INTRODUCTION NAVIGATION RADIO MODE CD MODE CD CHANGER SETUP INDEX 4 Dear Customer, Congratulations on buying the TravelPilot. You can rest assured that you have made the right choice by buying the TravelPilot. @@However, it offers a whole lot more! @@@@@@If you have any further questions or comments regarding the TravelPilot, please do not hesitate to call our telephone hotline or contact your dealer. The international telephone hotline numbers are printed on the last page of these instructions. Guarantee The scope of the guarantee depends on the regulations in force within the country in which the unit was purchased.

If your unit develops a fault, please contact your dealer and present the purchase receipt. If the statutory guarantee period in your country is less than 12 months, Blaupunkt will grant a 12-month manufacturer's guarantee. This guarantee does not cover damage due to wear, incorrect usage or commercial use. If you wish to enforce a claim under the manufacturer's guarantee that is provided by Blaupunkt, please send the faulty unit together with the purchase receipt to the Blaupunkt customer service centre in your country. You can find out which address is closest to you by contacting the telephone hotline listed on the back page of this booklet. Blaupunkt retains the right to rectify defects or supply a replacement. Notice regarding liability Despite constant technical developments, the navigation system may in certain cases provide incorrect or unoptimised navigation due to improper operation, changes to the traffic flow regulation, construction sites, traffic load, errors or missing information on the navigation data media or general computer and positioning errors. Blaupunkt does not accept liability and does not provide compensation for any damages or other drawbacks arising from this. Overview of navigation functions NAVIGATION ROUTE GUIDANCE DEST. ENTRY DEST.

MEMORY TOURLIST TRAVEL GUIDE Press the NAV key once in order to switch from the radio or CD-changer (optional) audio sources to the navigation system's main menu or back to navigation (if a navigation session is already active). Use the right knob/pushbutton to select the DEST. ENTRY menu item and press the right knob/pushbutton. CITY/PLACE H_ HANNOVER A E _I L U Y H O Use the right knob/pushbutton to select the letters of the town you require. An appropriate entry will be displayed in the match line as you enter more and more letters. In the majority of cases, only a few letters will be required in order to enter the town that you are looking for. If you have already used the navigation system and the first letters of the new destination town are identical to that of a previous destination town (in this case HANNOVER), the town will be displayed in the match line (Last City History Function). This feature helps speed up entering destinations that you have visited before. If a DX navigation CD is inserted, letters that cannot logically follow a letter you have just entered will be hidden from view (the speller thins out). Use the right knob/pushbutton to select the CITY menu item and press the right knob/pushbutton. INTRODUCTION NAVIGATION RADIO MODE CD MODE CD CHANGER SETUP INDEX 5 DEUTSCH DEST. ENTRY CITY STREET CENTRE P.O.I. DEUTSCH DEUTSCH If the name of the town you are looking for appears in the name match line, keep the right knob/pushbutton pressed for longer than two seconds.

You can also switch to the list if the name of a town that comes alphabetically before the town you require appears in the list. ENGLISH INTRODUCTION NAVIGATION RADIO MODE CD MODE CD CHANGER SETUP INDEX 6 CITY/PLACE BERLIN BERLIN, NEUENH... BERLIN, RÜDERS. .. BERLIN, SCHÖNE... BERLIN, SCHÖNE... If you press the right knob/pushbutton for longer than two seconds after entering the destination, the list of destination towns appears. Use the right knob/pushbutton to move the selection marker to the name of the town you require.

Once the selection marker is positioned over the name of the required town, press the right knob/pushbutton. DEST. ENTRY STREET CENTRE DEST. SURROUND SCHLOSSWEND... 03h58 461 mi Europe 1 In the following selection, choose between STREET, CENTRE or destinations in the DEST. SURROUND area. Streets can only be selected if the data are available on the navigation CD that is being used. Menu items that cannot be selected are marked with a lock.

If you selected STREET, you can subsequently also enter junctions or house numbers. Enter the name in the same way as you did for CITY. Select CENTRE if you want to be guided directly to the centre of a town district. Once you have finished entering your destination, navigation begins automatically. Navigation begins.

The visual driving recommendations appear in the left of the display. In the centre you will see a display that provides a symbolic representation of the distance to the next decision point (e.g. a crossing). On the right you will see information on the current time, arrival time or remaining journey time as well as details on the set audio source, i.

e. radio, CD changer (optional) or internal CD drive (only available with NO-MAP navigation). During active navigation you can control the audio functions as usual using the rocker switch. You can switch to audio mode at any time using the TU and CD-C source buttons. Navigation will then be continued with voice output only. To display navigation mode again, press the NAV button. Safety information The TravelPilot has been designed for use in passenger cars. Special information such as height restrictions or maximum permitted road load, which is required for navigating trucks and buses, is not included on the navigation CDs. Inserting / removing a CD · · · For safety reasons, you should only insert or remove a CD when the vehicle is stationary. Only open the control panel to insert / remove a CD.

