..... 71 8 Safety notes Safety notes For your personal benefit, please carefully read the following safety notes and warnings before operating your Lucca for the first time. Safety Notes for Navigation Caution: Do not operate the Lucca while driving to protect yourself and others against accidents! View the display only if you are in a safe travel situation! The street routing and traffic signs have priority over the instructions of the navigation system. Follow the instruction of the Lucca only if circumstances and traffic regulations allow! Lucca will bring you to your destination even if you have to deviate from the planned route. Notes: · Routes are best planned before starting your trip. If you want to enter a new route while on the road, please head for the next parking or rest area! · If you did not understand the voice information or if you are not sure what to do at the next intersection, use the map or arrow display for quick orientation.

Safety Notes for Handling the Lucca Caution: Protect the device against moisture since it is not waterproof and not splashproof. Notes: · Remove the power supply connector of the Lucca if you switch off 9 Safety notes the engine since the GPS receiver constantly uses electricity and could discharge the vehicle battery. Do not unplug the connector by pulling on the wire. The wire could be damaged! Do not use harsh solvents to clean the device; use only a damp, lintfree cloth. Initial Startup Initial Startup of Lucca If you are starting up the Lucca for the first time, you must set your preferred language for the menus and the voice output. Note: Upon purchasing the Lucca the battery maybe empty. Please charge the battery before using the device. When starting up the Lucca for the first time please allow the unit a few minutes to enter navigation mode. · · Lucca Scope of Delivery The scope of delivery contains the following components: · · · Lucca Unit Suction Cup Connector charger for connecting to cigarette lighter (Cigar Plug) User's Manual (short version) 10 Initial Startup Power on/off · CD/DVD with european road map and operating instructions (long versions) Power On/Off The Power button allows for turning the Lucca on or off. In its delivery state, the Lucca is switched off.

Press the Power button on the bottom left-hand corner of the Lucca for longer than three seconds. Optional Accessories: · · · · · Carrying Case DC Adapter USB Cable Second car kit VAN/SUV Suction Cup Holder for air vent opening Protective Films and Covers Prior to the initial use, remove the protective films from the display and front of the housing. Before inserting an SD card, please remove the dummy card.

<http://yourpdfguides.com/dref/2736562>

To protect the contacts, you can apply the elastic cover and dummy card again after using the Lucca. 11 Setting the Language Charging the Battery Setting the Language If the Lucca is switched on for the first time, US English is used as the standard language.

If necessary, you may have to set the desired language for the menus and the voice output: Turn on the Lucca using the Power button. A dialogue menu displays. In this menu you can select your preferred language. Please follow the instructions. The language is loaded and the main menu is displayed. Charging the Battery The rechargeable battery allows for operating the Lucca battery-operated without the external power supply. The charge indicator of the battery is located in the top center of the screen. The symbols have the following meaning: : The device is supplied by an external power source. The battery is fully charged. : The device is supplied by an external power source. The battery is being charged. : The device is supplied by its internal battery. The charge state of the battery is sufficient. : The device is supplied by its internal battery. The charge state of the battery is low.

The number of dark block segments on the battery indicates the charge 12 Charging the Battery state of the battery (0 to 3 segments). Note: If the charge state of the battery is very low, a warning message is displayed. To charge the battery, attach the supplier all entries using your finger. Only capital letters can be entered. You do not have to enter any special characters or umlauts when entering city or street names. The Lucca completes these characters automatically. Entering Blank Spaces To enter a blank space, touch the button. Deleting Characters To delete the last character, touch the button. 17 Operating the Navigation Menus Switching between Number, Umlaut and Character Input To enter numbers, such as postcode, button touch the To return to the character entry mode, tofrom the planned route. Starting the Navigation Power on the device using the Power button.

In the start screen, touch the Navigation button. The Navigation menu displays. 21 Navigation The Navigation menu allows access to all the functions of the navigation. [TRAVELPILOT LUCCA 3.3 user guide](http://yourpdfguides.com/dref/2736562)

<http://yourpdfguides.com/dref/2736562>

Touch the Home button. The route calculation is performed and the navigation starts.

39 Navigation Note: The route type used for the route calculation is automatically selected from the setting which you defined in the Routing options menu.

