D-Link
ANYWHERE & ANYTIME MONITORING

WIRELESS N HOME NETWORK CAMERA

<p>REMOTE MONITORING Remotely monitor your home or office over the Internet.</p>	<p>HIGH-QUALITY VIDEO The MJPEG codec offers optimized image quality and bandwidth efficiency for video streaming.</p>	<p>LOW-LIGHT RECORDING A low-lux image sensor allows you to capture video in various lighting conditions.</p>
		

CAMERA SURVEILLANCE FOR HOME & OFFICE
The DCS-930/930L is a unique and versatile surveillance solution for your home or small office. Unlike a traditional webcam, the DCS-930/930L is a complete system with a built-in CPU and web server that transmits high-quality video images for security and surveillance. Simple installation and an intuitive web-based interface offer easy integration with your Ethernet or 802.11n wireless network. The DCS-930/930L also comes with remote monitoring and motion detection features for a complete and cost-effective home security solution.

WIRELESS N CONNECTIVITY
The DCS-930/930L includes 802.11n wireless for fast and easy integration into your existing network environment. Wireless N allows you to stream high-quality video to remote sites and mobile devices. A Site Survey feature also allows you to view and correct to nearby wireless networks with ease. The DCS-930/930L also includes a standard Ethernet port for connections to traditional wired networks.

MYLINK FOR FAST AND CONVENIENT ACCESS TO YOUR VIDEO (DCS-930L)
Convenient myLink™ zero-t configuration setup gets you up and running in no time – just connect the DCS-930L, then register the device on the myLink™ website. The DCS-930L will then automatically configure itself and connect to the myLink™ service allowing for convenient access to your video feeds from anywhere with Internet access.

EASY TO CONFIGURE AND OPERATE
This network camera supports the Universal Plug-n-Play feature, which allows computers running on Windows XP/Vista/7 to automatically recognize the camera and add it to the network. Sign up with one of the Free Dynamic DNS services available on the web to assign a name and domain to the camera (e.g. mycamera.dlinkdns.com), and remotely access the camera without having to remember the IP address. You may also view up to 32 cameras from a central location using the included D-ViewCam software. D-ViewCam has a robust set of features including automated e-mail alerts which can instantly inform administrators of suspicious or unusual activities.
