until the installation is done. 3 Double-click the Life Installer icon. Chapter 3 Problem, Meet Solution 49 4 Follow the onscreen instructions. In the Installation Type pane, click Customize.

5 Click the disclosure triangle next to Bundled Applications, select the checkboxes next to the applications you want to install, and then click Install. 6 When the installation is complete, click Close. Learning More, Service, and Support Your MacBook Air does not have any user-serviceable or user-replaceable parts. If you need service, contact Apple or take your MacBook Air to an Apple Authorized Service

Provider. You can find more information about your MacBook Air through online resources, onscreen help, System Profiler, and Apple Hardware Test.

Online Resources For online service and support information, go to www.apple.com/support and choose your country from the pop-up menu. You can search the Apple Care Knowledge Base, check for software updates, or get help from Apple's discussion forums. Onscreen Help

To get information about your MacBook Air, use System Profiler. It shows you what hardware and software is installed, the serial number and operating system version, how much memory is installed, and more. To open System Profiler, choose Apple() > About This Mac from the menu bar and then click More Info. 50 Chapter 3 Problem, Meet Solution Apple Care Service and Support Your MacBook Air comes with 90 days of technical support and one year of hardware repair warranty coverage at an Apple Retail Store or an Apple-authorized repair center, such as an Apple Authorized Service Provider.

You can extend your coverage by purchasing the Apple Care Protection Plan. For information, visit

www.apple.com/support/products or visit the website address for your country listed later in this section.

If you need assistance, Apple Care telephone support representatives can help you with installing and opening applications, and basic troubleshooting. Call the support center number nearest you (the first 90 days are complimentary). Have the purchase date and your MacBook Air serial number ready when you call.

Your 90 days of complimentary telephone support begins on the date of purchase. Country United States Australia Canada (English) (French) Ireland New Zealand United Kingdom Phone 1-800-275-2273 (61) 1-300-321-456 1-800-263-3394 (353) 1850946191 00800-7666-7666 (44) 08442090611 Website www.apple.com/support

www.apple.com/au/support www.apple.com/ca/support www.apple.com/ca/fr/support www.apple.com/ie/support www.apple.com/nz/support www.apple.com/uk/support

Telephone numbers are subject to change, and local and national telephone rates may

apply. A complete list is available on the web: www.apple.com/support/contact/phone_contacts.html Chapter 3 Problem, Meet Solution 51 Locating Your Product Serial Number Use one of these methods to find your MacBook Air serial number: Â Turn over your MacBook Air. The serial number is etched into the case near the hinge.

Serial number Â Choose Apple() > About This Mac. Click the version number beneath the words

"Mac OS X" to cycle through the Mac OS X version number, the build version, and the serial number.

Â Click the Finder icon and open Applications/Utilities/System Profiler. Click Hardware in the Contents pane. 52 Chapter 3 Problem, Meet Solution 4 Last, but Not Least www.apple.com/environment www.apple.com/macosx Mac Help ergonomics For your safety and that of your equipment, follow these rules for handling and

cleaning your MacBook Air and for working more comfortably. Keep these instructions handy for reference by you and others. WARNING:

Incorrect storage or use of your MacBook Air may void the manufacturer's warranty. Important Safety Information WARNING:

Failure to follow these safety instructions could result in fire, electric shock, or other injury or damage.

Built-in battery Don't remove the battery from your MacBook Air. The battery should be replaced only by an Apple Authorized Service Provider. Discontinue use of your MacBook Air if it's dropped or appears crushed, bent, deformed, or damaged. Do not expose your MacBook Air to extreme heat sources, such as radiators or fireplaces, where temperatures might exceed 212°F for 100°C. Proper handling Set up your MacBook Air on a stable work surface that allows

for adequate air circulation under and around the computer.

Don't operate your MacBook Air on a pillow or other soft material, as the material can block the air flow

vents. Never place anything over the keyboard when operating your MacBook Air. Never push objects into the ventilation openings.

The bottom of your MacBook Air may become very warm during normal use. If your MacBook Air is on your lap and gets uncomfortably warm, remove it from your lap and place it on a stable work surface.

