The Readme file contains HP support contact information, operating system requirements, and the most recent updates to your product information. Install electronic Help and Readme To install the electronic Help, insert the software CD in your computer and follow the onscreen instructions. Make sure the cable connections are secure. If you are still unable to print, uninstall and reinstall the software: Note: The uninstaller removes all of the HP software components that are specific to the device. Remove the CD from the computer's CD-ROM drive, and then disconnect the USB cable from the computer. Temporarily disable any software firewall and close any anti-virus software. Re-start these programs after the printer software is installed.
