**Manual abstract:**

**IMPORTANT:** This cutting machine is capable of amputating hands and feet and throwing objects. Failure to observe the following safety instructions could result in serious injury or death. Be familiar with the controls and the proper use of the equipment. @@Local regulations may restrict the age of the operator. Never mow while people, especially children, or pets are nearby. @@While mowing, always wear substantial footwear and long trousers. Do not operate the equipment when barefoot or wearing open sandals. @@- Refuel outdoors only and do not smoke while refueling. - Add fuel before starting the engine. Never remove the cap of the fuel tank or add petrol while the engine is running or when the engine is hot.

- If petrol is spilled, do not attempt to start the engine but move the machine away from the area of spillage and avoid creating any source of ignition until petrol vapors have dissipated. Before using, always visually inspect to see that the blades, blade bolts and cutter assembly are not worn or damaged. replace worn or damaged blades and bolts in sets to preserve balance. On multi-bladed machines, take care as rotating one blade can cause other blades to rotate.

Do not operate the engine in a confined space where dangerous carbon monoxide fumes can collect.

Mow only in daylight or in good artificial light. avoid operating the equipment in wet grass , where feasible. Always be sure of your footing on slopes. Walk, never run. For wheeled rotary machines, mow across the face of slopes, never up and down.

Use extreme caution when reversing or pulling the lawnmower towards you. â· Stop the blade if the lawnmower has to be tilted for transportation when crossing surfaces other than grass, and when transporting the lawnmower to and from the area to be mowed. @@Do not change the engine governor settings or overspeed the engine. @@ disengage all blade and drive clutches before starting the engine. @@@@Do not put hands or feet near or under rotating parts. Keep clear of the discharge opening at all times. Never pick up or carry lawnmower while the engine is running. @@@@ go slow when using a trailing seat. @@@@Allow the engine to cool before storing in any enclosure. @@If the fuel tank has to be drained, this should be done outdoors.

@@Learn and understand their meaning. @@ slip vinyl bindings over frame. @@Do not drag the bag when emptying, it will cause unnecessary wear. The mower can be set to different cutting levels. Fill the engine with engine oil. Fill the tank with petrol, not oil-blended. Both lead-free and lead-containing petrol may be used. Do not fill with petrol while the engine is running. To start a cold engine, push primer (3) times before trying to start. use a firm push.

This step is not usually necessary when starting an engine which has already run for a few minutes. â· Hold engine brake yoke to the handle and pull on starter handle quickly. To "STOP" engine, release engine brake yoke. NOTE: In cooler weather it may be necessary to repeat priming steps. In warmer weather over priming may cause flooding and engine will not start.

If you do flood the engine wait a few minutes before attempting to start and DO NOT repeat priming steps. Forward drive is engaged (1) and disengaged (2) with the clutch bar at the top of the handle. The mower should not be used on ground that slopes more than 15°. This could cause engine lubrication problems. Before mowing, objects such as twigs, toys and stones should be removed from the lawn.

Mow the lawn twice weekly during the most active periods of growth. @@Mow with a high cutting height setting the first time. examine the result and lower the mower to the desired setting. Mow slowly or mow the grass twice if it is very long. @@After 5 hours running time, tighten screws and nuts. check the oil. @@The level should be between FULL and ADD. Note: the dipstick must be screwed all the way down in order to indicate correct oil level. Avoid filling with too much oil. Tighten the screw properly when reassembling.

Change oil after each season or after 25 hours running time. Run the engine warm, remove the spark plug lead. Remove the drain plug from bottom of engine and drain oil. Fill with new oil. Before public transporting, engine oil and petrol must be removed. SNCH 11, Route de Luxembourg L-5230 Sandweiler/TUVRRheinland Complies with the provisions and current amendments of the following European directives: Â·.
