Hitachi Global Storage Technologies

Quick installation guide Hitachi Travelstar 40GNX

2.5 inch ATA/IDE hard disk drive

Enhanced Availability models

Models: IC25N040ATCX05
IC25N020ATCX05

Handling precautions

- Wear a grounded wrist strap while handling the drive to prevent damage from Electrostatic Discharge (ESD).
- Set the drive down gently to prevent damage from impact or vibration.
- Do not open the ESD bag containing the drive until needed.
- Handle the drive carefully by the edges. Do not touch the exposed printed circuit board or any electronic components.
- Do not press on the top or bottom of the drive.
- Do not cover the drive's breather hole.

Cable Select. Setting A3 in the illustration. Consult the system manual to see if your computer supports

Cable Select.

Jumper settings

A1: Master A2: Slave A3: Cable Select
A4 & A5: Never attach a jumper in these positions!

Quick installation

Installation of this Hitachi Travelstar drive in some notebooks may require use of unique hardware (such as mounting trays, connecting cable, insulating material). If you are uncertain if hardware is needed, consult your notebook manufacturer as this operation may require a qualified technician.

Back up all data before beginning installation.

1. Set the jumpers

- Master drive.** No jumper is required if the drive is the only drive in a system or the Master drive in a two-drive system.
- Slave drive.** If this is the Slave drive in a system, place a jumper in setting A2. (See the A2 setting in the illustration.)

2. Attach the drive

For assistance on the physical installation of the drive, consult your system manual.

3. Configure the computer

- Turn on the computer.
- Enter Setup.
- Go to Hard Disk Drive Configuration.
- Select Autodetect if it is available.
- If Autodetect is not available, set to User and set to appropriate parameters from the table below.
- Save the settings.
- Exit.

Photographs may show design models.

@@@@@If the drive is not recognized in the BIOS, set the BIOS options of your computer system to Auto Detection and LBA mode if available. Once the drive is recognized correctly in the BIOS, it is ready to be partitioned and formatted. Your operating system setup utility will provide instructions on how to partition and format your drive before it installs the operating system. For additional information, see our "Partitioning and Formatting Guide posted at:
