Super Poo-Chi™ Care and Play Guide

Congratulations, you now have a special new friend. Super Poo-Chi™ is a super smart, super fun pal who loves to play! Because Super Poo-Chi is so smart, he can learn to respond to your voice and actually do tricks! But this is only the beginning. Please carefully review the Play Guide and Care Guide for Super Poo-Chi before you start playing so you will be able to have loads of fun with your new friend!

1. Getting started

Before we start you need to get to know about Super Poo-Chi's sensors. Super Poo-Chi's sensors include:

Head switch: used to wake-up Super Poo-Chi, praise him or pet him.

Sound sensor: used to receive voice commands, to hear other sound.

Bone sensor: used to feed him.

Chest switches: SET button (A) and MODE button (B), also used for "bad puppy".

Eye sensor: enables Super Poo-Chi to play with other Robo-Chi's.

In addition to his sensors, Super Poo-Chi has very expressive eyes so that you can tell how he is feeling by looking at them:

Function of eyes:

heart: very happy

smile: happy

circle: neutral

anger: not happy

7-7: waiting for voice command or judgement for proper reply or not.

Head Eyes

Smile Eyes

Circle Eyes

Angry Eyes

7-7 Eyes

Now that you are acquainted with Super Poo-Chi's sensors the next thing you need to do is install his batteries. It is best to have an adult install the batteries.

2. How to install batteries

Have an adult carefully loosen the screws on the battery door and then install 4 "C" (AAA) size batteries. Be especially careful to install the batteries in the correct direction according to the positive (+) and negative (-) signs on the batteries.

1. Unscrew and remove the battery compartment door under Super Poo-Chi's neck.
 2. Insert 4 "C" LR14 batteries as shown inside the battery compartment.
 3. Attach the battery compartment door and fasten the screw.
 4. Press the RESET button located inside Super Poo-Chi's mouth (see RESET section for more details).
- When replacing with new batteries, please install after Super Poo-Chi goes into a deep sleep.
- * Do not dispose of batteries in fire, batteries may explode or leak.

- To ensure proper function:
- Do not mix old and new batteries.
 - Do not mix alkaline, standard or rechargeable batteries.
 - Battery installation should be done by an adult.
 - Non-rechargeable batteries are not to be recharged.
 - Rechargeable batteries are to be removed from the toy before being charged (if reusable).
 - Rechargeable batteries are only to be charged under adult supervision.
 - Only batteries of the same or equivalent types are recommended as to be used.
 - Batteries are to be inserted with the correct polarity.
 - Exhausted batteries are to be removed from the toy.
 - The supply terminals are not to be short-circuited.
- Replace with new batteries at the first sign of erratic operation. When the batteries are correctly installed, Super Poo-Chi will beep continuously to let you know he is ready to start. You then fit his head switch to begin training.

3. Teaching Super Poo-Chi™ with your voice

It is very important that when you teach Super Poo-Chi to recognize your voice, that you do it in a quiet room without any background noise or distractions. This means that the TV should not be on and other people should not be talking while you are doing the training. This will make sure that you properly train Super Poo-Chi to recognize your voice.

To train Super Poo-Chi to recognize your voice, position yourself directly in front of Super Poo-Chi approximately 6-8' apart, as shown in this illustration.

1. When the batteries are installed, Super Poo-Chi will beep continuously.
2. To begin voice training, press the head switch on Super Poo-Chi.
3. Super Poo-Chi will then issue a series of prompts asking you to say each of the commands you will need to train Super Poo-Chi to be able to recognize.

To train Super Poo-Chi to recognize your voice follow these steps:

- A. Super Poo-Chi will say "say a name".
- B. Speaking clearly, say the name you want give your new friend.
- C. Super Poo-Chi will ask you to repeat the name, clearly repeat the same name you just said.
- D. If you have done this properly, Super Poo-Chi will beep and go to the next prompt, otherwise he will ask you to repeat the name again.

Next, you train Super Poo-Chi to recognize specific commands:

- PAW:
 - A. Super Poo-Chi will prompt you to say "PAW".
 - B. Super Poo-Chi will then prompt you to repeat "PAW".
 - C. If you have done this correctly then Super Poo-Chi will beep and proceed to the next prompt.
- GOOD DOG:
 - A. Super Poo-Chi will prompt you to say "GOOD DOG".
 - B. Super Poo-Chi will then prompt you to repeat "GOOD DOG".
 - C. If you have done this correctly then Super Poo-Chi will beep and proceed to the next prompt.
- LET'S SING:
 - A. Super Poo-Chi will prompt you to say "LET'S SING".
 - B. Super Poo-Chi will then prompt you to repeat "LET'S SING".
 - C. If you have done this correctly then Super Poo-Chi will beep and proceed to the next prompt.
- LIE DOWN:
 - A. Super Poo-Chi will prompt you to say "LIE DOWN".
 - B. Super Poo-Chi will then prompt you to repeat "LIE DOWN".
 - C. If you have done this correctly then Super Poo-Chi will beep and proceed to the next prompt.
- SIT:
 - A. Super Poo-Chi will prompt you to say "SIT".
 - B. Super Poo-Chi will then prompt you to repeat "SIT".
 - C. If you have done this correctly then Super Poo-Chi will beep and proceed to the next prompt.

