Manual abstract:

We hope you thoroughly enjoy using your Braun Silk-pil Xelle. In the following we would like to familiarise you with the appliance and provide some useful information about epilation. The epilation head 2 features 40 tweezers that are uniquely arranged to remove more hair in a single stroke, for unprecedented efficiency. The SoftLift® tips integrated in the epilation head make sure that even short hairs (0.5 mm) and flat lying hairs are removed thoroughly at the root. It comes with two different attachments: Warning · For hygienic reasons, do not share this appliance with other persons. This appliance is not intended for use by children or persons with reduced physical or mental capabilities, unless they are given supervision by a person responsible for their safety. In general, we recommend that you keep the appliance out of reach of children. When switched on, the appliance must never come in contact with the hair on your head, eyelashes, ribbons, etc. To prevent any danger of injury as well as to prevent blockage or damage to the appliance.

Before use, check whether your voltage corresponds to the voltage printed on the transformer. Always use the 12 V transformer plug supplied with the product. General information on epilation All methods of hair removal at the root can lead to ingrowing hair and irritation (e. g. Itching, discomfort and reddening of the skin) depending on the condition of the skin and hair.

This is a normal reaction and should quickly disappear, but may be stronger when you are removing hair at the root for the first few times or if you have sensitive skin. If, after 36 hours, the skin still shows irritation, we recommend that you contact your physician. In general, the skin reaction and the sensation of pain tend to diminish considerably with the repeated use of Silk-pil. In some cases inflammation of the skin could occur when bacteria penetrate the skin (e. g. Epilation head before each use will minimise the risk of infection).

Fine hair which re-grows might not grow up to the skin surface. For reduced speed, choose the «soft» setting. 2 Rub your skin to lift short hairs. 3 Leg epilation Epilate your legs from the lower leg in an upward direction. When epilating behind the knee, keep the leg stretched out straight. 4 Underarm and bikini line epilation Please be aware that especially at the beginning these areas are particularly sensitive. with repeated usage the pain sensation will diminish. For more comfort, ensure that the hair is at the optimum length of 25 mm. Before epilating, thoroughly clean the respective area to remove residue (like deodorant). Then carefully dab dry with a towel.

When epilating the underarm, keep your arm raised up so that the skin is stretched and guide the appliance in different directions. As skin may be more sensitive directly after epilation, avoid using irritating substances such as deodorants with alcohol. Cleaning the epilation head 5 After epilating, unplug the appliance and clean the epilation head: If you have used one of the attachments A or a, first remove it and clean it with the brush. 6 To clean the tweezer element, use the cleaning brush dipped into alcohol. Clean the tweezers with the brush from the rear side of the epilation head while turning the barrel manually. After cleaning, place your preferred attachment back on the epilation head. Subject to change without notice. Please do not dispose of the product in the household waste at the end of its useful life. Disposal can take place at a Braun Service Centre or at appropriate collection points provided in your country. Aceasta este o reacie normal care ar trebui s dipar rapid, dar care poate fi mai persistent când se îndepreteaz prul de la rdcin pentru prima dat sau dac avei o piele sensibil.

To obtain service within the guarantee period, hand in or send the complete appliance with your sales receipt to an authorised Braun Customer Service Centre. For UK only: This guarantee in no way affects your rights under statutory law. .