After inserting / removing a CD, close the control panel immediately to ensure that the unit is ready for operation before setting off on your journey. Operating whilst driving If you do not pay attention to the road and traffic situation, you could cause serious accidents.

· · · · Familiarise yourself with the TravelPilot and its controls before setting off on your journey. Stop your vehicle at a suitable location if you wish to re-programme the TravelPilot. Operate the TravelPilot whilst driving only if the road and traffic situation allow you to do so. Only enter a destination whilst the vehicle is stationary.

In order to avoid being distracted by the TravelPilot, please observe the following:

Manually sett your personal requirements. JUMP FM1 FM2 MW Functions menu The following menus are available in navigation mode: - Switching between the main menu and functions menu To switching between the main menu and functions menu of an audio source, 1 press the corresponding TU A or CD-C ? source button again. 12 Switching between the navigation system's main menu and navigation menu If you want to switch between the main menu and the navigyou do not press a button within 30 seconds, the display will switch back automatically to the initial menu (timeout). FM TONE BASS TREBLE BALANCE FADER LOUDNESS + + + If you wish to apply your adjusted values, FM TONE BASS TREBLE BALANCE FADER LOUDNESS Audio menu for the FM radio audio source + + + If you switch on a coded unit after having disconnected it from the battery power supply (for instance, after having carried out a repair to the vehicle), a query will appear requesting that you enter the code. To enter the code number, proceed as follows: 1 2 3 4 5 5 6 use the right knob/pushbutton ; to highlight the first digit of the code, press the right knob/pushbutton ;.

The code input cursor jumps one position to the right. Now select the second digit in the code and confirm your choice using the right knob/pushbutton ;. Enter the remaining digits of the code in the same way. highlight the symbol and press the right knob/pushbutton ; or Code request 0 0123456789 If you entered a wrong digit by mistake, press the ESC button 9. highlight the symbol and confirm your choice using the right knob/ pushbutton ;.

Once you have finished entering the whole code number, INTRODUCTION NAVIGATION RADIO MODE CD MODE CD CHANGER SETUP INDEX 15 DEUTSCH The unit switches on. If you inadvertently entered and confirmed the wrong code, you can repeat the code entry procedure. To prevent thieves from finding out the code number by trial and error, the unit will be locked for one hour if the code is entered incorrectly three times. The unit must remain switched on for one hour before you can try entering the code again. If the unit is disconnected from the power supply during this waiting period, the countdown will be reset and the waiting period will be set to one hour again. DEUTSCH DEUTSCH ENGLISH Switching a coded unit on after disconnection from the battery power supply CODE INTRODUCTION NAVIGATION RADIO MODE CD MODE CD CHANGER SETUP INDEX 16 Navigation The navigation system in the TravelPilot helps you find your way to destinations quickly and safely without first having to spend time studying a roadmap. When navigation is active, you will be guided by the voice output. The system will warn you in good time about approaching turning-off points. In addition, the display contains visual driving recommendations, the distance to the destination, the estimated remaining driving time / arrival time or the current clock time. Road safety has absolute priority.

Please be aware that the current way in which traffic is being directed always has priority over the driving recommendations made by the navigation system. How navigation works The current vehicle position is determined with the aid of the electronic odometer, the gyro and a signal transmitted by GPS (Global Positioning System) satellites. The navigation system compares the data with the map stored on the navigation CD and uses this information to calculate your position and the routes used for navigation. Inserting the navigation CD 1 2 3 Press the button 1 to open the control panel. Press the eject button B to remove a CD that may already be in the unit. Carefully insert the CD with the printed side uppermost into the unit's CD compartment. Push the CD until you feel some resistance. From this point onwards the CD will be drawn in automatically. 18 Note: The process of loading the software from the navigation CD must not be interrupted. Starting navigation 1 Press the NAV button < whilst the unit is switched on.

The main navigation menu opens. If a navigation session is already active, the navigation display will appear. Main navigation menu Before navigation can begin, a DX navigation CD must first be inserted in the unit and a destination selected. Entering a destination DEUTSCH CD CHANGER SETUP INDEX 17 The destination can be entered from the destination memory or by entering a town, a town centre, a road, a junction or house number, or by selecting a special destination (e.g.

motorway junction, train station, etc.). 1 2 Use the right knob/pushbutton ; to select the DEST. ENTRY menu item. Confirm your selection with the right knob/pushbutton ;.

