HI 7632-00 Conductivity Probe

HI 7632-00 is an ITC (Temperature and Conductivity) probe that provides temperature compensated conductivity measurements.

It can be used with the following accessories:

- HI 98322P 0.10 to 10.00 µS/cm
- HI 98322B 0.01 to 10.00 µS/cm
- HI 98322Z 0.10 to 10.00 mS/cm

SAFETY:
HI 7632-00 probe is recommended for a period of one year. The warranty is limited to repair or replacement of the probe.

Storage: Do not store in extreme conditions, especially in high or low humidity environments.

If a warning message appears on the probe, the user should refer to the manual for more information. The probe may be used for a limited period of time if the warning message is not critical. If the warning message is critical, the probe should be replaced immediately.

Do not use the probe in environments where it may be exposed to high temperatures, high humidity, or other conditions that may damage the probe. The probe should be stored in a cool, dry place when not in use.
