Hitachi Global Storage Technologies

Quick installation guide
Hitachi Travelstar 60GH & 40GN
2.5 inch ATA/IDE hard disk drive

Models: IC25T060ATCS05
IC25N040ATCS04
IC25N030ATCS04
IC25N020ATCS04
IC25N010ATCS04

Handling precautions

- Wear a grounded wrist strap while handling the drive to prevent damage from Electrostatic Discharge (ESD).
- Set the drive down gently to prevent damage from impact or vibration.
- Do not open the ESD bag containing the drive until needed.
- Handle the drive carefully by the edges. Do not touch the exposed printed circuit board or any electronic components.
- Do not press on the top or bottom of the drive.
- Do not cover the drive's breather hole.

Quick installation

Installation of this Hitachi Travelstar drive in some notebooks may require use of unique hardware (such as mounting trays, connecting cable, insulating material). If you are uncertain if hardware is needed, consult your notebook manufacturer as this operation may require a qualified technician.

Back up all data before proceeding with installation.

1. Set the jumpers

- Master drive.** No jumper is required if the drive is the only drive in a system or the Master drive in a two-drive system.
- Slave drive.** If this is the Slave drive in a system, place a jumper in setting A2. (See the A2 setting in the illustration.)

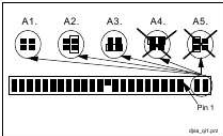

2. Attach the drive
For assistance on the physical installation of the drive, consult your system manual.

3. Configure the computer

- Turn on the computer.
- Enter Setup.
- Go to Hard Disk Drive Configuration.
- Select Autodetect if it is available.
- If Autodetect is not available, set to User and set to appropriate parameters from the table below.
- Save the settings.
- Exit.
- Reboot the system from a floppy disk.

4. Cable Select. Setting A3 in the illustration. Consult the system manual to see if your computer supports Cable Select.

Jumper settings

A1. Master A2. Slave A3. Cable Select
A4 & A5. Never attach a jumper in these positions!
