This connected option allows you to use your unit as a copier/printer with a wide range of settings and print functions.*

Before you use this guide, be sure to thoroughly read and understand the HP Digital Copier 510/610 Reference Guide, which contains information that you need to know about your copier/printer before installing the software. load paper Following is the basic procedure for loading paper and the guidelines for loading specialty papers for printing only. For more information on loading standard paper, see Load Paper and Load Originals in the HP Digital Copier 510/610 Reference Guide. For best results, adjust the paper settings each time you change paper types and sizes. For more information, see adjust paper settings for printing on page 4 and select paper type and size on page 18.

about this guide 1 hp digital copier 610 printing and software guide load specialty paper for printing Following are guidelines for loading certain types of paper for printing only. paper Labels (only works with printing function) tips · Always use letter-size or A4-size label sheets designed for use with HP Inkjet products (like Avery Inkjet Labels), and make sure that the labels are not more than two years old. · Fan the stack of labels to make sure none of the sheets are sticking together. · Place a stack of label sheets on top of standard paper in the upper paper tray, print-side down. Do not insert labels one sheet at a time. Continuous (banner) paper (only works with printing function) Continuous banner paper is also known as computer or Z-fold paper. · Before loading banner

paper, remove all other paper from the upper paper tray, and then raise the output tray above the catch on the right side. Raise the output tray above the catch on the right side. · If you use non-HP banner paper, use 20-lb. paper and fan the paper before loading it. · Verify that the stack of banner paper contains at least five pages. · Carefully tear off the perforated edge strips from both sides of the paper stack, then unfold and refold the paper to make sure the pages do not stick together. · Put the paper in the upper paper tray so that the unattached edge is at the top of the stack toward the back of the copier/printer. You should see a folded edge closest to you at the top of the stack in the upper paper tray. 2 get started hp digital copier 610 printing and software guide paper Postcards (only works with printing function) tips In the upper paper tray, insert a stack of postcards with the print-side down until it stops.

Line up the postcards on the right side of the upper paper tray, slide the paper-width guide up against the left side of the cards, and slide the paper-length guide in until it stops. In the upper paper tray, insert the photo paper with the print-side down until it stops.

[You're reading an excerpt. Click here to read official COMPAQ 610 user guide](http://yourpdfguides.com/dref/2853699)
<http://yourpdfguides.com/dref/2853699>

Place the long edge of the photo paper against the right side of the upper paper tray, slide the paper-width guide up against the long edge of the photo paper, and slide the paper-length guide in until it stops. If the photo paper has perforated tabs, load the paper so that the tabs are closest to you. 4" x 6" photo paper (only works with printing function from the upper paper tray) load envelopes Envelopes must be loaded differently depending on whether you are printing one envelope or multiple envelopes. Do not use shiny or embossed envelopes, or envelopes that have clasps or windows. to print one envelope 1 Slide the envelope into the envelope slot, which is located on the right side toward the back of the output tray. 2 Insert the envelope with the flap up and on the left, as shown. 3 Slide the envelope in until it stops. to print multiple envelopes 1 Remove all paper from the upper paper tray.

2 3 Slide a stack of envelopes into the tray, with the envelope flaps up and on the left (print-side down), until they stop. Adjust the paper-width and paper-length guides against the envelopes, being careful not to bend the envelopes, as shown. load envelopes 3 hp digital copier 610 printing and software guide 4 Make sure the envelopes fit within the tray. Do not overload it. Tip! Consult the help files in your word processing software for details on how to format text for printing envelopes.

adjust paper settings for printing Following are the guidelines for setting paper size and paper type for printing only. We recommend that you change these settings whenever you load different paper or film to ensure the best print quality. The paper settings for copying may differ from the paper settings for printing. For copying information, see Change Paper Settings for Copying in the HP Digital Copier 510/610 Reference Guide. Your HP Digital Copier automatically gives you great printing results with an optical sensor that detects the paper type and size of most popular papers and films.

