Keep the use instructions during the entire life of the appliance. Important Safeguards • Make sure your voltage corresponds to the voltage printed on the  
iron. □ This appliance can be used by children aged from 8 years and above and persons with reduced physical, sensory or mental capabilities or lack of  
experience and knowledge if they have been given supervision or instruction concerning use of the appliance in a safe way and understand the hazards  
involved. Children shall not play with the appliance. Cleaning and user maintenance shall not be made by children unless they are older than 8 years and  
supervised. □ During operation and cool-down, the appliance and its mains cord shall be kept out of reach of children under 8 years. • Caution: Hot  
surfaces! Electric irons combine high temperatures and hot steam that could lead to burns. □ Always unplug the iron before filling with water.  
Always pull the plug, not the cord. □ Do not open the water tank cover during ironing. □ The cord should never come in contact with hot objects or the sole  
plate. □ Never immerse the iron in water or other liquids. □ The iron must be used and rested on a stable surface.  
□ During ironing pauses, always place the iron upright on its heel rest and ensure that the heel rest is placed on a stable surface. @@ • Never iron or  
dampen clothes while wearing them. @@ Regularly check the cord for damage. @@@@ Braun electric appliances meet applicable safety standards. A  
Description Preconditioning nozzles Spray nozzle Water tank opening Precision shot button Spray button Steam regulator Temperature selector Temperature  
pilot light «auto-off» light (only with TS 765 A, TS 785 STP model) 10 Heel rest 11 Textile Protector (only with TS 775 TP, TS 785 STP model) 12 Soft Textile  
Protector (only with TS 785 STP model) 1 2 3 4 5 6 7 8 9 B Before starting off This iron is designed for tap water.  
If you have extremely hard water, we recommend that you use a mixture of 50 % tap water and 50 % distilled water. Do not add any additives (e. Do not use  
condensation water from a tumble dryer. □ Before filling with water, turn off the steam regulator (6) («0» = steam off). □ Holding the iron slightly inclined  
(as shown in B), fill the water tank up to the «max» marking. □ Place the iron upright on its heel rest and connect it to the mains. Select the temperature  
according to the ironing guide on the heel rest of the iron or on the label in your garments. 13 09:02 The pilot light (8) goes off when the desired temperature  
is reached (after approx. D Textile Protectors Textile Protector (11) (only with TS 775 TP, TS 785 STP model) The Textile Protector protects delicate fabrics  
from heat damage so that you can iron most fabrics without an intermediate cloth. a special coating avoids shiny patches.

With the Textile Protector, you are able to iron delicate fabrics with the temperature setting (•••) to «max», so that you can use all steam functions your iron  
offers. To check the reaction of your fabrics before you start ironing, we recommend that you iron a small section of material on the reverse side. However, in  
order not to damage the coating, avoid ironing over e. After having attached the Textile Protector, wait about 1 1/2 minutes before you start ironing. Soft  
Textile Protector (12) (only with TS 785 STP model) The Soft Textile Protector ensures an increased heat protection and utmost care for most delicate fabrics  
thanks to its specially designed SoftTouch cushion. Even most delicate, ironable\* fabrics are protected against heat damage and shiny patches are avoided.

With the Soft Textile Protector attached, you can iron all ironable fabrics without an intermediate cloth. The Soft Textile Protector is perfectly suited for  
touching up e. g. Creases of delicate business suits without having to use an ironing cloth.  
@@@@@ we recommend a medium steam setting for all normal ironing. @@@@ 30 seconds. @@@@ Precision shot can be activated  
when dry ironing. @@@@ Caution: Hot steam comes out from the preconditioning nozzles. spray function Press the spray button (5).  
@@@@ This is normal and in no case indicates a fault of the iron. @@@@ To turn on the iron again, just move it. @@@@ To prolong the life of the  
iron, empty the water tank. Store the cool iron in a dry place always standing on its heel rest. F Maintenance and cleaning To clean the sole plate, use steel  
wool.

To clean the soft material on the handle, use soapy water. @@ Take longer intervals when pressing the precision shot button. Drops coming out of the steam  
vents. @@ For this, the water tank has to be empty. Removing the steam regulator with the anticalc valve Turn the steam regulator clockwise towards the  
steam setting «6». Keep on turning firmly beyond the resistance until the steam regulator is lifted. When positioned at x, pull it out vertically. Do not touch the  
anticalc valve at its lower end. Immerse the anticalc valve in vinegar (not vinegar essence) or lemon juice for a minimum of 30 minutes. Brush off remaining  
residues and rinse under running water (fig.

h, 1-7). Re-inserting the steam regulator When re-inserting the steam regulator, make sure the steam regulator base still points on setting x (fig. h, 8). Firmly  
push down the steam regulator until it turns back to setting «6» (fig. h) where it catches. Notice: The iron must never be used without steam regulator. less  
steam develops or no steam at all. Calcium particles coming through the steam vents. Subject to change without notice. Please do not dispose of the product  
in the household waste at the end of its useful life.

Disposal can take place at a Braun Service Centre or at appropriate collection points provided in your country. H Decalcifying/anticalc system In order to  
clean the steam chamber from residues, decalcify it as shown in picture section I, 1-8. Caution: Hot water and steam will come out from the sole plate when  
the steam regulator is turned clockwise beyond setting «6». Wait for the sole plate to cool down, then clean it as described above. Then refill the tank with  
water, heat up the iron and press the precision shot button 4 times to rinse the iron before ironing (fig.

i, 9-13). Do not use commercial decalcifiers, they may damage the iron. A Beschrijving Voorbewaterende stoom spuitopeningen Spray spuitopening
