Manual abstract:

@@ Before using your cultivator, please make sure you have understood the contents of this manual. Otherwise you could be injured and your equipment could be damaged. @@ european safety standards. @@ 4. Never let the cultivator be used by children, or by anyone unfamiliar with the instructions. There may be national laws which restrict the age of users. 5. Do not use the cultivator: - When there are people (especially children) or animals nearby, - If you have taken medicine or any other substance that Familiarise yourself with how the cultivator and its controls work, before using it. Use the cultivator for the purpose it is meant for - digging the ground. Any other use may be dangerous and may damage the machine.

3. Your cultivator was designed to meet the current May slow your reflexes or reduce your vigilance, - Without the mud-guard or protective covers, - On land with a greater than 10-degree (17%) slope. 6. It is the user's responsibility to evaluate potential risk from the land to be tilled. @@ 7.

@@ 8. Check the condition of the cultivator before you use it. Make sure all nuts and screws are tightened. Do not smoke when filling the tank or when handling petrol. @@ - Do not start the motor when there is spilled petrol about.

@@ 11. Take care when you start the motor; follow the instructions and keep your feet away from blades. 12. Do not run the motor in an enclosed space where the exhaust (containing carbon monoxide) might accumulate. This can knock you out or even kill. Make sure there is good ventilation. 13. Wear tight-fitting clothing and stout shoes with non-slip soles which cover the foot entirely. If any of the following happens, first stop the motor and remove the cable from the spark plug: - Whenever you have to adjust the blades, - Whenever you clean, service or repair the cultivator, - If you hit a foreign body, inspect the machine to see if it has been damaged. Carry out any necessary repairs before continuing work.

- If the cultivator starts vibrating in an abnormal way, immediately look for the cause of the trouble and make any necessary repairs. 16. @@ Work across the lie of the land, never uphill or downhill. 18. @@@@ Take particular care when in reverse. 19. @@ 20. @@ 21. When tilling stony ground, use low speed. 22.

@@ 23. Wear thick gloves when fitting or removing the blades. 24. Work only in daylight or in good artificial light. 25.

Do not use the cultivator with worn or used parts. Should be replaced, not mended. use authorised spares. @@@@ 27. @@@@ 28.

@@@@ Wherever you store it, let the motor cool down first. 30. Turn the motor off before transporting the cultivator. Do not try to lift it on your own. Ask two other people to help, lifting by holding on to the handlebars and the blade axles. Wear gloves to protect your hands, and keep the machine upright. 31.

Keep all nuts and screws tight for safety. Tenance is important both for safety's sake and to sustain the machine's performance. 32.

When cultivating slopes, the user must ensure that there is nobody within a 20-yard radius. The user himself MUST keep hold of the machine's handlebars. 33.

@@ 34. @@ 35. @@ 36. The cultivator can be fitted with certain accessories. @@ The use of unsuitable accessories may be unsafe. 37. Every time you use the cultivator with an accessory, carefully read the fitting instructions and the user's manual provided.