However, you can also manually select paper settings, as follows. paper type Banner papers Cards Copier paper/letterhead Custom-size papers Envelopes Greeting card papers Inkjet papers Iron-on T-shirt transfers Labels/stickers Photo papers 4" x 6" photo paper Transparency films paper size setting Banner (Letter or A4) User-Defined Paper Size, if listed sizes are not appropriate Letter, legal, or A4 User-Defined Paper Size Appropriate listed envelope size Letter or A4 Letter, legal, or A4 Letter or A4 Letter or A4 Letter or A4 4x6 Photo Paper Letter or A4 print quality setting Normal Best or Normal Normal Best or Normal Normal Normal Normal Normal Normal Best Best Normal 4 get started set up printing 2 This chapter contains the following topics: · · install your hp digital copier software uninstall and reinstall software install your hp digital copier software Your HP Digital Copier may come with a universal serial bus (USB) cable. You can use the USB cable to connect your copier/printer to your computer if your computer is running Windows 98, Me, 2000, or XP. This USB connection turns your stand-alone copier into a copier/printer that lets you print from your computer. before you install the software Connecting to your HP

Digital Copier with the USB cable is very simple. 1 2 3 Before connecting your copier/printer with the USB cable, follow the instructions on the Digital Copier Setup Poster that install the software on page 5, one of the following New Hardware Wizard dialog boxes appears if your computer is running Windows

XP. Note that the only difference between the screens is that the first one installs the "DOT 4 USB Printing Support" and the other installs the "Hewlett-Packard digital-copier color series." The first screen only appears if you have never installed a USB device on your computer. Your installation process may skip the first screen completely. 10 set up printing hp digital copier 610 printing and software guide 1 2 Insert the CD that came with your copier/printer into your computer on your system: On the Windows taskbar, click Start, point to Settings, and then choose Printers.

For Windows XP, navigate from the Start menu to Printers and Faxes. Right-click hp digital copier color series, and select Set as default. 2 make the hp digital copier the default printer 13 hp digital copier 610 printing and software guide change print settings You can change print settings temporarily for a current job or change them to become the new default settings for all future print jobs. to change the print settings for a current print job 1 Open the file you want to print. 2 Depending on the software program you are using, use one of the following paths to select the Printer Properties dialog box: Click File, Print, select hp digital copier color series, then select Properties. Click File, Print Setup, select hp digital copier color series, then select Properties. Click File, Print, Setup, select hp digital copier color series, then select Properties. The Printer Properties dialog box appears. 3 Change the settings you want, and click OK to print the job. to change the print settings for all future jobs 1 Choose one of the following methods: Click Start, point to Settings, and then choose Printers.

For Windows XP, navigate from the Start menu to Printers and Faxes. If you have a printer icon in the lower right corner of your computer screen, right-click the icon and select Change Default Print Settings, then skip to step 3. 2 3 Right-click hp digital copier color series, and select Properties or Printing Preferences. Make changes as desired, and click OK to save all your changes as the new default settings for future print jobs. The following topics provide more information about using the Printer Properties dialog box to adjust print settings.

14 use printing features hp digital copier 610 printing and software guide use the setup tab The Setup tab allows you to adjust the following print settings: · · · · · increase print speed or quality change the page orientation reverse an image for iron-on transfers use different paper settings for the first page select the paper tray select paper type and size print a photo on photo paper print using 2400 dpi scale a document or change its size restore factory defaults Whenever you make a change in print settings in this tab, you can confirm the effect of your change by viewing the image in the right corner. increase print speed or quality Your HP Digital Copier allows you to customize the speed and quality of the print process by selecting from the following options: · Best produces the highest quality printing on all papers and eliminates the banding effect that sometimes occurs in solid areas.

[You're reading an excerpt. Click here to read official COMPAQ 610 user guide](http://yourpdfguides.com/dref/2853699)

<http://yourpdfguides.com/dref/2853699>

We recommend that you use this setting to print color graphics. The Best setting prints more slowly than the Normal setting. Normal delivers high-quality output and is the recommended setting for most of your jobs.

