The unit cannot be used on +24 volt or positive ground systems.

The unit may not operate correctly in extremely hot or cold temperatures. The unit is equipped with a built in self-protection circuit. When the temperature reaches a preset level, the protection circuit halts all unit operations. If this should happen, open a window and allow the car to cool. Condensation Moisture can condense on the laser lens of the CD changer during rainy and humid days, or right after the heater is turned on in the car. If this should happen the unit will not operate correctly. To remedy the situation, remove the magazine from the unit and wait approximately one hour. During this time the moisture will evaporate and the unit will operate normally. Remove the magazine from the unit when it is not being used during hot weather and the CD changer is not used for long periods of time. 2 Introduction Dear Customer, Congratulations on your purchase of the worlds finest brand of car audio products.