Managing Destinations Managing Destinations Two lists are available in which individual destinations are saved: · In the Favourites · In the Last destinations list Each destination you specify and the destinations from the Last destinations list can be saved in the Favourites. This is particularly useful if you want to approach this destination repeatedly. Destinations from the Favourites can be renamed. You can delete individual destinations from both lists. Saving Destinations Prerequisite: · You specified a destination as described in the chapter "Entering a Destination". Touch the More button. Touch Save. 40

Managing Destinations A menu for entering a name is displayed. Enter a name for the destination.

Touch the OK button. The destination is saved in the Favourites. Saving one of the Recent Destinations Prerequisite: · You opened the Last destinations list as described in the chapter "Copying one of the Recent Destinations". Select the destination which you want to save in the Favourites. Touch the More button.

Touch Save under favourites. A menu for entering a name is displayed. Enter a name for the destination. Touch the OK button. The destination is saved in the Favourites.

Renaming a Destination Open the Favourites menu as described in the chapter "Copying the Destination from the Favourites". Select the destination to be renamed. 41 Managing Destinations Touch the More button. Touch Rename entry. A menu for entering a name is displayed. Enter a new name for the destination. Touch the OK button. The destination is renamed. Deleting a Destination Prerequisite: · You opened the Favourites as described in the chapter "Copying the Destination from the Favourites" - or · you opened the Last destinations list as described in the chapter "Copying one of the Recent Destinations". Select the destination to be deleted from the list.

Touch the More button. Touch Delete entry. A confirmation menu is displayed. Touch OK to delete the destination. The destination is deleted from the list. Deleting the Complete List Prerequisite: · You opened the Favourites as described in the chapter "Copying the Destination from the Favourites" - or · you opened the Last destinations list as described in the chapter "Copying one of the Recent Destinations". Touch the More button. 42 Managing Destinations Touch Delete all. A confirmation is displayed. Route Planning Route Planning with Stages You can also perform the route planning without GPS receiver, e. g. in the comfort of your home. Defined routes can be saved for reuse so that you can plan any number of routes, e.g. for your vacation. Touch OK to delete the list - or not to delete the list. touch Entering Destination Points A route is planned as follows: In the Navigation menu, touch the More button. Touch Itinerary. The Itinerary menu displays. Touch the Add button to define the first route point.

43 Route Planning The Destination entry menu displays. Define the route point similar to the destination entry. For more information, see the chapter "Entering a Destination". Touch the Add button. The Itinerary menu displays. The defined destination is listed as route point 1. saved and used for navigation at a later time. You can insert additional route points in the routes at any time, change the order of route points or display the route on the map. The Itinerary menu provides various buttons for this purpose: Touch the route point you want to select. If the list features more than 3 entries, use the following buttons: Touch the button to scroll up the list by one page (3 elements).

Touch the button to scroll down the list by one page (3 elements). To scroll up or down the list by several pages, touch the corresponding button repeatedly. Note: If the list features more than 3 elements, the scroll bar indicates the current position in the list. Repeat the steps for all additional destinations to be added to the route. Editing, Saving and Managing Routes You can plan any number of routes, e.

g. for your vacation. They can be 44 Route Planning Changing the Order · Move route point up: Select the route point to be moved. Touch the More button. Touch the Move target up button.

The Itinerary menu is displayed again, the selected route point is moved up in the route list by one position. Repeat this process until the route point appears at the correct position in the route list. Move route point down: Select the route point to be moved. Touch the More button. Touch the Move target down button. The Itinerary menu is displayed again, the selected route point is moved down in the route list by one position. Repeat this process until the route point appears at the correct position in the route list. Deleting a Route Point Select the route point to be deleted. Touch the More button. Touch Delete from route.

The route list is displayed again. Deleting a Complete Route List While the route list to be deleted is displayed, touch the More button. Touch Delete the complete list. Managing Routes Saving a route Touch the More button. Touch Save route. A menu for entering a name is displayed. Enter a name for the route. Touch OK. Note: The route points are saved. If you load a saved route, it must be recalculated.

45 Route Planning Loading a route Touch the More button. Touch Load route. Select the desired route. Touch OK. complete trip from the first to the last route point and the estimated travel time for this trip instead of the Calculate button.

In addition, the distance from the previous route point and the estimated travel time for this stage are displayed for each route point. Calculating a Route A planned route can also be calculated without GPS reception so that you can gain an overview of the trip. In this case, the first defined route point is set as the starting point of the route. Note: For a navigation, the current position is the starting point. The first stage is the travel to the first defined route point.

