THANK YOU FOR CHOOSING JBL

For more than 60 years, JBL has been involved in every aspect of music and film recording and reproduction, from live performances to the recordings you play in your home, car or office.

We're confident that the JBL speaker you've chosen will provide every note of enjoy-

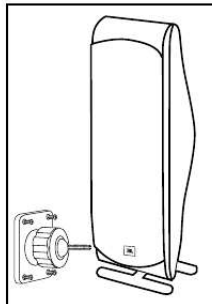

ment that you expected – and that when you think about purchasing additional audio equipment for your home, car or office, you will once again choose JBL.

Please take a moment to register your product on our Web site at www.jbl.com. It enables us to keep you

posted on our latest advancements, and helps us to better understand our customers and build products that meet their needs and expectations.

JBL, Incorporated

INCLUDED

One SCS SAT300 or one SCS SAT200 with wall-mount bracket, shelf stand and floor stand adapter.

One 40' (12m) speaker cable.

In addition, there are two hardware bags included. Hardware Bag A contains the metal tightening bar and screws for the shelf stand. Hardware Bag B contains screws for the floor stand adapter and parts for the wall-mount bracket.

OWNER'S GUIDE

Manual abstract:

We're confident that the JBL speaker you've chosen will provide every note of enjoyment that you expected and that when you think about purchasing additional audio equipment for your home, car or office, you will once again choose JBL. Please take a moment to register your product on our Web site at www.jbl.com. It enables us to keep you posted on our latest advancements, and helps us to better understand our customers and build products that meet their needs and expectations. JBL, Incorporated INCLUDED One SCSSAT300 or one SCSSAT200 with wallmount bracket, shelf stand and floor stand adapter.

One 40' (12m) speaker cable. In addition, there are two hardware bags included. @@@@The back surround speaker in a 6.1-channel system should be placed on the wall behind the listening position, facing the center channel speaker.

It is neither necessary nor desirable to tilt the surround speakers to aim them down toward the listening area. They should be aimed straight ahead to produce the proper effect. MOUNTING OPTIONS On a shelf. On the wall. A wall bracket is included.

On an optional stand. 2 ATTACHING THE SHELF STAND TO THE SPEAKER Prepare the speaker wire as described on page 5. Thread the two conductors through the two holes in the stand bracket. @@@@Follow the same procedure to connect the negative wire to its terminal. Use the larger screw (Hardware Bag A) in the + upper screw hole, and the smaller screw (Hardware Bag A) in the lower screw hole.

+ MOUNTING THE SATELLITES ON OPTIONAL FLOOR STANDS Important Safety Note: The supplied floor stand adapters facilitate installation with a variety of general-purpose floor stands available from many manufacturers. Since different stands will have different weight capacities and stability characteristics, it is the customer's responsibility to check with the stand manufacturer or dealer to determine whether that specific stand is capable of handling the weight and proportions of these loudspeakers in a safe and stable manner. JBL disclaims any liability for the selection of suitable floor stands and/or correct compatibility between the selected stand and these satellite loud+ speakers. @@@@The floor stand adapter screws may be found in Hardware Bag B. Use the larger screw in the upper screw hole, and the smaller screw in the lower screw hole. Screw the floor stand adapter into the floor stand's threaded insert until the speaker is firmly attached to the stand. Back off slightly from the fully tightened position until the speaker is oriented as desired, then rotate the thumbwheel at the bottom of the floor stand adapter to secure the speaker to the stand. 3 WALL-MOUNTING 4 3 2 1 8 5 Important Safety Note: The customer is solely responsible for proper selection of mounting hardware not included with the speaker, and for proper assembly and installation of the wall bracket, including but not limited to the selection of appropriate weight-bearing supports and proper use of the bracket. JBL disclaims any liability for the selection of mounting hardware and/or bracket installation. Be sure to follow these bracket assembly and installation instructions carefully.

If you have any questions or doubts about your ability to correctly wallmount the speakers, consult with your authorized JBL dealer or custom installer. Step 1: Unscrew and remove the large Molded Nut TM. If necessary, use the supplied Metal Bar as a lever by inserting it into one of the holes in the outer edge of the Molded Nut TM. @@@@However, these marks will be covered by the Metal Nut j. @@@@Such damage would not be covered under the warranty. @@@@Be careful not to cross-thread. @@@@Aiming the surround speakers toward the listening position may ruin the intended effect by calling too much attention to the information in those channels. Step 9: Once the speaker's orientation has been finalized, insert the Metal Bar into one of the holes in the outer edge of the Molded Nut TM and tighten the Molded Nut TM securely. Keep the Metal Bar in a safe place in the event that you decide to adjust the speaker's orientation in the future. SPEAKER CONNECTIONS CONNECTION TIPS denote the (+) terminal and black to denote the (-) terminal.

The (+) lead of the speaker wire is noted with a stripe. @@@@Speakers and electronics terminals have corresponding (+) and (-) terminals. Most manufacturers of speakers and electronics, including JBL, use red to and center speaker terminals, press the red or black plastic cap for the desired terminal, insert the bare end of the wire into the hole below the cap and release the cap. Gently tug on the wire to make sure that it is fully inserted. 5 SYSTEM CONNECTION Connect each speaker to the corresponding speaker terminals on your receiver or amplifier.

If you are using a subwoofer, follow the directions in that owner's guide to connect and configure it. Configure your receiver or processor to reflect the correct number of speakers in your system. If you have added one SCSSAT300/200 speaker to a 5.1-channel system, reconfigure it as a 6.1 system. @@@@Make sure all wires are connected. @@· Review proper operation of your receiver/amplifier. @@@@Make sure all wires are connected. @@@@Turn off all electronics and switch the speaker in question with one of the other speakers that is working correctly. Turn everything back on, and determine whether the problem has followed the speaker, or has remained in the same channel. If the problem is in the same channel International are trademarks of Harman International Industries, Incorporated, registered in the United States and/or other countries. Part No. 406-000-05460-E SURROUND CINEMA SPEAKERS MODELS: SCS SAT300/SCS SAT200 Bring the thrill of live performance and movie sound to the home environment by calling on JBL's professional engineering leadership.
