High-Performance, Active 80-Watt Business Environment Speaker System

For way too long, boardrooms, classrooms and restaurants around the world have had to put up with bad sound. You know, the kind generated by those flimsy "tin-cans-mounted-in-ceiling-tiles" (that no one seems to remember ever having installed in the first place). You can kiss "bad sound" goodbye forever thanks to the great-sounding new CE500A loudspeaker systems from BEHRINGER — and they're available in your choice of black or white.

We Mean Business

The CE500A speaker system is ideal for business environments, letting you enjoy full, clear sound over a wide listening area. Specifically designed to complement commercial indoor facilities such as restaurants, shops, exhibition halls and more, CE500As come equipped with special

mounting brackets, allowing them to be mounted on walls or suspended from above. This means you can aim them, which is handy considering people have ears on the sides of their heads, not the top!

More Like Studio Monitors Than "Tin-Cans"

Inside these multi-purpose active loudspeakers are powerful 5 1/2" woofers and high-resolution 1/2" tweeters powered by an internal 80-Watt amplifier. These transducers have been designed to work with the onboard amp seamlessly, meaning there is not too much, or even worse, too little wattage to adequately power the system. And the sound quality of the CE500A puts those aforementioned "tin-cans" to shame.