Touch the Calculate button to calculate the complete distance as well as the estimated travel time of the route. The route is being calculated. A window displays the progress of the calculation. After the calculation is complete, the Itinerary menu displays the 46 Route Planning Displaying the Route on the Map Touch the Show button to display the entire route on the map. The map is displayed. The route is highlighted in blue. The specified route points are identified by flags. Simulation (demo mode) Touch the map. A selection menu appears. Touch "Simulation".

The route is automatically travelled and driving recommendations are output.

buttons.

The corresponding information for the next stage (upper area) and the complete route (lower area) is displayed on the map. 59 Map Display during
Destination Guidance Touch the Warning in urban areas button to change the value or to set it to Never. · Warning outside of towns: The Warning outside
urban areas button shows the level of the speed-reading at which you are audibly warned outside of build-up areas. Touch the Warning outside urban areas
button to change the value or to set it to Never. · Warning Activate the Warning button to receive an audible warning.

Touch the OK button to save your settings. Your settings are accepted and displayed on the map. In the Speed limit menu you can define whether speed limits
should be displayed during the navigation and whether you should be warned audibly if you are exceeding the speed limit. · Display signs Touch the Show
traffic signs button to change between the modes Show traffic signs: Always, On speeding only or Never. · Warning in a town: The Warning in urban areas
button shows the level of the speed-reading at which you are audibly warned inside of buildup areas.

60 Additional Functions during Navigation Additional Functions during Navigation The following functions can be used during a navigation: · Inserting an
interim destination · Skipping a stage · Blocking route segments Inserting an Interim Destination During the navigation, you can insert a new interim
destination at any time.

[You're reading an excerpt. Click here to read official BLAUPUNKT TRAVELPILOT LUCCA 3.3 user guide](http://yourpdfguides.com/dref/2736562)
<http://yourpdfguides.com/dref/2736562>

The route is then recalculated so that this interim destination can be approached as the next destination. After reaching the interim destination, all remaining places of destination are selected. An interim destination is created as follows: Prerequisite: · You are in the map display during a navigation. Briefly touch any position on the map. Touch the Interim destination button. The Destination entry menu displays. Enter the place of destination as described in "Entering a Destination". Touch the Set as route point button. The route is recalculated and the defined interim destination is selected as the next route point.

Note: You can also select the interim destination directly from the map as described in the section "Copying a Destination from the Map". Next, touch Interim destination. 61 Additional Functions during Navigation Blocking route segments Approaching the Next Destination This function is only available during a navigation on a route with at least one interim point. Use this function if you want to skip the next route point. Touch the Next destination button to approach the next to one route point. The route is recalculated so that the next to one route point can be approached as the next destination. Blocking route segments Manual Blocking You have the option of manually blocking a route segment located on your route to evade the road section blocked for navigation. After a manual blocking, the route is recalculated. Supposing that you are on the motorways and hear a traffic announcement on the radio about a traffic jam of 5 km on your route. In this case, you can use a manual blocking of the section to evade the traffic jam.

The manual blocking is only applicable to the current navigation and is no longer available for a new navigation or after a restart of the program. Route segments are blocked as follows: Prerequisite: · You are in the map display during a navigation. 62 Blocking route segments Briefly touch any position on the map. Select the Block road entry. The Block road menu displays.

The road blocking is cancelled and the navigation uses once again the original calculated route. Enter the number of kilometres, starting with your current position, which you want to block. The route is recalculated and the blocked route segment is evaded. The blocked segment is marked in red. Unblocking Briefly touch any position on the map.

Select the Block road entry. 63 Configuring Lucca/ Basic Settings Settings You can perform settings in the Lucca for the following areas: · Language · Home address · Map information · Route information · Routing options · Route planning · Signpost information · Speed limit · Auto mode · Time zone · Format · Representation · Voice command · Factory settings · Touchscreen · Product information In the Navigation menu, touch the Settings menu to configure the Lucca. If you made changes to the settings, you can touch the OK button of the Settings menu to accept the changes you made. Or Touch the button to exit the Settings menu without saving the changes. Language In the Language menu, you can select your preferred for the menus and voice output. Touch the Language button. The current language is displayed. Touch the Set language. The language list displays. Touch on your preferred language to select the language.

64 Configuring Lucca Home Address In the Home address menu, you can store your home address so that you can quickly navigate home from any location. Touch the Enter your home address button. Touch the Address button and enter your home address in the "Entering a destination address" section. Touch the Set as home address button. The address is copied into the Home address menu. Map Information In the Map information menu, you can perform the following settings: · Info bar If you activate the entry, the compass, altitude and current speed are displayed on the map in the lower right border. · Points of interest If you activate the entry, the map displays all the points of interest. · Street names 2D If you activate the entry, the map displays all the street names. Route Information In the Route information menu, you can perform the following settings: · Dist. to final dest. · Time to final dest., ETA at final dest. If you activate the entries, the map displays the estimated time of arrival, the estimated travel time and the remaining kilometres/miles to the destination point. · Dist. to next dest.

