Manual abstract:

When using electrical products, however, some basic safety precautions should always be followed. Transmission of your toothbrush before carrying or using it in restricted surroundings, such as aircrafts or specially marked areas in hospitals (see "Deactivating the radio transmission"). Persons with pacemakers should always keep the toothbrush more than six inches (15 centimeters) from the pacemaker when turned on. If at any time you suspect interference is taking place, deactivate the radio transmission of your toothbrush before using it (see "Deactivating the radio transmission"). The Oral-B Triumph is provided with a SmartPlug (integrated Safety Extra Low Voltage) power supply. Do not exchange or manipulate any part of it, as there is a risk of electric shock. This product is not intended for use by children under age three. This appliance is not intended for use by children or persons with reduced physical or mental capabilities, unless they are supervised by a person responsible for their safety. If the product is dropped, the brush head should be replaced before the next use, even if no damage is visible. Keep the SmartPlug away from water or other liquid.

Do not use while bathing. Do not disassemble the product, except when disposing of the battery. When taking out the battery for disposal, use caution not to short the positive (+) and negative (-) terminals. Do not touch the SmartPlug with wet hands. ©@@@Braun Oral-B FlossAction brush head

Braun Oral-B Pro White brush head j SmartGuide display unit k Wall mount l Adhesive tape a b c d e f Before brushing for the first time, charge your toothbrush.

Your SmartGuide display comes with a demonstration mode activated. To leave this mode please remove the compartment cover on the back and push the "set" or the "h/min" button, located in the battery compartment. Please note that your SmartGuide display will self-activate this demonstration mode when you do not use your toothbrush for 28 days. You can avoid this self-activation by setting the clock or synchronizing your handle. The battery symbol will fill up while the handle is being charged.

Once the handle is fully charged, the battery symbol will be filled with four bars. A full charge takes at least 10 hours to complete and allows for approximately 10 days of regular brushing (twice a day, 2 minutes). By briefly pressing the "h/min" button, you can toggle between a "12h" or "24h" daytime format. Push the "set" button to confirm your choice. Please note: If the battery symbol is not displayed immediately, continue charging. When the rechargeable battery is low, the battery symbol with one remaining bar starts flashing. Your toothbrush will slow down and then stop. When the battery is fully discharged, the empty frame of the battery symbol flashes. It will then need a 15-minute charge before you can use it for a 2-minute brushing. Then the hour digit starts flashing.

Press the "h/min" button until the right hour appears and confirm with the "set" button. Proceed the same way to set both minute digits. If you prefer not using this clock feature, the flashing "12:00" will disappear automatically after 24h. You can start your toothbrush by pressing the on/off button (b). To avoid splashing, guide the brush head to your teeth before switching on the appliance. For everyday use, the toothbrush handle can be stored on the charging unit to maintain it at full power. There is no risk of overcharging the battery. However, for environmental reasons, Oral-B recommends to unplug the charging unit until the next recharge is required. To maintain the maximum capacity of the rechargeable battery, unplug the charging unit and fully discharge the handle with regular use at least every 6 months. Your toothbrush has a waterproof handle, is electrically safe and designed for use in the bathroom.

To assemble the charging unit, insert the protective cover (h) on the back of the base plate (g). Then, place the base plate on the charging ring (f) until it clicks into place. You can choose between the "Professional" or "2-Minute" timer and the "Count Up" or "Count Down" timer to meet your specific needs. The "2-Minute Timer" indicates by a long stuttering sound and a "smiley" on the SmartGuide display unit that the dentist recommended 2-minute brushing time has been reached. In addition the "Professional Timer" helps you brush all four quadrants of your mouth equally.

It signals with a short stuttering sound at 30-second intervals (45-second intervals within Deep Clean mode) and the "quadrant circle" on the SmartGuide display unit that it is time to move to the next quadrant of your mouth. @@@@Guide the brush head slowly from tooth to tooth. @@@@In general, bleeding should stop after a few days. @@@@ "Deep Clean" Exceptional mouth cleaning with extended brushing time. Within this mode the brushing time has been extended to 45 seconds per quadrant for a total brushing time of 3 minutes.

When pressing the on/off button, your toothbrush automatically starts in the "Daily Clean" mode. Brush heads The Oral-B FlossAction brush head (a) is recommended for everyday deep cleaning. It features micropulse bristles that get deep in hard-to-reach areas between your teeth, gently removing hidden plaque. for occasional or everyday polishing, please use the Oral-B Pro White (i) brush head. It features a dentist-inspired polishing cup to remove surface stains from coffee, tea and tobacco for effective brightening. Please note that children under 12 years old should not use the Oral-B Pro White brush head. Do not use the Oral-B FlossAction or Oral-B Pro White brush head with braces. We recommend using the Braun Oral-B Ortho brush head, which is specifically designed to clean around braces and wires. All brush heads feature blue Indicator bristles helping you to monitor brush head replacement need. With proper brushing, twice a day for two minutes, the blue color will fade halfway approximately within 3 months, signalling that it is time to change the brush head.

To turn your brush off, press the on/off button. Sliding the SmartGuide display unit into the fixed wall mount.

Too much pressure is applied. reduce the brushing force. «Quadrant circle» currently you are brushing in the first 30-second interval (45-second interval within Deep Clean mode). Move to the next quadrant of your mouth, when the second segment starts flashing. Before cleaning your charging unit, make sure you disassemble it first. the charging ring and SmartPlug should never be placed in the dishwasher. However, all other parts (base plate and protective cover) are dishwashersafe. After brushing, rinse your brush head thoroughly under running water.

Remove the brush head from the handle and clean both parts separately under running water. Then, wipe them dry before returning the handle to the charging unit. Wall mount If you prefer to mount the SmartGuide display unit on a wall, mirror or other surface, use the adhesive tape (l) to fix the wall mount. Before doing so, make sure the chosen surface is clean and dry (remove grease and dust first). position the wall mount so that the Oral-B logo is readable.

Then, press the wall mount evenly and firmly to the wall. Wait 24 hours before From time to time, you can also clean the charging ring, SmartPlug and SmartGuide display unit with a damp cloth. Both the SmartPlug charger and SmartGuide display unit should never be placed in water. In order to avoid interference of display messages when using more than one Oral-B Triumph toothbrush with separate SmartGuide display units in the same household, you need to assign the handles to their respective display units. Handle At the end of the product's useful life, open the handle as shown, remove the rechargeable battery and dispose of it according to local environmental regulations.

Then turn off the handle. If you would like to assign a second handle to the same SmartGuide display unit, repeat the last two steps described above with the other handle. you can exit the «Learn» mode by pressing the «h/min» or «set» button. Otherwise the «Learn» mode will automatically end after 30 seconds. please note: A maximum of 2 handles can be synchronized with one SmartGuide display unit. A.