Destinations The following destinations are allowed: · · · a road, a junction where two or more roads intersect, a house or housing block. INTRODUCTION NAVIGATION RADIO MODE CD MODE DEUTSCH · the town centre or centre of a district in cities, DEUTSCH ENGLISH The software is loaded from the CD. The progress is indicated in the display. NAVIGATION ROUTE GUIDANCE DEST. ENTRY DEST. MEMORY TOURLIST TRAVEL GUIDE INTRODUCTION NAVIGATION RADIO MODE CD MODE CD CHANGER SETUP INDEX 18 · Previously saved special destinations such as train stations, airports, petrol stations and other public facilities. You can view a sorted list of special destinations for the destination town, the area around a destination, on a national level or in the vicinity of the vehicle position. Position markers that you have set and which have been stored in the destination memory. This is useful if you notice an interesting location during your journey, like a shop or restaurant, and want to be guided back to that point at some other time. Destinations from the destination memory.

Destinations from the tour list. · · · Entering destinations using the speller The speller is used to enter items such as town and road names in the navigation system. The speller consists of five areas: 1 2 3 4 5 the list of characters including all letters, the space character, special characters and numbers, the control symbols, the input line, the match line, and the magnifier within which the currently highlighted character is displayed in an enlarged fashion. CITY/PLACE _ 3 4 N 5 2 ABCDEFGHIJKLMNO 1 PQRSTUVWXYZ ÄÖÜ Speller Selecting letters If you want to enter a name using the speller, proceed as follows: 1 Use the right knob/pushbutton ; to move the selection marker to the required character. When you move the selection marker, the currently highlighted character is displayed in an enlarged fashion within the magnifier. 2 The character will be entered into the input line. An appropriate entry from the list will be displayed in the match line as you enter more and more characters. TIP: If you have already used the navigation system before for navigation and the first letters of the new destination town are identical to those of a previous destination town (in this case Hannover), the town will be displayed in the match line. This feature helps you quickly enter destinations in towns that you have visited already. H_ HANNOVER A E _I L U Y H O If you want to accept the town name, press the right knob/pushbutton ; for longer than two seconds.

If, however, you want to enter another town name, simply continue entering characters. TIP: The "thinning out" speller feature is available for navigation CDs that are labelled with a "DX". The thinning out speller feature ensures that letters, which cannot logically follow a letter that you have just entered, will be hidden from view. Switching to special character sets If, when entering a town name, you need to use other special characters that are not shown in the display (e.g.

Ä, Ö, Ü), 1 2 use the right knob/pushbutton ; to move the selection marker to the control symbol. Press the right knob/pushbutton ;. Every time you press the right knob/pushbutton, other special characters will be displayed in the speller. TIP: When using navigation CDs labelled with a "DX", special characters are switched on automatically. INTRODUCTION NAVIGATION RADIO MODE CD MODE CD CHANGER SETUP INDEX 34 Changing the audio source You can change the audio source at any time during navigation. 1 Press the TU A or CD-C ? button during an active navigation session. The main menu for radio mode or CD changer mode opens. CD changer mode is only available if a CD changer is connected and operational. It is not possible to play a CD in the internal CD drive during a navigation session.
Now, for instance, you can select another station or another track. press the NAV button <. 2 3 If you want to switch back to the navigation session display, Cancelling navigation To cancel an active navigation session, 1 1 1 press the ESC button 9 or enter a new destination or switch to position tracking mode (see "Position tracking mode" in this chapter). If you pressed the ESC button 9, the system asks you to confirm your choice. select YES and press the right knob/pushbutton ;.
TIP: If you switch the unit off whilst navigation is active, the data for that navigation session will be stored for 30 minutes. You can continue navigation at any time within this time period (e.g. after stopping for petrol). Note: If you remove the navigation CD during a navigation session, NO MAP navigation will be activated.
NAVIGATION DO YOU WANT TO INTERRUPT ROUTE GUIDANCE? YES NO Confirmation request before cancelling navigation If you are sure you want to cancel navigation, 4 5 Dynamic navigation During dynamic navigation, the TravelPilot analyses digital traffic information messages and uses this information when planning the route. The traffic messages are received from TMC (Traffic Message Channel) stations. These are RDS stations which also broadcast their traffic messages in digital form (for further information, read the section entitled "TMC" in the "Radio mode" chapter). Before you can use dynamic navigation, you must first select the DYN. option for the ROUTE menu item. The ROUTE menu item can be found under the ROUTE OPTION menu item in the navi menu. The route option settings are kept until they are changed again. If you want to make a currently active navigation session dynamic, 1 2 3 4 5 6 7 press the MEN button : during the navigation session. The navigation session's navi menu appears. Select ROUTE OPTION.

