Appendices This section includes notices and safety statements for your ASUS Tablet and ASUS Mobile Dock.

ASUS Tablet and ASUS Mobile Dock E-Manual 7 Conventions used in this manual To highlight key information in this manual, some text are presented as follows: IMPORTANT! This message contains vital information that must be followed to complete a task. NOTE: This message contains additional information and tips that can help complete tasks. wARNING! This message contains important information that must be followed to keep you safe while performing tasks and prevent damage to your ASUS Tablet's data and components. Icons The icons below indicate the devices you can use for completing a series of tasks or procedures on your ASUS Tablet. = This indicates sections that you can refer to in this manual.

ASUS Tablet and ASUS Mobile Dock E-Manual Safety precautions Using your ASUS Tablet This ASUS Tablet should only be used in environments with ambient temperatures between 5°C (41°F) and 35°C (95°F). Refer to the rating label on the bottom of your ASUS Tablet and ensure that your power adapter complies with this rating. Do not leave your ASUS Tablet on your lap or near any part of your body to prevent discomfort or injury from heat exposure. Do not use damaged power cords, accessories, and other peripherals with your ASUS Tablet. While powered on, ensure that you do not carry or cover your ASUS Tablet with any materials that can reduce air circulation.

Do not place your ASUS Tablet on uneven or unstable work surfaces. You can send your ASUS Tablet through x-ray machines (used on items placed on conveyor belts), but do not expose them to magnetic detectors and wands. Contact your airline provider to learn about related inflight services that can be used and restrictions that must be followed when using your ASUS Tablet in-flight. ASUS Tablet and ASUS Mobile Dock E-Manual 9 Caring for your ASUS Tablet Disconnect the AC power and remove the battery pack (if applicable) before cleaning your ASUS Tablet. Use a clean cellulose sponge or chamois cloth dampened with a solution of nonabrasive detergent and a few drops of warm water. Remove any extra moisture from your ASUS Tablet using a dry cloth. Do not use strong solvents such as thinners, benzene, or other chemicals on or near your ASUS Tablet. Do not place objects on top of your ASUS Tablet. Do not expose your ASUS Tablet to strong magnetic or electrical fields. Do not use or expose your ASUS Tablet near liquids, rain, or moisture.

Do not expose your ASUS Tablet to dusty environments. Do not use your ASUS Tablet near gas leaks. 10 ASUS Tablet and ASUS Mobile Dock E-Manual Proper disposal Do not throw your ASUS Tablet/ASUS Mobile Dock in municipal waste. This product has been designed to enable proper reuse of parts and recycling. The symbol of the crossed out wheeled bin indicates that the product (electrical, electronic equipment and mercury-containing button cell battery) should not be placed in municipal waste. check local regulations for disposal of electronic products. Do not throw the battery in municipal waste. The symbol of the crossed out wheeled bin indicates that the battery should not be placed in municipal waste. aSUS Tablet and ASUS Mobile Dock E-Manual 11 12 ASUS Tablet and ASUS Mobile Dock E-Manual Chapter 1: Hardware Setup ASUS Tablet and ASUS Mobile Dock E-Manual 13 Top View NOTE: • •The keyboard's layout may vary per region or country. The top view may also vary in appearance depending on the ASUS Tablet model.

The ASUS Mobile Dock is compatible with T200 series ASUS Tablets. 14 ASUS Tablet and ASUS Mobile Dock E-Manual ASUS Tablet Your ASUS Tablet comes with an optional ASUS Mobile Dock to suit your mobile needs. The ASUS Tablet is also equipped with its own features for work and play which can be accessed using touch screen gestures. NOTE: For more details on using the ASUS Tablet, refer to the Tablet features and Gestures for the ASUS Tablet and touchpad sections in this manual. Purchase an HDD from authorized retailers of this ASUS Tablet to ensure maximum compatibility and reliability.

