PRECAUTIONS FOR PROPER USE OF AIR CONDITIONER

Please observe the following instructions.

1. Operate the Selector Switch to run or stop the unit.
- Do not use Main Power Switch or Auxiliary Power Switch to operate unit.
2. Do not stick anything into the air outlet or inlet.
- It is dangerous and it can cause injury or damage.
3. Avoid exposing your body directly to a continuous cool air - flow for long periods.
- It is not good for your health.
4. Do not pour water on the unit to clean it.
- It is dangerous and it can cause injury or damage.
Never use solvents or harsh chemicals when cleaning the unit.
When the air inlet grill and cabinet are dirty, wipe with luke - warm water (below 40°C)
5. Avoid placing any obstacles near the inlet or outlet.
- If the inlet or outlet is blocked with any obstacle, it may cause damage to the unit.
6. Do not run or stop the unit frequently.
- If you run or stop the unit more than 4-5 times an hour, it can cause damage to the unit.
7. Wait at least 3 minutes before restarting the unit or in the case of power failure.
- If you turn on the unit within 3 minutes after power off, this can cause damage to the unit.
8. If the air conditioner is operated without an air filter, dust is not removed from the air, and resultant accumulation in the unit may lead to a failure.
- Do not forget to install the air filter.
9. The air filter should be cleaned at least once every two weeks.
10. When the unit is cleaned, set the Selector Switch at off position.
- And then unplug the power plug.
11. Never store gasoline or other flammable liquid near the air conditioner.
- It is very dangerous.
12. Do not force the controls on the front panel too much.
- It can cause damage the controls and the unit.
13. Set a comfortable temperature.
- Very low temperature setting considerably increase power consumption.
14. Be careful to keep room temperature comfortable.
- Avoid continuous direct air flow on you or a sick person while sleeping.
15. Do not remove the plug by pulling the power cord.
- Damage to the cord and may cause shock hazard.
16. This air-conditioner must used 20°C(min)-43°C(max) outdoor and 20°C(min)-32°C(max) indoor on the temperature range.
17. The appliance is not intended for use by young children or infirm persons without supervision.
18. Young children should be supervised to ensure that they do not play with the appliance.

Determine Window Location. Determine a suitable location. The window where the Air Conditioner is to be installed should have enough strength to bear the weight of the Air Conditioner. 2. Measure unit's dimensions 3. Install the Mounting Angle at the Proper Location. Install the Air Conditioner using the Mounting Angle or other Hardware to be installed as shown in Fig.1 For proper drainage, Rear side of the unit should be inclined about 5mm lower.

Mounting Angle Close up the gap unit 5mm wall Fig. 1 Mounting Angle Installation.

4. Insert unit in window. With 2 people, lift unit and insert it into the window opening. CAUTION : Two people must work together to avoid personal injury. 5. Finish opening Close up the gap between unit and window using the sponge or tape for insulation as shown in Fig. @@ Properly control the room temperature. 2. Avoid the unit being exposed to direct sunlight. Keep direct sunlight from the room.
3. @@@@ Select this setting for quiet air circulation without cooling. Select this setting for cooling operation with HIGH FAN. @@ Usually the midpoint is a good starting position. @@ · Turn clockwise for a cooler room temperature. @@@@ Do not block air flow to and from unit. @@@@ It should be washed at least once every week during operation. 1. Remove the Air Filter from the front grill by pulling up. 2.

Clean Air Filter with a vacuum cleaner or lukewarm, soapy water. 3. Shake it when clean to remove moisture completely. @@@@ @@@@ 2. Wash air conditioner with lukewarm, soapy water as needed. Rinse and dry thoroughly. 3. If using concentrated liquid detergent, dilute in warm water first. 4. @@ 5. @@ 6. @@ 7. Do not use abrasive cleaners. @@@@ Do not under any circumstances cut or remove the round grounding prong from the plug. Do not use a two prong adapter.

· USE OF EXTENSION CORD SET Because of potential safety hazards under certain conditions, we strongly recommend against the use of an extension cord set. However, if you still elect to use an extension cord, it is absolutely necessary that it is earthed and the marked rating of the extension cord set should be 250V 10A (Min.). The socket-outlet shall be installed near the equipment and shall be easily accessible. WARNING : To avoid death, personal injury or properly damage due to electrical shock, do not use an extension cord or pinch the power cord.

Do not remove the warning tag from the power cord. · REPLACEMENT OF SUPPLY FLEXIBLE CORD. If the supply flexible cord is damaged, it must be replaced by the manufacturer or its service agent or similarly qualified person in order to avoid a hazard. CAUTION : The appliance shall be installed in accordance with national wiring regulations. 8 BEFORE CALLING FOR SERVICE When you find something wrong with your room air conditioner, please carefully check the following items. If you are unable to find the cause of trouble, contact your service dealer. Difficulty · Air conditioner does not operate. Possible Cause · No power to unit. Suggested Solution · Set Fan Control Select to position other than "OFF". · Confirm power cord is plugged in.

· Verify main power switch (main circuit breaker) or fuse of the unit is good. · Wait 3 to 4 minutes and restart the unit. · Clean air filter. · When blocked by curtains, blinds, or furnitures, etc., the air flow is restricted and cooling performance is affected. · Adjust thermostat correctly. · Check with dealer to determine proper unit capacity for application. · Tighten any loose parts. · Provide additional support. · Normal in high humidity.

· Stop noise by allowing water to drain from base fan through drain hole. @@@@ · Air conditioner undersized for application. @@ · Water hitting fan. · Ords from unit · Mold, mildew or algae formation on wet surfaces. · Water in base pan. · Normal for operation in humid areas.