Normal is the default setting for most paper types. Draft produces output faster than the Normal setting and delivers comparable output for text. Using Draft also cuts down on the frequency of replacing your ink cartridges because it uses less ink. You may not want to use this setting when printing graphics. · · You also have the option to print at 2400 dpi, which produces the highest quality resolution for your photos. For more information, see print using 2400 dpi on page 19. The HP Digital Copier automatically sets the print quality depending on the paper type setting. 1 2 3 To increase print speed or print quality for the current job, select File, Print, select hp digital copier color series, then click Properties. Click the Setup tab. In the Print Quality area, do one of the following: Select Best to increase print quality.

Select Normal for most print jobs. Select Draft to increase print speed. use the setup tab 15 hp digital copier 610 printing and software guide 4 Click OK. Tip! Regardless of the settings, your print quality will improve on a high-quality paper such as HP Premium Photo. change the page orientation Use this procedure if you want to change the direction of your printed document or if you cannot set the page orientation from your software program. 1 2 3 reverse an image for iron-on transfers To change the page orientation for the current print job, select File, Print, select hp digital copier color series, then click Properties. Click the Setup tab. In the Orientation area, choose either Portrait or Landscape, and then click OK. This feature reverses an image so you can use it for iron-on transfers. This feature is also useful for transparencies if you want to make notations on the back and erase them later without scratching the original.

1 2 3 4 5 6 7 To reverse an image, select File, Print, select hp digital copier color series, then click Properties. Click the Setup tab. In the Orientation area, select the Mirror Image check box. For paper type, select Automatic or in Special Papers area, select hp iron-on transfers. For print quality, select Normal or Best.

For paper size, select A4 or Letter. Click OK to close the dialog box. For information about loading iron-on transfers, see load specialty paper for printing on page 2. use different paper settings for the first page If you want to use a different paper type or paper tray for printing the first page of your document, change this option in the Print Settings dialog box. 16 use printing features hp digital copier 610 printing and software guide 1 2 3 To change paper settings for the first page of the current job, select File, Print, select hp digital copier color series, then click Properties.

Click the Setup tab. Select Use different first page. The All Pages tab changes to First Page and displays a new tab for Other Pages settings. Choose the desired Paper Type, Paper Size, and Paper Source for the first page. Click the Other Pages tab. 4 5 6 Choose the desired Paper Type and Paper Tray for the remaining pages. Tip! You cannot change the paper size for additional pages. The paper size for additional pages must always be the same size as the first page. 7 select the paper tray Click OK. Use this feature to specify a paper tray.

The lower tray option refers to the optional 250-sheet plain paper tray. This paper tray is standard equipment with some models and can be purchased as an accessory for all other models. To use the optional 250-sheet plain paper tray, you must also have the twosided printing accessory installed. For more information about accessories, see the HP Digital Copier 510/610 Reference Guide. 1 2 To select the paper tray for the current print job, select File, Print, select hp digital copier color series, then click Properties. Click the Setup tab. use the setup tab 17 hp digital copier 610 printing and software guide 3 Select one of the following from the Paper Tray list: Upper Tray: This tray must be used for specialty papers (e.g., photo paper), but it can also hold plain paper.

Lower Tray: This is the optional 250-sheet plain paper tray.

The additional paper tray signals the HP Digital Copier to select paper from this tray first. This tray only supports plain paper. Automatic: By default, the program attempts to feed from the optional 250-sheet plain paper tray first. If this tray has run out of paper, the copier/printer selects paper from the upper paper tray. If no 250-sheet plain paper tray is present, the upper paper tray is used regardless of the paper tray selection.

select paper type and size The HP Digital Copier's automatic media sensor automatically selects paper type and size for your print job, but you can also set your own print settings. · · In Paper Type, select the paper type you want for your print job. In Paper Size, select the paper size you want for your print job. print a photo on photo paper For high quality photo printing, we recommend that you use HP photo papers with your HP Digital Copier. You can use 2400 dpi resolution to print your photos.