It is recommended that you replace the HDD under professional supervision. You may also visit an authorized service center for further assistance. wARNING! Disconnect all the connected peripherals, any telephone or telecommunication lines and power connector (such as external power supply, battery pack, etc.) before removing the compartment cover. NOTE: The appearance of your ASUS Tablet's bottom side and HDD may vary per model but the HDD installation remains the same. Loosen the screw of the ASUS Mobile Dock's compartment cover. Pull out the compartment cover and remove it completely from your ASUS Mobile Dock. Remove the screws securing the HDD bay to the compartment. Remove the HDD bay from the compartment using the flap. Place the HDD in the HDD bay.

Secure the HDD inside the HDD bay using the screws bundled with the HDD bay. hDD HDD bay ASUS Tablet and ASUS Mobile Dock E-Manual 87 G. Replace the HDD bay back in the compartment, with the HDD connector aligned with the ASUS Mobile Dock's HDD port. Push the HDD bay until it connects with the ASUS Mobile Dock. Secure the HDD bay with the screws you removed earlier.

Align then push down the compartment cover back into place. Reattach and tighten the screw that you removed earlier. ASUS Tablet and ASUS Mobile Dock E-Manual 89 90 ASUS Tablet and ASUS Mobile Dock E-Manual Tips and FAQs ASUS Tablet and ASUS Mobile Dock E-Manual 91 Useful tips for your ASUS Tablet To help you maximize the use of your ASUS Tablet, maintain its system performance, and ensure all your data are kept secured, here are some useful tips that you can follow: • • Update Windows® periodically to ensure that your applications have the latest security settings. Use ASUS Live Update to update ASUS-exclusive applications, drivers and utilities in your ASUS Tablet. Refer to the ASUS Tutor installed in your ASUS Tablet for more details. Use an anti-virus software to protect your data and keep this updated too. Unless absolutely necessary, refrain from using force shutdown to turn off your ASUS Tablet. Always backup your data and make it a point to create a backup data in an external storage drive. Refrain from using the ASUS Tablet at extremely high temperatures. If you are not going to use your ASUS Tablet for a long period of time (at least a month), we recommend that you take out the battery if the battery is removable. Disconnect all external devices and ensure you have the following items prior to resetting your ASUS Tablet: - - - - Product key for your operating systems and other installed applications Backup data Log in ID and password Internet connection information • • • • • 92 ASUS Tablet and ASUS Mobile Dock E-Manual Hardware FAQs 1. A black dot, or sometimes a colored dot, appears onscreen when I turn on the ASUS Tablet. what should I do? Although these dots normally appear onscreen, they will not affect your system. If the incident continues and subsequently affects system performance, consult an authorized ASUS service center. How can I fix this? The color and brightness of your display panel may be affected by the angle and current position of your ASUS Tablet.

The brightness and color tone of your ASUS Tablet may also vary per model. You may use the function keys or the display settings in your operating system to adjust the appearance of your display panel. You can try doing any of the following suggestions: • • • • Use the function keys to adjust the display brightness. If you are not using any Wi-Fi connection, switch your system into Airplane mode. disconnect unused USB devices. Close unused applications, especially those that take up too much system memory. □ Check whether the power adapter or battery pack is attached correctly. You may also disconnect the power adapter or battery pack, wait for a minute, then reconnect them again to the power outlet and ASUS Tablet. If the problem still exists, contact your local ASUS service center for assistance. • 5.

Why is my touchpad not working? • • Press to enable your touchpad. Check if ASUS Smart Gesture has been set to disable the touchpad when connecting an external pointing device. 6. When I play audio and video files, why can't I hear any sound from my ASUS Tablet's audio speakers? You can try doing any of the following suggestions: • • • Press to turn up the speaker volume. Check if your speakers were set to mute.

What should I do if my ASUS Tablet's power adapter gets lost or my battery stops working? Contact your local ASUS service center for assistance. 94 ASUS Tablet and ASUS Mobile Dock E-Manual 8. Why does audio still come out from my ASUS Tablet's audio speakers even if I already connected my headphone into the right jack port? Go to Control Panel > Hardware and Sound then access Audio Manager to configure the settings.

