Manual abstract:

We hope you enjoy using this new piece of equipment. However, if you still have any questions on how to operate the equipment, please contact your dealer or the telephone hotline for your country. We provide a manufacturer guarantee for our products bought within the European Union. You can view the guarantee conditions at [www. blaupunkt. De](http://www.blaupunkt.de) or ask for them directly at: **Blaupunkt GmbH Hotline Robert-Bosch-Str. - Make sure you do not damage vehicle components when drilling any holes. 5 mm2.** The mounting surface must be suitable for the screws provided, and must provide firm support (see page 19, Fig. 1).

Fit a fuse in the amplifier power line no more than 30 cm from the vehicle battery, in order to protect the battery in the event of a short-circuit between it and the power amplifier. the polarity of the connections , + or - , must be observed. Check your tuning of the ODSb 8000A with the bass control fully turned up and, if necessary, with the loudness turned on. Overamplification of the ACITVE WOOFER BOX caused by too high sensitivity setting 1 leads to distorted reproduction and can irreparably damage the loudspeaker. Before using the equipment, we recommend you set the controls to the following positions: Gain, position 1 at minimum; Phase, position 2 at 0°; Crossover, position 3 at 80 Hz. Turn on the system and select a music track from a CD or cassette that contains powerful bass. Turn up your stereo's volume to the required listening level. Next, using the Crossover control 3, select a crossover frequency that produces a well-balanced bass sound. This information is subject to change without notice! .