For more information, see print using 2400 dpi on page 19. 1 To print on photo paper for the current print job, remove all paper from the upper paper tray, and then load the photo paper. For more information, see load paper on page 1. Select File, Print, select hp digital copier color series, then click Properties. Click the Setup tab. 2 3 4 @@Your HP Digital Copier automatically sets the Print Quality to Best. 18 use printing features hp digital copier 610 printing and software guide 5 6 print using 2400 dpi In the Paper Size list, choose the appropriate paper size. Click OK. Print at 2400 dpi to get the best print quality when you are printing on photo paper. With this setting, the HP Digital Copier prints significantly slower and temporarily uses a large amount of disk space (400 MB or more).

@@@Your HP Digital Copier automatically sets the Print Quality to Best. @@In the Paper Size list, choose the appropriate paper size. Select 2400 x1200dpi. @@Click the Setup tab. Click the Scale to Fit button. @@@@Tip! @@The two-sided printing accessory is standard equipment on some models. It can be purchased as an accessory for all other models. For more information about the accessory, see the HP Digital Copier 510/610 Reference Guide. 1 If you are using Windows 2000 or XP, make sure that the Automatic Two-Sided Printing Module option is activated. For more information, see use the configuration tab on page 26.

Tip! @@@@A dialog box appears. @@Select Book or Tablet. For binding on the side, select Book. For binding on the top, select Tablet.

[You're reading an excerpt. Click here to read official COMPAQ 610 user guide](http://yourpdfguides.com/dref/2853699)

<http://yourpdfguides.com/dref/2853699>

Click OK to close the dialog box.

Your HP Digital Copier begins printing. **Caution!** Both are adjustable. Click the Features tab. Click the Advanced Features button. Click the Features tab.

Tip! Click the Features tab. Watermarks can be useful when distributing draft documents or confidential documents. You can also customize your watermarks. To print a watermark on your current print job, select File, Print, select hp digital copier color series, then click Properties. Click the Features tab. In the Watermark area, select a watermark from the list. For a watermark on all pages, clear the First Page Only option. You can also edit an existing watermark or add a new one with the Edit option in the Watermark area. print last page first Use the Start Printing from Last Page option to reverse the page order of your print job so you will not be required to reorder your printouts. With this option selected, the last page of your document will be at the bottom of your printouts.

This feature is not available with two-sided printing. You can preview the effect of your changed print settings before you print. With this option selected, a preview is produced when you click OK. Click OK again in the preview to finish your print job. You can set the number of copies to print using the Properties dialog box. enable the hp preview feature set the number of copies To set the number of copies for the current print job, select File, Print, select hp digital copier color series, then click Properties. Click the Features tab. In the Copies box, type or select the number of copies you want to print. Click OK. use the features tab hp digital copier 610 printing and software guide use the color tab The Color tab allows you to adjust the characteristics that affect the appearance of your print job.

You can choose to: Print in grayscale Change the saturation, brightness, or color tone Whenever you make a change in print settings in this tab, you can confirm your change by viewing the image in the right corner, or by enabling the HP Preview feature. For more information, see enable the hp preview feature on page 23. use the services tab The Services tab contains an icon for the HP Toolbox, which contains a number of useful tools to maintain the efficiency of your copier/printer. The availability of the HP Toolbox tabs and features depends on your operating system. All of the following tools in the Services tab (with the exception of the Configuration tab) can also be accessed from the front panel of your copier/printer: display the toolbox calibrate your printer clean the printheads print a test page check ink levels use the configuration tab use printing features hp digital copier 610 printing and software guide display the toolbox Use one of the following methods to open the Toolbox: Click Start, point to Programs or All Programs, point to HewlettPackard, point to hp digital copier, then click Open the HP Toolbox.

Right-click the taskbar icon, if available, then select Open Toolbox. In an open document, select File, Print, then Properties. In the Properties dialog box, select the Services tab then click Open the HP Toolbox. calibrate your printer This option automatically aligns the printheads in your copier/printer. In the Services tab, click Open the HP Toolbox.