· Time to next dest., ETA at next dest. If you activate the entries, the map displays the estimated time of arrival, the estimated travel time and the remaining kilometres/miles to the next stage destination. 65 Configuring Lucca Note: This information is only displayed if you navigate to several locations. Routing Options In the Routing options menu, you can define the speed profile of your vehicle, select the type of routing and exclude certain streets from usage. The route options remain valid for each destination guidance until the next change of the route options. For further details, please read the chapter "Specifying Route Options". Route Planning In the Itinerary menu, you can define whether the calculation for the next stage should automatically be performed after reaching a stage. If the automatic calculation is activated, the route to the next stage destination is automatically calculated upon reaching a stage. If the automatic calculation is deactivated, you can navigate to the next stage destination by briefly touching any position on the map and selecting the Next option. Signpost Information In the Signpost information menu, you can specify whether signpost information, which you are to follow, should be displayed during the navigation or not. Touch the Show traffic signs button to activate or deactivate the display. Note: This information can only be displayed if it is part of the map material. Speed Limit In the Speed limit menu you can define whether speed limits should be displayed during the navigation and whether you should be warned audibly if you are exceeding the speed limit. 66 Configuring Lucca · Display signs Touch the Show traffic signs button to change between the following modes: Show traffic signs: Always, Show traffic signs: On speeding only or Show traffic signs: Never · Warning in a town The Warning in urban areas button shows the level of the speed-reading at which you are audibly warned inside of buildup areas.

Touch the Warning in urban areas button to change the value or to set it to Never. · Warning outside of towns The Warning in rural areas button shows the level of the speed-reading at which you are audibly warned outside of build-up areas. Touch the Warning in rural areas button to change the value or to set it to Never.

[You're reading an excerpt. Click here to read official BLAUPUNKT TRAVELPILOT LUCCA 3.3 user guide](http://yourpdfguides.com/dref/2736562)
<http://yourpdfguides.com/dref/2736562>

· **Warning** Activate the **Warning** button to receive an audible warning. **Note:** This information can only be displayed if it is part of the map material. **Caution:** The information in the map material may be incorrect due to short-term changes (construction, etc.)! The traffic situation and the local signpost information have priority over the information of the navigation system. **Auto Mode** In the **Auto mode** menu, you can perform the following settings: · **Begin with** Select whether the map should be displayed in 3-D view or in 2-D view by default. **67 Configuring Lucca** · **3D auto zoom** Select whether you desire auto zoom or no auto zoom as default in 3-D view during a navigation. **2D auto zoom** Select whether you desire low auto zoom, standard auto zoom, high auto zoom or no auto zoom during a navigation with 2-D view.

Note: For 2-D and 3-D auto zoom, the zoom depth is changed in reference to your speed: If you travel slowly, the scale becomes smaller. If you travel faster, the scale becomes larger. The deeper the auto zoom, the smaller the scale of the map. **Time Zone** In the **Time zone** menu, you can set the time zone that is valid for your position. This setting is important for the correct calculation of estimated arrival times.

· **Time zone** Touch this field to set the time zone valid for your position. · **Daylight saving time** Touch this field to toggle between daylight savings time (button with check mark) and winter time (button without check mark). **Note:** If the time is changed at your location or if you drive into a different time zone, you must adjust the corresponding settings. **Format** In the **Format** menu you can specify which units of measure should be used for times and distances and the language to be used for the menus and voice output of the Lucca. · **2D-view** Select whether the map should be oriented to the north or in driving direction by default during a navigation with 2-D view.

68 Configuring Lucca · **Time** Touch this field to toggle between 12-hour and 24-hour display. · **Distance** Touch this field to toggle between the display in kilometres and miles. **Representation** In the **Representation** menu, you can set the brightness for day and night mode. Touch the **Representation** button. The **Representation** menu displays. Touch the **Brightness Day** button to select the brightness value for day mode. Touch the **Brightness Night** button to select the brightness value for night mode. **Voice command** In the **Voice command** menu, you can mute voice command during navigation. Touch the **Voice command** button. The **Voice command** menu displays.