My ASUS Tablet cannot do keystrokes correctly because my cursor keeps on moving. what should I do? Make sure that nothing accidentally touches or presses on your touchpad while you type on the keyboard.

You can also disable your touchpad by pressing . You can try doing any of the following suggestions: • Check if ASUS Smart Gesture is set to disable touchpad by connecting an external pointing device to your ASUS Tablet. If yes, disable this function. Instead of showing letters, pressing the "U", "I", and "O" keys on my keyboard displays numbers. how can I change this? Press the key or (on selected models) on your ASUS Tablet to turn off this feature and use the said keys for inputting letters. 12. How do I know that my system is running? Press and hold the power button for about two (2) seconds until the power button's LED indicator blinks five times and the camera LED indicator blinks once. aSUS Tablet and ASUS Mobile Dock E-Manual 95 Software FAQs 1. When I turn on my ASUS Tablet, the power indicator lights up but nothing appears on my screen. What can I do to fix this? You can try doing any of the following suggestions: • Force shutdown your ASUS Tablet by pressing the power button for about ten (10) seconds.

Check if the power adapter and battery pack are inserted correctly then turn on your ASUS Tablet. If the problem still exists, contact your local ASUS service center for assistance. • 2. What should I do when my screen displays this message: "Remove disks or other media. You can try doing any of the following suggestions: • • Remove all connected USB devices then restart your ASUS Tablet. If the problem still exists, your ASUS Tablet might have a memory storage problem. Contact your local ASUS service center for assistance. How can I fix this? Delete the applications you recently installed or were not included with your operating system package then restart your system. How can I fix this? You can try doing any of the following suggestions: • • • Remove all connected devices to your ASUS Tablet then restart your system. press F9 upon startup.

When your ASUS Tablet enters Troubleshooting, select Refresh or Reset your PC. If the problem still exists, contact your local ASUS service center for assistance. 5. Why can't my ASUS Tablet wake up from sleep mode? ☐ • You need to press the power button to resume your last working state. Your system might have completely used up its battery power.

Connect the power adapter to your ASUS Tablet and connect to a power outlet then press the power button. ASUS Tablet and ASUS Mobile Dock E-Manual 97 98 ASUS Tablet and ASUS Mobile Dock E-Manual Appendices ASUS Tablet and ASUS Mobile Dock E-Manual 99 Internal Modem Compliancy The ASUS Tablet with internal modem model complies with JATE (Japan), FCC (US, Canada, Korea, Taiwan), and CTR21. The internal modem has been approved in accordance with Council Decision 98/482/EC for pan-European single terminal connection to the public switched telephone network (PSTN). However due to differences between the individual PSTNs provided in different countries, the approval does not, of itself, give an unconditional assurance of successful operation on every PSTN network termination point. In the event of problems you should contact your equipment supplier in the first instance. Overview On 4th August 1998 the European Council Decision regarding the CTR 21 has been published in the Official Journal of the EC. The CTR 21 applies to all non voice terminal equipment with DTMF-dialling which is intended to be connected to the analogue PSTN (Public Switched Telephone Network). CTR 21 (Common Technical Regulation) for the attachment requirements for connection to the analogue public switched telephone networks of terminal equipment (excluding terminal equipment supporting the voice telephony justified case service) in which network addressing, if provided, is by means of dual tone multi-frequency signalling. 100 ASUS Tablet and ASUS Mobile Dock E-Manual Network Compatibility Declaration Statement to be made by the manufacturer to the Notified Body and the vendor: "This declaration will indicate the networks with which the equipment is designed to work and any notified networks with which the equipment may have interworking difficulties. ☐ Statement to be made by the manufacturer to the user: "This declaration will indicate the networks with which the equipment is designed to work and any notified networks with which the equipment may have inter-working difficulties. The manufacturer shall also associate a statement to make it clear where network compatibility is dependent on physical and software switch settings. It will also advise the user to contact the vendor if it is desired to use the equipment on another network. ☐ Up to now the Notified Body of CETECOM issued several pan-European approvals using CTR 21. The results are Europe's first modems which do not require regulatory approvals in each individual European country. Non-Voice Equipment Answering machines and loud-speaking telephones can be eligible as well as modems, fax machines, auto-dialers and alarm systems.