In the Device Services tab, click Calibrate the Device. Click Calibrate to start the calibration process. clean the printheads Use this feature when the Self-Test Report, which is generated from the front panel, shows streaking or white lines through any of the colored bars. Do not clean printheads unnecessarily; this wastes ink and shortens the life of your printheads. **Tip!** Although this feature is available in the Services tab, we recommend that you use the front panel instead. In the Services tab, click the Open the HP Toolbox icon. In the Device Services tab, click Clean the Printheads. On the next screen, click Clean. A dialog box will appear with the options Immediate Clean or Done. If the print quality on the test page is poor, click Immediate Clean.

If the print quality on the test page is good, click Done. If you select Immediate Clean, a new test page will print and a new screen will appear with the options, Prime or Done. If the print quality is poor, click Prime. If the print quality on the test page is good, click Done. If you select Prime, a new test page will print and a new screen will appear with the options Clean Again or Done. Select Clean Again if further cleaning is needed or click Done. When you are finished, click Close. use the services tab hp digital copier 610 printing and software guide print a test page This tool allows you to confirm that the connection between your copier/ printer and your computer are working properly. This tab is not available to users of Windows 98 and Me.

Your HP Digital Copier automatically sets the Paper Size to Banner.

Verify that the Paper Size is set correctly. Click OK to close the dialog box, and then click OK to print the banner. After the banner is printed, a message indicates that the job is complete. Tear off and remove any unused paper from the input tray. Press Enter on the front panel to eject any additional paper.

Remove your banner from the output tray, and lower the output tray back into its standard position. Reload the regular paper. print a presentation on transparency film For best results, we recommend that you use HP transparency film products with your HP Digital Copier. Load the transparency film into the paper tray. Select File, Print, select hp digital copier color series, then Properties.

Click the Setup tab. In the Paper Type list, point to Transparency Films, then click the transparency type. If you want to make notations on the back of the transparencies and erase them later without scratching the original, click the Setup tab, and select the Mirror Image check box. For more information, see reverse an image for iron-on transfers on page 16. Click OK to close the dialog box. Your HP Digital Copier automatically waits for transparencies to dry before releasing them. Ink dries more slowly on film. Be sure to allow enough time for the ink to dry before handling the transparency. print a group of addresses on labels or envelopes With your HP Digital Copier, you can print on a single envelope, groups of envelopes, or label sheets designed for inkjet printers. perform special print jobs hp digital copier 610 printing and software guide 1 Print a sample page on plain paper to confirm the accuracy of your format.

Place the test page on top of the label sheet, and then hold both pages up to the light. Check your label spacing to see how well each block of text aligns with each label.

[You're reading an excerpt. Click here to read official COMPAQ 610 user guide](http://yourpdfguides.com/dref/2853699)

<http://yourpdfguides.com/dref/2853699>

Make adjustments as needed. Load the labels or envelopes into the paper tray. For more information, see load envelopes on page 3. From the File menu, select Print. If you are printing labels, skip to step 7; if you are printing envelopes, select hp digital copier color series, then Properties. Click the Setup tab. In the Paper Size list, choose the appropriate envelope size. Click OK to close the dialog box.

Click OK in the Print dialog box. 2 3 4 5 6 7 stop a print job Whenever you cancel a print job, your HP Digital Copier prints any pages it has already started printing and then cancels the rest of the job. This can take a few minutes. cancel from the front panel cancel from the computer ! Press Cancel. Look for the Print cancelled message on your front panel display.

If it does not appear, press Cancel again. Although we recommend that you stop print jobs from the front panel, you can also cancel print jobs in the Printers folder. 1 Choose one of the following: On the Windows taskbar, click Start, point to Settings, and then choose Printers. For Windows XP, navigate from the Start menu to Printers and Faxes. Double-click the printer icon in the lower right taskbar.