4. Getting Super Poo-Chi™ to respond to voice commands

Once you have taught Super Poo-Chi to recognize your voice he is ready to start responding to your commands. To give voice commands to Super Poo-Chi follow these steps:

- 1) Wait until Super Poo-Chi has stopped moving and has circle eyes.
- 2) Speaking clearly call out Super Poo-Chi's name, therefore if you have named your dog "Spot", call out "Spot".
- 3) If your dog recognizes his name, his eyes show "7-7" and he will say "Tada".
- 4) While his eyes show "7-7" you can give him a command from the list: PAW, GOOD DOG, LET'S SING, LIE DOWN, SIT.

Depending on the stage of development your dog is in and how well you have trained him will determine if he behaves properly and performs the trick you have told him to do. Remember, if Super Poo-Chi responds correctly to your commands, reward him with a pat on the head or feeding him his kibble. If he does not respond correctly, press either chest button. This will help him to remember his mistakes.

SUPER POO-CHI WILL NOT RESPOND TO ANY VOICE COMMANDS UNLESS YOU FIRST SAY HIS NAME TO GET HIS ATTENTION. THEREFORE IF YOU WANT YOUR DOG TO GIVE A PAW, YOU HAVE TO SAY HIS NAME FIRST, WAIT UNTIL HIS EYES SHOW "7-7" AND THEN SAY "PAW". IF YOU DO NOT SAY HIS NAME FIRST HE WILL NOT PROPERLY RESPOND TO OTHER COMMANDS.

5. Stages of development

Super Poo-Chi will go through 3 stages of development, Baby, Puppy and Adult. In the Adult stage, Super Poo-Chi will become a faithful dog, talented and loyal dog. Just like a real dog, how you train and play with Super Poo-Chi will determine how he develops! You can actually choose how you want Super Poo-Chi to develop. You have 2 choices, Nourish mode or Adult mode. In Nourish mode, you get to train your Super Poo-Chi to do tricks. In Adult mode, your Super Poo-Chi will automatically know how to do all his tricks. In both modes your voice commands Super Poo-Chi to do his tricks.

To enter Nourish mode press Super Poo-Chi's (A) chest button within 4 seconds of the completely training Super Poo-Chi to recognize your voice. To enter Adult mode press Super Poo-Chi's (B) chest button immediately after you press (A) chest button until you hear a "BEEP" (approximately 4 seconds). Then immediately press head switch for 4 seconds until you hear another "BEEP". You have to repeat Super Poo-Chi to recognize your voice one time. If you do not press either chest button after the voice training, Super Poo-Chi will automatically go into Nourish mode.

Press left chest (A) button to go to Nourish mode. Press right chest (B) button, then head switch button to go to Adult mode.

Nourish mode

There are three stages of development in Nourish mode: Baby, Puppy, and Adult.

- Baby: In the baby stage Super Poo-Chi can not understand your voice commands very well. Also he can not stand up for long time and is only able to sing one song.

- Puppy: When Super Poo-Chi develops to Puppy mode, the "Tada" sound is heard and he will start to bark.

- Adult: The puppy age is a very important development stage during which time Super Poo-Chi learns to do tricks by your voice commands. If you play a lot you will be able to teach Super Poo-Chi to do many things!

Teaching your dog tricks

Using the trained voice commands you can teach your dog to respond to your commands properly. To do this follow these steps:

- 1) Say your dog's name.
- 2) When his eyes show "7-7" give him a command.
- 3) If he does what you want him to do you will then need to reward him. You can do this 3 ways:
 - a. say "good dog"
 - b. give him his kibble
 - c. pat his head

Depending on the stage of development your dog is in and how well you have trained him will determine if he behaves properly and performs the trick you have told him to do. Remember, if Super Poo-Chi responds correctly to your commands, reward him with a pat on the head or feeding him his kibble. If he does not respond correctly, press either chest button. This will help him to remember his mistakes.

SUPER POO-CHI WILL NOT RESPOND TO ANY VOICE COMMANDS UNLESS YOU FIRST SAY HIS NAME TO GET HIS ATTENTION. THEREFORE IF YOU WANT YOUR DOG TO GIVE A PAW, YOU HAVE TO SAY HIS NAME FIRST, WAIT UNTIL HIS EYES SHOW "7-7" AND THEN SAY "PAW". IF YOU DO NOT SAY HIS NAME FIRST HE WILL NOT PROPERLY RESPOND TO OTHER COMMANDS.

6. Stages of development

Super Poo-Chi will go through 3 stages of development, Baby, Puppy and Adult. In the Adult stage, Super Poo-Chi will become a faithful dog, talented and loyal dog. Just like a real dog, how you train and play with Super Poo-Chi will determine how he develops!

You can actually choose how you want Super Poo-Chi to develop. You have 2 choices, Nourish mode or Adult mode. In Nourish mode, you get to train your Super Poo-Chi to do tricks. In Adult mode, your Super Poo-Chi will automatically know how to do all his tricks. In both modes your voice commands Super Poo-Chi to do his tricks.

It is very important that you reward your dog for doing tricks properly or he will not learn to do them on command.

Repeating the above learning procedure allows your dog to learn more. But like any friend, play is important too and your dog also needs a break from his training. Play with your dog to give Super Poo-Chi a break and relax. Playing also is very important for Super Poo-Chi to develop his own personality.
