**Manual abstract:**

Go only as far as test printing; you will use the procedures in this guide to connect the Macintosh. Once you see that your printer operates properly, install Epson Talk as described below. Installing the Interface Card 1. Make sure that both the printer and computer are turned off and that all power and interface cables are removed from the printer. e Avoid touching the printer circuits or card circuit board contacts. Otherwise, you may damage them.

Caution: 2. Turn your printer so that its interface cover or shield plate faces you. 3. Use a screwdriver to remove the screws securing the cover or shield plate; then lift it off.

ActionLaser 1000/1500 EPL-8000 4. Slide the interface board into the grooves in the interface slot. Push it in firmly to make sure it connects to the printer's internal socket. ActionLaser 1000/1500 EPL-8000 2 5. Secure the interface with the two screws provided with the card.

6. 7. Do not touch the gold connectors along the card's edge. Do not use too much force when you insert and remove the card. Otherwise, you may damage it.

1. Make sure the printer is turned off. 2. (Do not use slot B.) ActionLaser 1000/1500 EPL-8000 3. Gently but firmly slide the card into the slot as far as it can go. 4. Press the ON LINE button to take the printer off line. 2. Press the SelecType Level 2 button.

3. Press V until EMULATION appears on the display. 4. Press b. 5. Press V until CH O appears. 6. Press b. b 7. Press V until PS appears.

8. Press F to set the PS emulation. 9. Click LaserWriter in the Chooser menu. The name of your printer appears in the Select a LaserWriter box.

begin printing using your application software. For the EPL-8000 you have an Epson EPL-8000 printer, you must have aj%mware version 22.48 or later to use Epson Talk. To find out your printer's firmware version, print a status sheet as described in your printer manual. If you do not have the above firmware version, please call the Epson Connection at (800) 922-8911.

Note: If 1. Press the ON LINE button to take the printer off line. 2. Hold down the SelecType button until the Level 2 light comes on. 3. Press v until MODE ASSIGN appears on the display. 4. Press b until CH P appears. 5. Press v until CH O appears.

6. Press F. 7. Press v until CH O PS appears. 8. Press ä to set the PS setting. 9. Press 4 to return to MODE ASSIGN. 10. Press v until P-CONFIG.

SAVE appears. 5 11. Press b twice to save the CH O PS setting. 12. Press 4 twice to return to the READY message.

13. Press the ON LINE button. Note: The READY message may not show O PS (indicating the optional interface and PostScript) until after your first print job is sent from your computer to the printer each time you turn on your printer. 14. Make sure that AppleTalk is active in the Chooser under the Apple menu on your Macintosh.

15. Click LaserWriter in the Chooser menu. EPL-8000 appears in the Select a LaserWriter box. Begin printing using your application software. 6 .
