2-BAY NETWORK STORAGE

HIGH PERFORMANCE
FASTER
READ/WRITE SPEEDS
GIGABIT CONNECTIVITY

ShareCenter™

dlinkgreen

DLNA CERTIFIED

SHARECENTER SHADOW

ADD SATA DRIVES WITH EASE*

Insert up to two internal 3.5-inch SATA hard drives by simply sliding them in – no tools or cables needed

EXTEND FUNCTIONALITY WITH ADD-ONS

Stream music, share files, create a blog, and do much more with add-ons that extend ShareCenter functionality

BACK UP AND PROTECT FILES

Protect your important files using RAID 1 technology to automatically copy data onto both hard drives†

SAFELY SHARE DIGITAL FILES LOCALLY AND OVER THE INTERNET

The ShareCenter™ Shadow 2-Bay Network Storage, when used with internal SATA drives*, enables users to share documents, files, and digital media such as music, photos, and videos with other users on a home or office network. Users can gain remote access to their files over the Internet using the built-in web file server or the secure FTP server. Keep data safe by giving rights to specific users or groups and assign them to folders with specific read/write permissions. This is ideal for an office environment with sensitive employee-specific data, or for the home, where children's access can be restricted to only age-appropriate materials. The ShareCenter Shadow also supports Time Machine which allows Apple® users to easily back up any Mac computers running OS X 10.5 or later.

STREAM DIGITAL MEDIA CONTENT WITH THE BUILT-IN DLNA-CERTIFIED MEDIA SERVER

Back up your digital media files to the ShareCenter Shadow for safekeeping, and enjoy the benefits of the built-in UPnP AV media server. Stream digital content to compatible media players such as the D-Link Boxee Box, PlayStation® 3, Microsoft® Xbox 360®, and D-Link MediaLounge product line.†

DO MORE WITH POWERFUL ADD-ONS

Powerful add-on applications extend NAS functionality and allow you to do more with your NAS. P2P applications offer access to a limitless collection of free content. Meanwhile, SqueezeCenter, Audio Streamer, and Ajaxplorer can be used to stream a music collection stored on the NAS across the internet. The powerful Gallery and Blog add-ons let you showcase your own photos or writing. Enjoy even more add-ons as they become available in the future.

CONNECT USB PRINTERS, STORAGE DEVICES, AND UPS MONITORS

Share a USB printer or scanner within the network by connecting it to the USB 2.0 drive. You may also plug in an external hard drive or flash storage device and share it with the entire network. A convenient USB button allows you to instantly copy the data on USB flash storage device to the NAS. Additionally, the ShareCenter supports UPS monitoring via USB to help maintain data integrity during a power failure.

ENJOY PERFORMANCE, PROTECTION, AND FLEXIBILITY

The availability of four different hard drive modes (Standard, JBOD, RAID 0, RAID 1) allows users to choose the configuration best suited to their needs. Standard mode creates two separate accessible hard drives. JBOD combines both drives to create a single, easy-to-use volume. RAID 0 combines both drives in a "striped" configuration, which provides the highest performance when using a Gigabit Ethernet connection. RAID 1 creates a copy of your data on both drives, providing maximum protection. If one drive fails while configured as RAID 1, the unaffected drive continues to function as a single drive until the failed drive is replaced. The new drive will then be re-imaged, allowing the ShareCenter Shadow to return to its full level of protection.

*SATA drives are not included with the ShareCenter Shadow and must be purchased separately.