Touch the **Radio-mute** button to mute the voice commands. Touch the **OK** button to confirm. **Factory Settings** In the **Factory settings** menu, you can reset the navigation software to the factory settings. Touch the **Factory settings** button. A confirmation is displayed. Confirm the reset to the factory settings by touching **OK**. To avoid resetting the device, touch the button. **Touchscreen** In the **Touchscreen** menu, you can recalibrate (align) the touchscreen if it responds imprecisely to touches. Touch the **Start calibration** button and follow the instructions on the display. **69 Configuring Lucca Product Information** Touch this field to display the version of the map being used and the version of the navigation software.

GPS Mode of Operation **GPS Mode of Operation** The **Global Positioning System (GPS)** was developed in the 70s by the US military. **GPS** is based on a total of 24 satellites that are orbiting the earth and sending out signals. The **GPS** receiver receives these signals and calculates its distance to the individual satellites using the propagation time of the signals. This information is then used to determine its current geographical position. The positioning requires signals from at least three satellites, and starting with the fourth one it is also possible to determine the altitude above sea level.

The positioning is carried out with an accuracy to 3 metres. **Navigation with GPS.** The provided maps also contain the geographical coordinates of the displayed points of interest, streets and towns. This allows the navigation system to calculate a route from a starting point to a place of destination. **70 GPS Mode of Operation** If the Lucca receives the signals from at least 3 satellites, it can determine its position and display it on the map.

This position can then be used as the starting point for a route calculation. Since a positioning and position display is carried out once every second, you can view your movement on the map. **MP3 Mode** **MP3 Mode** The Lucca can be used to play **MP3** audio files in **MP3** format from **SD** cards. The playback utilises either the internal loudspeaker or headphones connected via the headphone jack. **Preparing the SD Card** The Lucca can play **MP3** files from **SD** cards. The **SD** cards should be formatted using either the **FAT 32** or **FAT 16** format. The **MP3** files can be stored either at the top directory level or in folders on the **SD** card. You can also mix **MP3** files and other files (e.g. .

.jpg files) in one folder. In **MP3** mode, all other data are ignored by the Lucca and only **MP3** files are being played. **Inserting the SD Card** The **SD** card slot is located on the right side of the Lucca. **71 MP3 Mode** Push the **SD** card into the **SD** card slot according to the marking on the slot until the card engages.

Selecting MP3 Mode If you are in a different operating mode, Press the **Menu** button longer than 3 seconds. The main menu displays. **Starting Playback** If you selected the **MP3** button, the previously played **MP3** will be played automatically. **Selecting a MP3 file** In the **MP3** menu, touch the **File** button. The **MP3** list menu is displayed. Touch the **Music Player** button.

The **MP3** menu displays: **72 MP3 Mode Repeated Play (Repeat)** You can repeatedly play the current played file. In the **MP3** menu, touch the **Repeat** button. The current played **MP3** file will repeatedly play. If you press again the **Repeat** button, the repeat function will be cancelled. Touch the file to which you want to listen by using the arrows to scroll up and down in the list.

The **MP3** menu is displayed again and the selected **MP3** file starts playing. **Playback the MP3 File** To select the next file in the **MP3** list, touch the button in the **MP3** menu. To select the previous file in the **MP3** list, touch the button in the **MP3** menu. The next or previous track starts playing. **Quitting Playback** To quit the playback, touch the **Stop** button in the **MP3** menu.

Playback is stopped. **73 MP3 Mode Picture Viewer Mode** **Removing the SD Card** You quit the **MP3** mode by touching the button in the **MP3** menu. Carefully push on the **SD** card in the slot until it disengages. The **SD** card is ejected a little bit and can be removed. **Picture Viewer Mode** The Lucca can also be used to view pictures that are stored on the inserted **SD** card. For this purpose, the pictures must be stored in the .jpg or .bmp format on the card.

[You're reading an excerpt. Click here to read official BLAUPUNKT TRAVELPILOT LUCCA 3.3 user guide](http://yourpdfguides.com/dref/2736562)
<http://yourpdfguides.com/dref/2736562>

You can also mix JPG files and other data (e.g.

MP3 files) in one folder. In the Picture Viewer mode, only the .jpg (.bmp) files in a folder are displayed and others are ignored. Starting the Picture Viewer If you are in a different operating mode, Press the Menu button longer than 3 seconds. The main menu displays. 74 Picture Viewer Mode Selecting a Picture file To select the next picture in the file list, touch the next file by using the arrows to scroll down on the Pictures Viewer menu. To select the previous picture in the file list, touch the previous file by using the arrows to scroll up on the Pictures Viewer menu. Touch the Picture Viewer button. The Pictures viewer menu displays.