54 Chapter 4 Last, but Not Least Water and wet locations Keep your MacBook Air away from sources of liquid, such as

drinks, washbasins, shower stalls, and so on. Protect your MacBook Air from dampness or wet weather, such as rain, snow, and fog. 45W MagSafe Power

Adapter Make sure the AC plug or AC power cord is fully inserted into the power adapter before plugging the adapter into a power outlet.

Use only the power adapter that came with your MacBook Air, or an Apple-authorized power adapter that is compatible with this product. The AC power cord provides a grounded connection. The power adapter may become very warm during normal use. @@@@ @@@@ @@@@

Avoid turning up the volume to block out noise surroundings. @@@@ @@@@ @@@@ @@@@ Cleaning the MacBook Air screen To clean your MacBook Air screen, first shut down your MacBook Air and unplug the power adapter. Then use a soft, lint-free cloth dampened with just water and wipe the screen. Don't spray liquid directly on the screen.

58 Chapter 4 Last, but Not Least Understanding Ergonomics Here are some tips for setting up a healthy work environment. Keyboard and Trackpad

When you use the keyboard and trackpad, your shoulders should be relaxed. Your upper arm and forearm should form an angle that is slightly greater than a right angle, with your wrist and hand in roughly a straight line. This Not this Use light touch when typing or using the trackpad and keep your hands and fingers

relaxed. Avoid rolling your thumbs under your palms. This Not this Chapter 4 Last, but Not Least 59

Change hand positions often to avoid fatigue. Some computer users might develop discomfort in their hands, wrists, or arms after intensive work without breaks. If you begin to develop chronic pain or discomfort in your hands, wrists, or arms, consult a qualified health specialist. External Mouse

If you use an external mouse, position the mouse at the same height as the keyboard and within a comfortable reach. Chair

An adjustable chair that provides firm, comfortable support is best.

Adjust the height of the chair so your thighs are horizontal and your feet are flat on the floor. The back of

the chair should support your lower back (lumbar region). Follow the manufacturer's instructions for adjusting the backrest to fit your body properly.

You might have to raise your chair so that your forearms and hands are at the proper angle to the keyboard. If this makes it impossible to rest your feet flat on the floor, you can use a footrest with an adjustable height and tilt to make up for any gap between the floor and your feet.

Or you can lower the desk to eliminate the need for a footrest. Another option is to use a desk with a keyboard tray that's slower than the regular work surface.

<http://yourpdfguides.com/dref/3673907>

60 Chapter 4 Last, but Not Least Built-In Display Adjust the angle of the display to minimize glare and reflections from overhead lights and windows. Do not force the display if you meet resistance. The display is not designed to open past 135 degrees.

You can adjust the brightness of the screen when you take the computer from one work location to another, or if the lighting in your work area changes.

More information about ergonomics is available on the web: www.apple.com/about/ergonomics Apple and the Environment Apple Inc. recognizes its responsibility to minimize the environmental impact of its operations and products. More information is available on the web: www.apple.com/environment

Chapter 4 Last, but Not Least 61 Regulatory Compliance Information FCC Compliance Statement This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. See instructions if interference to radio or television reception is suspected.

L'utilisation de ce dispositif est autorisée seulement aux conditions suivantes: (1) il ne doit pas produire de brouillage et (2)

l'utilisateur du dispositif doit être prêt à accepter tout brouillage radioélectrique reçu, même si ce brouillage est susceptible de compromettre le fonctionnement du dispositif. If necessary, consult an Apple Authorized Service Provider or Apple. See the service and support information that came with your Apple product. Or consult an experienced radio/television technician for additional suggestions. Important: Changes or modifications to this product not authorized by Apple Inc. could void the EMC compliance and negate your authority to operate the product.

This product has demonstrated EMC compliance under conditions that included the use of compliant peripheral devices and shielded cables (including Ethernet network cables) between system components. It is important that you use compliant peripheral devices and shielded cables between system components to reduce the possibility of causing interference to radios, television sets, and other electronic devices. Responsible party (contact for FCC matters only): Apple Inc.
