BlackBerry Wireless Headset HS-700

Getting started

Drive safely!
Thank you for purchasing an original BlackBerry® accessory. Before you use your BlackBerry accessory, please read the *Safety and Product Information* booklet that is located at www.blackberry.com/go/accessories.

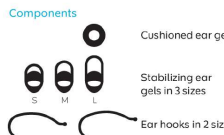

WARNING: Driving a vehicle requires your full attention to road conditions, weather, and vehicular traffic. It is important to set up your headset prior to driving. Using this hands-free accessory may cause you to be distracted and may put you, your passengers, and occupants of other vehicles at risk of suffering bodily injury, death and/or loss of property. You should only use the hands-free accessory where permitted by law and when you will not be distracted from the proper operation of your motor vehicle.

About the headset
Welcome to the BlackBerry® Wireless Headset HS-700. The headset is designed to give you ultimate hands-free calling convenience. Great sound quality is just the beginning. The headset allows you to control most features with simple voice commands that allow you to keep your

hands on the steering wheel when you drive. Manage incoming calls by simply saying "Answer" or "Ignore." If you want to reconnect with the last person who called you, say "Call last" and if you want to block out background noise while you're on a conference call, say "Mute".

When you use the headset with GPS mapping apps, you can hear turn-by-turn directions without disturbing the passengers in your vehicle. When you enter the noisy highway, the headset can adjust the volume with the automatic volume control feature. The headset announces who's calling, and when it needs charging, it is designed to tell you by announcing the battery power level.

Components

Change the ear piece

1. If necessary, gently pull the ear hook to remove it.
2. Gently pull off the ear gel at its edges.
3. Replace the ear gel with a new ear gel.