Double-click hp digital copier color series. Select the job you want to cancel. In the Document menu, choose Cancel Printing or Cancel, or press the Delete key on your keyboard. It may take a few minutes to cancel your print job. 2 3 4 If these procedures do not cancel your print job, consult the instructions for canceling background printing in the online help for your program. 28 use printing features troubleshooting tips 4 This chapter provides tips for solving problems and improving the quality of your printing. Look for your problem in the following troubleshooting topics: printing problems printing is too slow two-sided printing problems USB connection problems communication problems problems uninstalling or reinstalling software get help For more information, also see the Troubleshooting chapter in the HP Digital Copier 510/610 Reference Guide. printing problems Use the following topics to solve problems that are related to the printing functions of your HP Digital Copier. If your HP Digital Copier is not printing, first verify the following: The printer is connected to the power source. The cable connections are secure.

The printer is turned on. The media is correctly placed in the paper tray. The copier/printer ink cartridge door is closed. The two-sided printing accessory or rear access door is attached. printing problems 29 hp digital copier 610 printing and software guide If your problem persists although all of the conditions above are met, refer to the following solutions. problem solution Power light is blinking If the On light is blinking, the printer is in the process of printing. No action is needed. Your HP Digital Copier will process the print job as quickly as it can. Ink cartridges need to be replaced If an ink cartridge expires or runs out of ink, it needs to be replaced. For more information, see Replacing Ink Cartridges in the HP Digital Copier 510/610 Reference Guide.

Printheads need to be replaced If multiple printheads fail, the printer may stop printing. For instructions on replacing printheads, see Replacing Printheads in the HP Digital Copier 510/610 Reference Guide. If none of the solutions above solve the problem, you may want to uninstall and reinstall the printer software. For more information, see uninstall and reinstall software on page 12. printing is too slow Several variables can slow printing performance. For more information, see the Troubleshooting chapter in the HP Digital Copier 510/610 Reference Guide. problem Multiple software programs are open solution If too many software programs are open, the copier/printer cannot print at its normal speed. Close all unnecessary software programs, then print the document again. Documents that contain graphics or photographs print slower than text documents. To print faster, open the Properties dialog box, then select one of the following: · In the Setup tab, select PhotoREt for photo paper printing.

· In the Color tab, select Low Memory Mode. Complex documents, graphics, or photographs are printing 30 troubleshooting tips hp digital copier 610 printing and software guide problem Automatic paper type option is enabled solution When the Automatic paper type option is enabled, it takes a few seconds for the printer to determine the appropriate paper type. To increase the print speed, specify a paper type. Two-sided printing Allow more time to print two-sided documents than does not seem to work to print single-sided documents. Printer software is outdated Computer does not meet system requirements Download the most recent software updates for the printer at: www.hp.com/go/copiers · Check the computer's RAM and processor speed. For more information, see system requirements on page 35. · Increase the space on your hard drive. If your computer has less than 100 MB available on the hard drive, the printer will require more time to process printing jobs.

Printhead is failing A failing, but usable, printhead might slow printer performance. Print a Self-Test Report from the front panel to check whether a printhead is failing. For more information, see Self-Test Report in the HP Digital Copier 510/610 Reference Guide. two-sided printing problems Several issues may occur when you try to print a two-sided document. For more information, also see Troubleshooting in the HP Digital Copier 510/610 Reference Guide. problem The option for two-sided printing cannot be selected solution In the Setup tab, verify that the paper type and size you have selected are supported by the two-sided printing accessory. For a list of supported paper types, see load specialty paper for printing on page 2. This means that the paper size selected in the Setup tab of the Properties dialog box is not supported by the two-sided printing accessory. Select a supported paper type and size. Paper size changes when the two-sided printing option is selected two-sided printing problems 31 hp digital copier 610 printing and software guide problem The binding margin is in the wrong place solution You may have selected an incorrect paper orientation (Book or Tablet).

On the Features tab of the Properties dialog box, verify that your selection places the binding along the side (Book) or the top (Tablet) of your paper. Only one side prints although Use the following solutions: the two-sided printing option is · Print the document using the manual selected two-sided printing feature. · Use a paper type supported by the two-sided printing accessory. · Use a paper size supported by the two-sided printing accessory.

Declaration of Conformity: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules.

Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. Class B limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy, and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures: · · · · Reorient the receiving antenna.

Increase the separation between the equipment and the receiver. Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
