Quick installation guide Travelstar 25GS, 18GT, & 12GN ATA/IDE

Model: DARA-225000 DARA-218000
DARA-215000 DARA-212000
DARA-209000 DARA-206000

Handling precautions

- Wear a wrist strap while handling the drive to prevent damage from Electrostatic Discharge (ESD).
- Set the drive down gently to prevent damage from impact or vibration.
- Do not open the ESD bag containing the drive until needed.
- Handle the drive carefully by the edges. Do not touch the exposed printed circuit board or any electronic components.
- Do not press on the top or bottom of the drive.
- Do not cover the drive's breather hole.

Quick installation

IMPORTANT: Back up all data before proceeding with installation!

Set the jumpers

- **Master drive.** No jumpers are required if the drive is the only drive in a system or the Master drive in a two-drive system.
- **Slave drive.** If the drive is the Slave drive in a two-drive system, jumper setting A2 (see opposite) is required.
- **Cable Select.** Consult the system manual to see if your computer supports Cable Select before choosing the A3 jumper setting.

Attach the drive

Consult your system manual for instructions on how to complete the physical installation of the drive.

Jumper settings

- A1. Master
- A2. Slave
- A3. Cable Select
- A4. Never Attach a Jumper Here
- A5. Never Attach a Jumper Here

Configure your computer

1. Turn on your computer. Your computer may detect a configuration change and prompt you to proceed to the Setup screen.
2. If your computer does not prompt you to reconfigure, enter your computer's Setup, typically by key selection or keyboard combinations during power-on or during a reboot. Refer to your system manual for the proper key sequence. If the computer fails to boot up, power off, remove the drive, and return your system to its original configuration. Reboot and enter your computer's Setup. Follow the directions in step 3, then attach the drive.
3. Select **Auto Detect** if your computer Setup supports this feature. If your computer does not support **Auto Detect**, select the appropriate UDT (User Definable Type) for the drive.
