energyXT2.5
energyXT2.5 Plus

Digital Audio Workstation

- energyXT2.5
- All you need to create music on your PC or MAC
- Perfect for composers, musicians, DJs, vocalists, and producers of all styles
- Complete "Studio On The Go" – take the fully-portable energyXT2.5 and all your songs with you on the included USB flash drive
- Smart and innovative audio and MIDI sequencer
- Minimal loading time, no need to install. Record your inspiration on the spot of the moment
- Create, save, export and play your own music on the included USB flash drive, on your PC's hard drive or any mobile storage unit
- High-performance 32bit/192kHz full-duplex audio engine with low-latency support, 32 I/O, WAV, AIF, MP3, REOX, and MIDI file formats
- Ultra-flexible Audio/MIDI engine supports time-shifting, automation and MIDI learn functions for sequencer, mixer and plug-ins
- Soft mixer with virtually unlimited channels for audio, MIDI, effects returns and subgroups
- Fully configurable virtual FX/synth rack, ideal for live performances, including guitar and keyboard setups
- Native drum machine and synth/sampler plus full VSTi support
- On-board FX processors for EQ, reverb, chorus and more, with full support for VST effects
- Multi-track export function for importing projects into other DAWs
- Tabbed interface for docking VST plug-in editors
- Intuitive drag-and-drop operation
- Multi-language quick start guide
- VSTi ported – load energyXT2.5 as a VSTi plug-in within any VSTi host software (Windows only)
- Skinnable, streamlined user interface

energyXT2.5 Plus

- ReWire-Enginezler function support – neatly hosts and controls ReWire compatible applications such as Reason or Ableton Live
- 2 GB extra-high speed USB flash drive included

Computer Based Recording / Software

Ultra-Portable Music Production and Recording Software for Windows, Mac and Linux

xtsoftware

Do We Really Need Another Recording Program?

Yes, when it's this unique. In the world of bloated, resource-hungry music production software energyXT2.5 is like a breath of fresh air.

Imagine a digital audio workstation program that opens in mere seconds from a thumb drive that can be transported from computer to computer – even between Windows (including Vista), Mac OS X, and Linux operating systems. energyXT2.5 is a compact, easy to learn and use "Studio On-the-Go." You can take it and your project files to a friend's house, or to a professional recording studio on the included USB drive. You can even multi-track export your recording from energyXT2.5 to all other DAWs.

energyXT2.5 also features its own bevy of synthesizers, including one that functions as a dedicated drum track. With its top-quality sound and speed, energyXT2.5 lets you Create Music Now!

energyXT2.5 – everything you need for digital recording

Transferring music ideas from your soul to an MP3 shouldn't be a Herculean task. And it shouldn't take weeks in the studio and wads of cash to make your tunes a reality. energyXT2.5 allows you to record instruments and vocals directly to your computer via a simple USB interface. You are then free to copy and paste tracks, as well as edit, add effects and mix them to your heart's content, with stunningly professional results. energyXT2.5 makes it easy to take your music from a simple concept to a high-quality, finished masterpiece you can play, share and even upload to your favorite music site.

5 Plus Digital Audio Workstation There is no huge manual to read with energyXT2.5 -- you'll be tracking and mixing in no time flat, thanks to its easy-to-understand interface and simple drag & drop clip manipulation. One thing you'll notice right away is that energyXT2.5 is laid out in beats and measures, just like music. energyXT2.5 gives you the tools to make music, without the hassles and steep learning curve associated with most recording and production software packages. energyXT2.5 is Supremely "Mobile" Of course, depending on your hardware, energyXT2.5 will run on nearly any mobile device including external hard-drives, USB pen drives, SD cards, and so on. You can even copy the complete software program onto your MP3 player or the memory stick of your cell phone, so you can always have energyXT2.

5 with you! energyXT2.5 Even Provides The Instruments You don't even need an instrument to get started, thanks to energyXT2.5's internal synthesizer/sampler and drum machine. These awesome tone generators build keyboard parts, pads, bass lines, and more. You can either step-write synthesizer parts or use an external MIDI instrument for real-time recording -- and opt to use the onboard sounds or import your own. If you have a DAW controller at your disposal, you can use it to control virtual instrument tracks, as well as many of energyXT2.5's mixer functions. And recording live instruments with energyXT2.5 is a breeze; just plug a guitar or microphone into a USB-equipped mixer and lay down tracks to your heart's content. @@@@Try to find that kind of versatility on a hardware-style mixer! @@@@You can even run the sequencers as two turntables! @@@@The possibilities are virtually endless! @@You can layer and VST plug-ins.

@@@@@Modular Environment energyXT2.5 offers a modular design feature. @@@@Built-in Arpeggiator The drum track feature in energyXT2.5 works just like a built-in drum sampler. The drum editor looks like a real drum machine and samples can be dragged and dropped right into it for quick drum set construction. The resulting drumsets can even be saved as presets. To create a new drum track, simply drag a drum set or a WAV file into the sequencer, and the track is created for you automatically. Want to make a drum loop library? Just right-click any drum part in your project and save it as a single file for use in future projects.

Most settings in the main mixer can be automated from the sequencer, including volume, pan, mute, EQ and effect parameters. There is no limit to how many insert and send effects you can use in a project, except for your CPU.

Group channels are available for sub mixing. These channels can be automated just like normal mixer channels, and will support insert and send effects as well. The mixer is dockable, and presets for different mixer views can be customized. Browser VST plug-ins, samples and presets can be dragged into the sequencer tracks and mixer effect slots. An outstanding feature in energyXT2.

5 is the Arpeggiator, which steps through the sequence of notes you have played on your MIDI keyboard (or are playing back from a MIDI track), and plays them back in sync with the tempo of the song. Arpeggios work great for everything Continued on next page energyXT2.5 energyXT2.5 Plus Digital Audio Workstation from basslines to chords and background melody lines, and are often played live from a MIDI keyboard. And the Random and Swing functions can be employed, giving these arpeggiated parts a more unique, "human" feel.

The Arpeggiator is available on MIDI tracks in the sequencer, as well as a Classic Arp component in the Modular view. energyXT2.5 also works with loops Page 5 of 6 changed, and can create some very interesting grooves. · Stretch the playback is locked to tempo, just like in Re-pitch mode, but the pitch of the sample will not change when tempo is changed. In addition, you have coarse and fine-tune for pitch-shifting the audio clips without changing the playback information in measures and beats. Create your own color scheme or check out the energyXT community at <http://www.energy-xt.com/community.php>, which offers a tremendous variety of skins from other users. The user's forum is also an excellent place to share your discoveries, and to suggest new features you'd like to see incorporated into energyXT.

Post your music, skins, samples, projects and mp3's. You never know what might happen--you could become our next "Featured Artist." energyXT2.5 provides serious tools for serious artists, giving you the power to Create Music Now! @@@@The information in this document is subject to change without notice and does not represent a commitment on the part of XT Software AS.
