2 4.3 4.4 4.5 4.6 4.7 4.8 Appendix A 3 2011-03-04 Contents 4 2011-03-04 About This Guide About This Guide 1.1 Who Should Read this Guide This guide is intended for content consumers who are on the move and want to explore and search business information to help them make effective decisions. 1.2 What this Guide Contains This guide contains information on: · Accessing the SAP BusinessObjects Explorer app on the iPhone/iPad device · Exploring business intelligence data using the SAP BusinessObjects Explorer capabilities Note: The procedures described in this guide are common to iPhone and iPad devices.

In cases where there are deviations, the content is described as iPad Specific. 5 2011-03-04 About This Guide 6 2011-03-04 What Is SAP BusinessObjects Explorer for iPhone/iPad? What Is SAP BusinessObjects Explorer for iPhone/iPad? SAP BusinessObjects Explorer for iPhone/iPad is a data discovery mobile application that enables mobile users to explore and search through business information quickly. @@@@3. Modify the value of the parameter from "/WEB-INF/sample.properties" to "/WEB-INF/server.properties" in the web.xml file found in WEB-INF directory of the MOBIServer web application. 4. Preconfigure Mobile server (MOBIServer) to display Explorer servers that are used while creating connection from the SBO Explorer app. To add Explorer server names to servers list, perform the following steps: 9 2011-03-04 Getting Started a.

Open the server.properties file from the following location: <INST_WEB_APP_SERVER>/MOBIServer/WEB-INF/ where, INST_WEB_APP_SERVER is your web application server installation directory where you have deployed the MOBIServer.war file. b. Enter the values for ExplorerServerNickName and ExplorerServerURL parameters.

For example, ExplorerServerNickName=Experience_Demo, ExplorerServerURL=http://experience.sap.com/polestar where, · ExplorerServerNickName - a logical name for the SAP BusinessObjects Explorer server that appears in the server list field of SBO Explorer while creating a new connection. · ExplorerServerURL - a URL of the Explorer server. Note: To add multiple Explorer server names, you must make entries for ExplorerServerNickName and ExplorerServerURL parameters along with values in a new line.

For example, ExplorerServerNickName=Experience_Demo1, ExplorerServerURL=http://server1/polestar1

ExplorerServerNickName=Experience_Demo2, ExplorerServerURL=http://server2/polestar2 c. Re-start the web application server. 3.3 Downloading the SAP BusinessObjects Explorer for iPhone/iPad App onto Your Device You can download the SAP BusinessObjects Explorer for iPhone/iPad app onto your device from Apple's App Store using iTunes. For detailed information on downloading an iPhone app, see the iPhone User's Guide. 3.4 Accessing SAP BusinessObjects Explorer on iPhone/iPad This section describes how to launch, configure, and log on to SAP BusinessObjects Explorer. 3.4.1 Launching SAP BusinessObjects Explorer The SAP BusinessObjects Explorer icon appears with the icons of the other apps on your iPhone device.

10 2011-03-04 Getting Started To launch SAP BusinessObjects Explorer, tap the SBO Explorer app icon. The SAP BusinessObjects Explorer splash screen appears for a few seconds and you are ready to log on to the SAP BusinessObjects Enterprise server. 3.4.2 Configuring SAP BusinessObjects Explorer connection settings To configure the SAP BusinessObjects Explorer settings, perform the following steps: 1. Obtain the following information from your IT administrator: · Mobile Server information (http://<web_app_server>:<port>, where web_app_server is the name of the server where you have deployed the MOBIServer.war file and port is the corresponding application server port used to access the application) · Explorer Server Name · User name · Password · Authentication type 2. Launch the SAP BusinessObjects Explorer app. The "Explorer connections" screen appears. 3. Tap Edit. 4. To create a new Corporate account, tap the + icon. To edit the existing account details, tap the Corporate account. 5.

Enter the Mobile Server URL, and tap the go icon. For example: http://<web_app_server>:<port> Note: Special characters other than hyphen and underscore are not supported for username, password, or any other connection page fields. 6. Select the SAP BusinessObjects Explorer server from the list and tap Done. 7.

Enter the name for the connection, and tap Done. You can create multiple Explorer connections for a particular server with different user names and passwords.
