1 Install Guide 3 Contents 4 BusinessObjects Live Office XI 3.1 Install Guide Installing Live Office 1 1 Installing Live Office Overview Overview This chapter provides step-by-step instructions for installing and configuring BusinessObjects Live Office XI 3.1. This chapter is intended for both system administrators who install Live Office and end users who enable and use the product. It contains the following topics: Installation pre-requisites on page 6 Installing Live Office on page 7 Running a silent installation on page 10 Configuring Live Office on page 15 Enabling Live Office client components on page 15

Running side-by-side Live Office installations on page 16 Uninstalling Live Office on page 17 Installation pre-requisites The following is a list of BusinessObjects and third-party software pre-requisites required for BusinessObjects Live Office XI 3.

1 client components to function properly: · BusinessObjects Enterprise XI 3.1 platform for Windows, including Web Services, accessible from the client machine. @@@@The server component is installed automatically with BusinessObjects Enterprise Premium. You need a license to activate Live

Office as an add-on to BusinessObjects Enterprise Professional. The client components are automatically available to install with both BusinessObjects Enterprise Premium and Professional. They must be installed on each machine that will be using Live Office functionality. The Live Office Installation Wizard works with Microsoft® Windows® Installer to guide you through the installation process. The wizard automatically recognizes your computer's operating system and checks for software platform requirements. It updates files as required. Related Topics · · To activate the server component on page 7 To install the client on page 8 To activate the server component The server component is installed automatically with BusinessObjects Enterprise Premium.

No activation is required. Follow the instructions below to activate the server component for BusinessObjects Enterprise Professional. BusinessObjects Live Office XI 3.1 Install Guide 7 1 Installing Live Office Installing Live Office 1. Locate the Live Office license key that you received from Business Objects. Note: If you have not purchased a Live Office license key, contact Business Objects. For contact information visit http://www.businessobjects.com/company/contact_us/default.asp.

2. Click Start, point to Programs, point to BusinessObjects Enterprise and click BusinessObjects Enterprise Central Management Console. The Central Management Console appears. 3. From the Central Management Console, under the CMC Home heading, click License Keys.

The License Key page appears. 4. Type your Live Office license key in the Add Key field, and click Add. The server component is now activated, and all Live Office features and options will be functional. To install the client 1.

Insert the BusinessObjects Live Office XI 3.1 CD into your computer CD-Rom drive. Note: For a network-based application, locate the setup.exe file on your network and skip to Step 3. 2. Choose your preferred language for the installation setup from the list on the left and click Install. The "Live Office Installation Wizard" is displayed. 3. Follow the on-screen instructions in the "Live Office Installation Wizard" to complete the installation procedure. Note: When running the "Live Office Installation Wizard", English is selected by default in the Choose Language Pack screen.

You can install additional language packs after installing Live Office. @@@@5. @@@@Live Office will force use of Microsoft .NET Framework 2.0. @@@@The LiveOffice menu and toolbar options appear. @@@@The example below installs the English version of Live Office to the Business Objects directory with SAP authentication: Setup.exe /qn CLIENTLANGUAGE=EN INSTALLDIR="c:\business objects" CMSAUTHENTICATION="secSAPR3" WEBURL="http://machinename:8080/dswsbojje/services/session" NAMESERVER = "BusinessObjects Enterprise server name" The following table describes the most common parameters. Installation parameter Description /qn Performs the installation silently, without prompting the user 10 BusinessObjects Live Office XI 3.1 Install Guide Installing Live Office Installing Live Office 1 Installation parameter

Description Specifies the language version for the installation · For simplified Chinese, type CHS · · · · · For traditional Chinese, type CHT For Danish, type DA For Dutch, type NL For English, EN For Finnish, FI For French, type FR For German, type DE For Italian, type IT For Japanese, type JP For Korean, type KO For Norw utility on your client computer.

2. Double-click `enable_addin.exe` to run the utility. The Live Office Configuration dialog box appears. 3. Select the Microsoft Office application for which you want to enable the Live Office Add-In, and click OK. The LiveOffice menu and toolbar options appear. Note: For more information about logging on, see "Chapter 2: Getting Started with Live Office" in the BusinessObjects Live Office XI 3.1 User's Guide. BusinessObjects Live Office XI 3.

1 Install Guide 15 1 Installing Live Office Running side-by-side Live Office installations Running side-by-side Live Office installations If you have purchased an upgrade product activation keycode, you will find that the installation program does not remove your previous version of Live Office . In general, upgrading Live Office components provides you with a side-by-side installation - a scenario in which you can have both your old and new versions of Live Office installed on the same machine, but only one installation can be enabled at any time. To enable or disable a particular version you must enable the Live Office Add-In on your machine and enable a specific version of Live Office from the COM Add-Ins dialog box. To enable or disable a specific version of Live Office on your machine You must add the COM Add-Ins to a toolbar in a Microsoft Office application . Note: It is recommended that you have only one version of Live Office running at a time for optimal performance. To disable a specific version of Live Office on your local machine, clear the check box for the version you want to disable and click OK. 1. Open a Microsoft Office application such as Microsoft Excel 2003. 2. From the Tools menu, click Customize. The Customize dialog box appears. 3. From the Customize dialog box, click Commands, and then, select the Tools category. 4. Under the Tools category, select COM Add-Ins and drag it out of the dialog box on to a toolbar. 5. Click the COM Add-Ins button that you added to a toolbar in the previous step. The COM Add-Ins dialog box appears. 16 BusinessObjects Live Office XI 3.1 Install Guide Installing Live Office Uninstalling Live Office 1 6. From the COM Add-Ins dialog box, check the check box to select the Live Office version you want to enable and click OK. Note: If the LiveOffice menu disappears, rerun the utility to restore the menu. Uninstalling Live Office To uninstall Live Office 1. Click Start, point to Settings, and then click Control Panel. The "Control Panel" appears.

2. From the "Control Panel", double-click Add or Remove Programs. The "Add or Remove Programs" window appears. 3. From "Add or Remove Programs", from the list of currently installed programs, select BusinessObjects Live Office XI 3. 1 and click Remove. 4. Follow the on-screen instructions in the "Live Office Installation Wizard" to complete the procedure.
