The advertisement features the Haier logo at the top center, with the tagline "What The World Comes Home To". Below the logo is a photograph of a wine cooler. To the right of the cooler, the text "Wine Cooler" is written in English, "Rafrâchisseur à Vin" in French, and "Enfriador de Vino" in Spanish. At the bottom of the advertisement, there is a table with three rows of text: "User Manual-", "Guide de l'Utilisateur-", and "Manual del Usuario-". To the right of these rows, the model number "BC112G" is displayed in a grey box. The advertisement is framed by a thin black border with small crop marks at the corners.

Manual abstract:

When using this appliance, always exercise basic safety precautions, including the following: 1) Use this appliance only for its intended purpose as described in this use and care guide. 2) This wine cooler must be properly installed in accordance with the installation instructions before it is used. See grounding instructions in the installation section. 3) Never unplug your wine cooler by pulling on the power cord. Always grasp the plug firmly and pull straight out from the outlet. 4) Repair or replace immediately, all electric service cords that have become frayed or otherwise damaged. Do not use a cord that shows cracks or abrasion damage along its length, the plug or the connector end. 5) Unplug your wine cooler before cleaning or before making any repairs. Note: If for any reason this product requires service, we strongly recommend that a certified technician performs the service. 6) If your old wine cooler is not being used, we recommend that you remove the door and leave the shelves in place.

This will reduce the possibility of danger to children. 7) This wine cooler should not be recessed or built-in an enclosed cabinet. It is designed for freestanding installation only. 8) Do not operate your wine cooler in the presence of explosive fumes. @@Before you throw away your old wine cooler, take off the doors.

@@As per UL 250 11.2.6 Thank you for using our Haier product. @@Remember to record the model and serial number. @@You will need it to obtain warranty service.

where there is proper air circulation, plumbing and electrical connections. · The following are recommended clearances around the wine cooler: Sides.

.....
....2 "(50mm) Top.

.....
.....
....2" (50mm) Back.....

.....
.....
..2" (50mm) · Do not over fill your wine cooler for proper internal air circulation. 55 English English Electrical Requirement · Make sure there is a suitable power Outlet (115 volts, 15 amps outlet) with proper grounding to power the wine cooler. · Avoid the use of three plug adapters or cutting off the third grounding in order to accommodate a two plug outlet. This is a dangerous practice since it provides no effective grounding for the wine cooler and may result in shock hazard. Install Limitations · Do not install your wine cooler in any location not properly insulated or heated e.g. garage etc. Your wine cooler was not designed to operate in temperature settings below 55° Fahrenheit.

· Select a suitable location for the wine cooler on a hard even surface away from direct sunlight or heat source e.g. radiators, baseboard heaters, cooking appliances etc. Any floor unevenness should be corrected with the leveling legs located on the front and rear bottom corners of the wine cooler.

@@@During this time the Red Wine light may stay on. @@There are 6 settings plus 0 (OFF). Initially set the temperature setting to 3.

@@@@@@@@@@@@@@@@Now you are in temperature set mode. @@@@@@@@@@@@@@@@@@There are two settings. @@@@# 2 Mid Range OFF Red 8 8 English English Shelving · The shelves are designed for flexibility and easy cleaning.

To accommodate different sized bottles the shelves slide out and can be moved up or down into any of the tracks molded into the cooler cabinet. Larger bottles or Magnums can be more easily accommodated on the cross shelves of the bottom basket of the cooler. You will notice that the shelves are designed so the bottles do not line-up directly over one another. This allows free air movement and provides more space. Interior Light · To complement the look of your wine collection, a soft light has been built into the wine cooler.

Simply push the "Light/Set" button on the electronic controlled unit, and the light comes on, push again for off. On the mechanical control units, the light switch is on the front for your convenience. For maximum energy efficiency, leave light off when not viewing your collection. Door Lock (electronic controlled unit only) · For safety and security, your wine cooler is equipped with a door lock. To eliminate the risk of accidental child entrapment, the lock was designed so that the door will not lock until the key is removed (consistent with UL requirements).

Normal Operating Sounds You May Hear · Boiling water, gurgling sounds or slight vibrations that are the result of the refrigerant circulating through the cooling coils. · The thermostat control will click when it cycles on and off. 99 English English Proper Wine Cooler Care and Cleaning Cleaning and Maintenance Warning: To avoid electric shock always unplug your wine cooler before cleaning. Ignoring this warning may result in death or injury. Caution: Before using cleaning products, always read and follow manufacturer's instructions and warnings to avoid personal injury or product damage.

General: · Prepare a cleaning solution of 3-4 tablespoons of baking soda mixed with warm water. Use sponge or soft cloth, dampened with the cleaning solution, to wipe down your wine cooler. · Rinse with clean warm water and dry with a soft cloth. @@@@Gaskets must be kept clean and pliable to assure a proper seal. · Petroleum jelly applied lightly on the hinge side of gaskets will keep the gasket pliable and assure a good seal.