Equipment in which the end-to-end quality of speech is controlled by regulations (e. ASUS Tablet and ASUS Mobile Dock E-Manual 101 This table shows the countries currently under the CTR21 standard. Country Austria1 Belgium Czech Republic Denmark1 Finland France Germany Greece Hungary Iceland Ireland Italy Israel Lichtenstein Luxemburg The Netherlands1 Norway Poland Portugal Spain Sweden Switzerland United Kingdom Applied Yes Yes No Yes Yes Yes Yes Yes No Yes Yes Yes Yes Still Pending No Yes Yes Yes Yes No No No Yes Yes Yes More Testing No No Not Applicable Yes No No No No Not Applicable No No Still Pending No No No Yes No Not Applicable Not Applicable Not Applicable No No No 102 ASUS Tablet and ASUS Mobile Dock E-Manual This information was copied from CETECOM and is supplied without liability. For updates to this table, you may visit http://www. Html 1 National requirements will apply only if the equipment may use pulse dialling (manufacturers may state in the user guide that the equipment is only intended to support DTMF signalling, which would make any additional testing superfluous). Operation is subject to the following two conditions: • • This device may not cause harmful interference. This device must accept any interference received, including interference that may cause undesired operation. This equipment has been tested and found to comply with the limits for a class B digital device, pursuant to Part 15 of the Federal Communications Commission (FCC) rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures: • • Reorient or relocate the receiving antenna. Increase the separation between the equipment and receiver. ASUS Tablet and ASUS Mobile Dock E-Manual 103 • • Connect the equipment into an outlet on a circuit different from that to which the receiver is connected. Consult the dealer or an experienced radio/TV technician for help.

wARNING! The use of a shielded-type power cord is required in order to meet FCC emission limits and to prevent interference to the nearby radio and television reception. It is essential that only the supplied power cord be used. Use only shielded cables to connect I/O devices to this equipment. You are cautioned that changes or modifications not expressly approved by the party responsible for compliance could void your authority to operate the equipment.) Declaration of Conformity (R&TTE directive 1999/5/EC) The following items were completed and are considered relevant and sufficient: • • • • • • • Essential requirements as in [Article 3] Protection requirements for health and safety as in [Article 3.

1a] Testing for electric safety according to [EN 60950] Protection requirements for electromagnetic compatibility in [Article 3. 1b] Testing for electromagnetic compatibility in [EN 301 489-1] & [EN 301 489-17] Effective use of the radio spectrum as in [Article 3. 2] Radio test suites according to [EN 300 328-2] 104 ASUS Tablet and ASUS Mobile Dock E-Manual FCC Radio Frequency (RF) Exposure Caution Statement WARNING! Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment. □The manufacture declares that this device is limited to Channels 1 through 11 in the 2. 4GHz frequency by specified firmware controlled in the USA. □ This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. To maintain compliance with FCC RF exposure compliance requirements, please avoid direct contact to the transmitting antenna during transmitting. End users must follow the specific operating instructions for satisfying RF exposure compliance. This device operates within a 5. 15-5.

25 GHz frequency range and is restricted for indoor use only. outdoor operation within 5150-5250 MHz is prohibited. RF Exposure Information (SAR) This device meets the government's requirements for exposure to radio waves. This device is designed and manufactured not to exceed the emission limits for exposure to radio ferquency (RF) energy set by the Federal Communications Commission of the U. The exposure standard employs a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit set by the FCC is 1. 6 W/kg. Tests for SAR are conducted using standard operating positions accepted by the FCC with the EUT transmitting at the specified power level in different channels. The highest SAR value for device as reported to the FCC is 0. 66 W/kg when placed next to the body.

