BLAUPUNKT

Manual abstract:

16 Displaying the time continuously when the unit is off and the ignition is on 16 Briefly displaying the time when the unit is switched off . We hope you enjoy using this new piece of equipment. Before using the device for the first time, please read these instructions carefully. The Blaupunkt editors are constantly working on making the operating instructions clearer and easier to understand. However, if you still have any questions on how to operate the unit please contact your dealer or the telephone hotline for your country. You will find the hotline telephone numbers printed at the back of this booklet. You can conveniently access the most important functions of your car radio from the steering wheel via the optional RC08 or RC10. You cannot switch the device on/off using the remote control. amplifier All Blaupunkt and Velocity amplifiers can be used. CD changer You can connect the following Blaupunkt CD changers: CDC A 08, IDC A 09 and CDC A03.

Only operate your car radio if the road and traffic conditions allow you to do so. Familiarise yourself with the unit before setting off on your journey. @@@@@@@@If you want to install your car radio yourself, please read the installation and connection instructions that follow these operating instructions. As a way of protecting your equipment against theft, the unit is equipped with a detachable control panel (release panel). without this control panel , the car radio is worthless to a thief.

Protect your equipment against theft by taking the control panel with you every time you leave your vehicle. Do not leave the control panel in your vehicle not even in a hidden place. Never expose the control panel to direct sunlight or other heat sources. Avoid making direct skin contact with the control panel's contacts. If necessary, clean the contacts with a lint-free cloth and some alcohol.

First, pull the control panel straight off the unit and then out towards the left. The unit switches off after the control panel is detached. all the current settings are saved. Any CD already inserted in the unit remains there. Slide the control panel from left to right into the unit's guide. Press the left-hand edge of the control panel into the unit until it clicks into place. Note: When attaching the control panel, make sure you do not press the display. If the device was still switched on when you detached the control panel, it will automatically switch on again with the last settings activated (i. There are various ways of switching the unit on/off: Switching on/off using the vehicle ignition If the unit is correctly connected to the vehicle's ignition and it was not switched off using ON/OFF button 1, it will switch on/off simultaneously with the ignition. Switching on/off using button 1 To switch the unit on, press button 1.

To switch the unit off, press button 1 for longer than two seconds. the unit switches off. Note: If you switch on the unit when the ignition is off, the unit will switch off automatically after one hour to prevent draining of the vehicle battery. Switching on by inserting a CD If the unit is switched off and there is no CD inserted in the drive, gently insert the CD with the printed side uppermost into the drive until you feel some resistance. the CD will be drawn automatically into the drive. You must not hinder or assist the drive as it draws in the CD. Note: The unit will remain off if the ignition is off. The volume can be adjusted in steps from 0 (mute) to 66 (maximum). This feature allows you to instantaneously reduce (mute) the volume to a level preset by you. Setting the mute level You can set the unit's mute volume level.

@@To help you adjusting the volume more easily, the audible volume level will increase or decrease accordingly as you make your changes. If you select "LAST VOL", the volume played before the unit was last switched off will be reactivated. If your unit is connected to a mobile telephone, the car radio's volume will be muted as soon as you "pick up" the telephone. "PHONE" shows in the display. This requires the mobile telephone be connected to the car radio as described in the installation instructions.

If the volume was higher before the unit was switched off and "LAST VOL" has been selected, the volume will be set at "38" the next time the radio is switched on. @@For some functions you will hear a confirmation beep if you keep a button pressed for longer than two seconds. For instance, after storing a radio station to a station button you will hear a confirmation beep. Use the or buttons 8 to switch between the options. "OFF" means beep off, "ON" means the beep is switched on.

@@@@@@@@@ "TUNER" is displayed. @@@@"SENS LO" means it is set to the lower sensitivity setting. set the required sensitivity using the or buttons 8. When you have finished making your changes, press the MENU button 7. @@@@@@Six stations can be stored in each memory bank. @@There are various ways of tuning into a station. automatic seek tuning Press the or button 8. The unit tunes into the next receivable station. @@@@@@@@@@@@@@@@Select the memory bank in which the station was stored. @@@@You can choose to continuous display one of the followings: Band and Time Band and Frequency Keep the DIS button : pressed until the required display appears.

You can use this unit to play standard CDs, CD-Rs and CD-RWs with a diameter of either 5 or 3 inches. To ensure the system functions properly, only use CDs labelled with the compact disc logo.
