Looking at the back of the box you will see the terminals. The left terminal is negative (-) and the right terminal is positive (+) for each set. The mounting position of your ported enclosure will have a great effect on the sound performance produced. @@@@MOUNTING Mounting or securing the box is a good idea. This will prevent the box from sliding around. @@@@You can mount the box by attaching brackets and fastening it with screws or bolts straight to the frame or other solid piece in the car. You can also use velcro strips. .