The next or previous picture is displayed. Starting the Slide Show Touch the Slide button to start the slide show with all the pictures in the file list. The first picture in the picture file recognised by the Lucca is displayed. The picture slide is converted at 3 seconds intervals. 75 Picture Viewer Mode Starting the Full Screen Touch the Full button to view the full screen with all the pictures in the file list.

At the last slide the Question Notice where the slide show is finished will appear. On the full screen mode, you can move to the previous or next file by using the arrow icon. 76 Picture Viewer Mode Installing Street Maps Installing Street Maps The road map of the country in which the Lucca was purchased is preinstalled in the memory of the Lucca. The preinstalled road map is also contained on the enclosed CD/DVD for a future restore. Dependend on the purchase version the CD/DVD contains also other road maps.

To install a road map from the CD/ DVD, copy it from the CD/DVD to an SD card or use the USB-port and install the road map as described below. Switch on the Lucca by pressing the Power button for a few seconds. Insert the new memory card into the SD card slot according to the marking on the card slot. Or Connect the Lucca via the USBport to your PC. Removing the SD Card You quit the Picture Viewer mode by touching the button in the Pictures viewer menu. Carefully push on the SD card in the slot until it disengages. The SD card is ejected a little bit and can be removed. 77 Installing Street Maps Switch off and on the Lucca again by pressing the Power button for a few seconds. A dialog menu displays. Follow the instruction to install the street map.

Determine whether to load the content of the road map into the main memory of the device or whether the Lucca should load the data from the SD card during the navigation. Note: If you load the new road map into the main memory, the previously installed road map is overwritten. Touch the OK button. The selected road map is activated and the Navigation menu displays. Removing the SD Card Carefully push on the SD card in the slot until it disengages. The SD card is ejected a little bit and can be removed. Please use the return and collection systems available to dispose of the old unit. Service In some countries Blaupunkt offers a specific repair service including a pick-up service. In case your Lucca has to be sent to Blaupunkt for service you can order a pick-up service for your device on the internet. Refer to www.

blaupunkt.com to check if this service is available in your country. 79 Warranty FAQ Warranty We provide a manufacturer's warranty for our products purchased within the European Union. For devices purchased outside the European Union, the warranty terms issued by our respective responsible domestic agency are valid. The warranty terms can be called up under www.blaupunkt.com/de or requested directly from: Blaupunkt GmbH, Hotline Robert-Bosch-Str. 200 D-31139 Hildesheim Fault Removal / Frequently Asked Questions FAQ Why does the Lucca require GPS reception? The system must know where it is located or where it is moving. This is accomplished with the help of GPS satellites. Without GPS reception, navigating is not possible.

How can I listen to MP3 music? With the help of a PC, the MP3 files are stored on the card which is then inserted in the SD card slot of the Lucca. In conjunction with the cradle, they can also be played over the car sound system. Can the navigation software be changed? Yes. Simply insert the card in the SD card slot or use the USB-port and you can immediately navigate with the new data. 80 FAQ The internal navigation software remains intact and you can use either the internal navigation software or the one on the SD card for the selection. Is the old internal navigation software overwritten with a change of the navigation software? No, the system can navigate with the internal as well as the external data. If the external data (SD card) are used for navigation, the SD slot for the MP3 playback for the Lucca is unavailable during this time. Can the internal navigation software be changed? Yes. The data can be loaded in the internal memory. For this purpose, insert the SD card in the SD card slot or connect the Lucca via the USB-port with your PC and initiate the loading process via menu.

How long does the loading take from the SD card to the internal memory? The loading process lasts approx. 15 minutes and is dependent upon the data size. For this reason, the individual countries are delivered as completely manufactured maps. The data do not have to be loaded from the SD card into the internal memory. Is it possible to play WMA files with DRM protection? The playback of WMA files with Digital Rights Management protection (WMA-DRM) is not possible since the license key is not transferred during the transfer of the WMA file from the PC.

The playback of WMA files without DRM protection is, of course, possible. Which cards can I use? Commercial SD or MMC cards. Which data format is required for an SD card? FAT 16/32. 81 Country: Germany Austria Belgium Denmark Finland France Great Britain Greece Ireland Italy Luxembourg Netherlands Norway Portugal Spain Sweden Switzerland Czech. Rep.
