If engine fails to start after three pulls of the pull cord, push primer bulb three times and repeat step 3. Position and push primer bulb firmly three times before starting engine.

(if engine stopped because it ran out of fuel, refuel engine - push primer bulb three times. Move the Engine Speed Control to the FAST `` position before starting. (J1) 3. Pull the operator presence control (OPC) to release the brake on the engine and the blade. (J2) 4. Pull the recoil starter fully towards you until you feel the full resistance, return the handle slowly then pull the handle firmly towards you to its full extent. (J3) 5. After the engine has started, allow to run for 30 seconds before commencing to use. Forward drive is engaged and disengaged with the Powerdrive lever at the top of the handle. (J7) 2.

Releasing the Powerdrive Lever stops the forward drive automatically. Turn the key and hold until the engine starts. (J8) The key will return to the original position when released. 3. If the engine fails to start when you turn the key your battery may need charging.

(See page 7) Engaging the Drive - See Royal 43S Stopping - See Royal 43S How to Mow · Due to engine lubrication limitations, the mower should not be used on slopes in excess of 30°. 1. Start mowing from the outside edge of the lawn, mowing in strips in alternate directions 2. Mow twice a week in the growing season, your lawn will suffer if more than one third of its length is cut at one time and this may also result in poor collection. Please Note: Do not overload your Lawnmower When mowing in long thick grass a first cut with the cutting height adjusted to its highest setting, see Cutting Height, will help reduce engine overload and will help prevent damage to your lawnmower.

Pull the operator presence control (OPC) to release the brake on the engine and the blade. Pull the height adjustment lever away from the location slots and move it to the selected position. IMPORTANT Release the Operator Presence Control, to stop the engine, wait until the blade has stopped and disconnect the spark plug lead:- before clearing a blockage; - before checking, cleaning or working on the appliance How to Charge the Battery (ROYAL 43SE)

IMPORTANT 1. stop your lawnmower. Never use water for cleaning your lawnmower. Not clean with chemical, including petrol, or solvents 3. Remove the cap from - some can destroy critical plastic parts. Turn machine on it's side with the exhaust uppermost. Remove grass from under the deck with a charging connection on battery brush. Using a soft brush - remove grass clippings from 5.

Plug the battery charger the engine air intakes and exhaust (L3), cutting into a domestic electric socket. Height adjustment area, around the wheel and/or is overheating, immediately disconnect the spark plug lead. If the blade is damaged or worn replace it with a new one. @@@@ 4. Drain engine of oil and petrol. storing your Lawnmower 1. Do not store your lawnmower immediately after use. 2. Wait until the engine has cooled to avoid a potential fire hazard.

@@@ Batteriet skall lämnas in till en godkänd servicedepå Demontering av kniv eller till Din lokala återvinningsstation.

Om batteriet efter en längre period av användning snabbt tappat laddning efter en full laddning på 24 timmar är det troligen tid att byta till ett nytt batteri.

Our policy of continuous improvement means that the specification of products may be altered from time to time without prior notice. Electrolux Outdoor Products manufacture products for a number of well known brands under various registered patents, designs and trademarks in several countries. More than 55 million Electrolux Group products (such as refrigerators, cookers, washing machines, vacuum cleaners, chain saws and lawn mowers) are sold each year to a value of approx. USD 14 billion in more than 150 countries around the world.