The FCC has granted an Equipment Authorization for this device with all reported SAR levels evaluated as in compliance with the FCC RF exposure guidelines. SAR information on this device is on file with the FCC and can be found under the Display Grant section of www. fcc. Gov/eot/ea/fccid after searching on FCC ID: ZQ6AP6234A ASUS Tablet and ASUS Mobile Dock E-Manual 105 CE Marking CE marking for devices without wireless LAN/Bluetooth The shipped version of this device complies with the requirements of the EEC directives 2004/108/EC "Electromagnetic compatibility" and 2006/95/EC "Low voltage directive". CE marking for devices with wireless LAN/ Bluetooth This equipment complies with the requirements of Directive 1999/5/EC of the European Parliament and Commission from 9 March, 1999 governing Radio and Telecommunications Equipment and mutual recognition of conformity.

The highest CE SAR value for the device is 0. 264 W/Kg. This equipment may be operated in: AT EE IT NO BE ES IS PL BG FI LI PT CH FR LT RO CY GB LU SE CZ GR LV SI DE HU MT SK DK IE NL TR 106 ASUS Tablet and ASUS Mobile Dock E-Manual RF Exposure information (SAR) - CE This device meets the EU requirements (1999/519/EC) on the limitation of exposure of the general public to electromagnetic fields by way of health protection. The limits are part of extensive recommendations for the protection of the general public. These recommendations have been developed and checked by independent scientific organizations through regular and thorough evaluations of scientific studies.

The unit of measurement for the European Council's recommended limit for mobile devices is the "Specific Absorption Rate" (SAR), and the SAR limit is 2. 0 W/Kg averaged over 10 gram of body tissue. It meets the requirements of the International Commission on Non-Ionizing Radiation Protection (ICNIRP). For next-to-body operation, this device has been tested and meets the ICNRP exposure guidelines and the European Standard EN 50566 and EN 62209-2. SAR is measured with the device directly contacted to the body while transmitting at the highest certified output power level in all frequency bands of the mobile device. ASUS Tablet and ASUS Mobile Dock E-Manual 107 IC Radiation Exposure Statement for Canada This equipment complies with IC radiation exposure limits set forth for an uncontrolled environment. To maintain compliance with IC RF exposure compliance requirements, please avoid direct contact to the transmitting antenna during transmitting. End users must follow the specific operating instructions for satisfying RF exposure compliance. Operation is subject to the following two conditions: • • This device may not cause interference and This device must accept any interference, including interference that may cause undesired operation of the device. Co-channel Mobile Satellite systems) this device is intended to be operated indoors and away from windows to provide maximum shielding.

Equipment (or its transmit antenna) that is installed outdoors is subject to licensing. This device complies with Industry Canada licence-exempt RSS standard(s). Note that this is not intended to prohibit transmission of control or signaling information or the use of repetitive codes where required by the technology. The device for the band 5150-5250 MHz is only for indoor usage to reduce potential for harmful interference to co-channel mobile satellite systems; the maximum antenna gain permitted (for device in the bands 5250-5350 MHz and 5470-5725 MHz) to comply with the EIRP limit; and the maximum antenna gain permitted (for devices in the band 5275-5850 MHz) to comply with the EIRP limits specified for point-to-point and non point-to-point operation as appropriate, as stated in section A9.

2(3). In addition, high-power radars are allocated as primary users (meaning they have priority) of the band 5250-5350 MHz and this radar could cause interference and/or damage to LE-LAN devices. The Country Code Selection feature is disabled for products marketed in the US/ Canada. For product available in the USA/Canada markets, only channel 1-11 can be operated. Selection of other channels is not possible. ASUS Tablet and ASUS Mobile Dock E-Manual 111 Radio Frequency (RF) Exposure Information The radiated output power of the Wireless Device is below the Industry Canada (IC) radio frequency exposure limits.

The Wireless Device should be used in such a manner such that the potential for human contact during normal operation is minimized. This device has been evaluated for and shown compliant with the IC Specific Absorption Rate ("SAR") limits when operated in portable exposure conditions. 472 GHz Ch01 through CH11 Ch01 through Ch14 Ch01 through Ch13 France Restricted Wireless Frequency Bands Some areas of France have a restricted frequency band. The worst case maximum authorized power indoors are: • • 10mW for the entire 2. 4 GHz band (2400 MHz–2483.