Press the right knob/pushbutton ;. Highlight the ROUTE menu item. Keep pressing the right knob/pushbutton ; until DYN. appears in the display. Highlight the CONTINUE menu item. Press the right knob/pushbutton ;. The unit switches back to navigation, and the settings are kept until they are changed again.

Note: When in dynamic navigation mode, the TravelPilot automatically sets a TMC station during navigation. If there is no TMC station stored in the FMC memory yet, TMC seek tuning begins. TMC seek tuning can take a long time because the entire frequency range is scanned for TMC stations.

Radio mode is not available during this time. INTRODUCTION NAVIGATION RADIO MODE CD MODE ROUTE OPTION ROUTE DYN. CONTINUE CD CHANGER SETUP INDEX 35 DEUTSCH DEUTSCH DEUTSCH NAVI. Navigation begins. TIP: The tour can be started from any destination in the tour list. INTRODUCTION NAVIGATION RADIO MODE CD MODE CD CHANGER SETUP INDEX 39 DEUTSCH DEUTSCH DEUTSCH ENGLISH To delete a whole tour, INTRODUCTION NAVIGATION RADIO MODE CD MODE CD CHANGER SETUP INDEX 40 NO MAP navigation NO MAP navigation begins if you remove the navigation CD after having entered the destination and started the navigation session. TIP: During a NO MAP navigation session you can use the internal CD drive to play an audio CD. If a NO MAP navigation session is active, NO MAP appears in the title line and the distance to the destination as the crow flies is displayed in the symbol area on the right. Furthermore, the direction to the destination is displayed continuously. Due to technical reasons, after re-inserting the navigation CD, it can take several minutes before the audio and visual navigation features are correctly resumed. The system needs this time to precisely determine the current vehicle position. The "OFF ROAD" status may be active for a longer period during this time. In very built-up areas with a dense road network, position tracking errors may occur until the system has been able to precisely and correctly orient itself.

Note: For this reason try, if possible, to insert the navigation CD whilst still on the motorway (for instance) so that this orientation process is speeded up. Travel guide If you are using a navigation CD that includes a travel guide, you can look up travel information on particular destinations and select destinations for your navigation sessions. The information is usually stored in categories. These categories can include: Accommodation Food and drink Tourist information Entertainment - Historical buildings Since the stored information depends on the travel guide on your CD, we cannot provide any detailed description of the contents here. If only one travel guide is present, the name of the guide, e.

g. MERIANscout, appears in the main navigation menu. 1 2 3 4 1 Open the TRAVEL GUIDE item or the name of the travel guide in the main navigation menu. If more than one travel guide is present on the CD, a selection menu will first open so that you can choose a travel guide. Select a travel guide.

It is possible that you may have to use the speller to enter the name of a town that you want information on in the PLACE SELECTION menu item. If you want to start a navigation session to drive to one of the entries, keep the right knob/pushbutton ; pressed for longer than two seconds. Another selection menu is displayed. Select the ROUTE GUIDANCE entry. Displaying the route list You can display the route list that was calculated by the navigation system. 1 2 Press the MEN button : during a navigation session. Select the ROUTE LIST menu item from the navi menu. The calculated route list is displayed. ROUTE LIST O.1mi ASTERNST.

The main navigation menu appears. @@@@@@The main menu opens in radio mode. @@@@@@@@As soon as a station is detected, its name appears in the display. @@@@Press the MEN button :. @@You can choose between the VAR, FIX and OFF options.

The default setting is VAR. @@FIX: RDS radio mode is activated. Since some stations not only use RDS to broadcast their names but also advertising, you have the option of keeping the station name permanently in the display. Changing display contents, e.g. advertising, will not be displayed. VAR: Default setting; RDS radio mode is fully activated. Changing display contents, e.g. advertising, will also be displayed. OFF: RDS radio mode is deactivated. Stations can be tuned into using the frequency details in the display. The "alternative frequency" function is also deactivated. SEARCH >> ON REG PTY ON OFF SHARX RDS VAR OFF R-TXT Activating / deactivating RDS-REG A further advantage provided by RDS is the "alternative frequency" function. The unit constantly tunes into the frequency offering the best reception for a particular station. However, some stations divide their content at certain times into regional programmes that are tailored to a certain region. The "alternative frequency" feature may therefore sometimes interrupt reception of a regional programme because it has automatically switched frequency. If you are listening to a regional programme and want to prevent the unit from switching to another frequency, select the ON setting for the REG item in the radio mode menu. The unit will then only retune if it appears that a "loss of reception" is about to occur, i.e.

if the station can no longer be received on the tuned frequency.
