BlackBerry Wireless Headset HS-300

Getting started
Components

Pairing the headset
Pair and connect the headset with your BlackBerry device

Before you can use your headset, you need to pair it with your BlackBerry® device. When you turn on the headset for the first time, it's already in pairing mode.

- Slide the power switch on your headset to the **On** position.
- On the Home screen of your BlackBerry device, click the **Manage Connections** icon > **Set Up Bluetooth or Bluetooth Connections** > **Search**.
- Click **BlackBerry HS-300**.
- If you receive a prompt to enter a passkey, type **0000** on your BlackBerry device.
- Press the key on the keyboard.

When you've successfully completed the pairing process, you hear "Connected" through the headset. If you are disconnected, you can press and hold the Call control button for 3-4 seconds to turn on pairing mode at any time.

To turn off the prompt that appears on your BlackBerry device when connecting and pairing, press the **Menu** key > **Device Properties** and set the **Trusted** field to **Yes**. For more information, click the **Help** icon on the Home screen of your BlackBerry device.

For information about how to pair a third-party Bluetooth® enabled device with your headset, see the help that came with that device.

Using the headset
Call tasks

You can complete the following call tasks when your headset is paired and connected with your device.

Action	Call control button