5 MHz) 100mW for frequencies between 2446. 5 MHz and 2483. 5 MHz NOTE: Channels 10 through 13 inclusive operate in the band 2446. There are few possibilities for outdoor use: on private property or on the private property of public persons, use is subject to a preliminary authorization procedure by the Ministry of Defense, with maximum authorized power of 100mW in the 2446. Use outdoors on public property is not permitted.

In the departments listed below, for the entire 2. 4 GHz band: • • Maximum authorized power indoors is 100mW Maximum authorized power outdoors is 10mW ASUS Tablet and ASUS Mobile Dock E-Manual 113 Departments in which the use of the 2400–2483. 5 MHz band is permitted with an EIRP of less than 100mW indoors and less than 10mW outdoors: 01 Ain 05 Hautes Alpes 11 Aude 24 Dordogne 32 Gers 41 Loir et Cher 55 Meuse 60 Oise 64 Pyrénées Atlantique 68 Haut Rhin 75 Paris 88 Vosges 94 Val de Marne This requirement is likely to change over time, allowing you to use your wireless LAN card in more areas within France. Please check with ART for the latest information (www. arcep. Fr) NOTE: Your WLAN Card transmits less than 100mW, but more than 10mW. 02 Aisne 08 Ardennes 12 Aveyron 25 Doubs 36 Indre 45 Loiret 58 Nièvre 61 Orne 66 Pyrénées Orientales 70 Haute Saône 82 Tarn et Garonne 89 Yonne 03 Allier 09 Ariège 16 Charente 26 Drôme 37 Indre et Loire 50 Manche 59 Nord 63 Puy du Dôme 67 Bas Rhin 71 Saône et Loire 84 Vaucluse 90 Territoire de Belfort 114 ASUS Tablet and ASUS Mobile Dock E-Manual UL Safety Notices Required for UL 1459 covering telecommunications (telephone) equipment intended to be electrically connected to a telecommunication network that has an operating voltage to ground that does not exceed 200V peak, 300V peak-to-peak, and 105V rms, and installed or used in accordance with the National Electrical Code (NFPA 70). When using the ASUS Tablet modem, basic safety precautions should always be followed to reduce the risk of fire, electric shock, and injury to persons, including the following: • DO NOT use the ASUS Tablet near water, for example, near a bath tub, wash bowl, kitchen sink or laundry tub, in a wet basement or near a swimming pool. DO NOT use the ASUS Tablet during an electrical storm. There may be a remote risk of electric shock from lightning.

DO NOT use the ASUS Tablet in the vicinity of a gas leak. □ • Required for UL 1642 covering primary (nonrechargeable) and secondary (rechargeable) lithium batteries for use as power sources in products. These batteries contain metallic lithium, or a lithium alloy, or a lithium ion, and may consist of a single electrochemical cell or two or more cells connected in series, parallel, or both, that convert chemical energy into electrical energy by an irreversible or reversible chemical reaction. □ Do not dispose the ASUS Tablet battery pack in a fire, as they may explode. Check with local codes for possible special disposal instructions to reduce the risk of injury to persons due to fire or explosion. Do not use power adapters or batteries from other devices to reduce the risk of injury to persons due to fire or explosion. Use only UL certified power adapters or batteries supplied by the manufacturer or authorized retailers. □ ASUS Tablet and ASUS Mobile Dock E-Manual 115 Power Safety Requirement Products with electrical current ratings up to 6A and weighing more than 3Kg must use approved power cords greater than or equal to: H05VV-F, 3G, 0. TV Notices Note to CATV System Installer—Cable distribution system should be grounded (earthed) in accordance with ANSI/NFPA 70, the National Electrical Code (NEC), in particular Section 820. 93, Grounding of Outer Conductive Shield of a Coaxial Cable – installation should include bonding the screen of the coaxial cable to the earth at the building entrance.
