Manual abstract:

Do not view directly with optical instruments. This symbol is only valid in the European Union. @@@@By disposing of this product correctly, you will help to conserve natural resources and will help prevent potential negative effects on the environment and human health. DO NOT install any unit or wire any cable in a location where; it may obstruct the steering wheel and gearshift lever operations. it may obstruct the operation of safety devices such as air bags. If you need to operate the unit while driving, be sure to look around carefully. The driver must not watch the monitor while driving. @@This is inevitable and is not malfunction. @@@@ 2 · When the temperature is very cold or very hot. Chemical changes occur inside, causing malfunction. Pictures may not appear clearly or may move slowly. @@ How to reset your unit If this does not work, reset the unit. Do not raise the volume level too much, as this will block outside sounds, making driving dangerous. Stop the car before performing any complicated operations. temperature inside the car.

If you have parked the car for a long time in hot or cold weather, wait until the temperature in the car becomes normal before operating the unit. For security reasons, a numbered ID card is provided with this unit, and the same ID number is imprinted on the unit's chassis. Keep the card in a safe place, as it will help the authorities to identify your unit if stolen. DivX/MPEG1/MPEG2/JPEG/MP3/ MP3/WMA/WAV WMA/WAV: ISO 9660 level 1, AAC level 2, Romeo, Joliet MPEG4 DVD+VR DVD-RAM Dual Disc DVD side Non-DVD side CD/VCD Audio CD/CD Text (CD-DA)/DTS-CD VCD (Video CD) SVCD (Super Video CD) CD-ROM CD-I (CD-I Ready) CD Recordable/Rewritable CD-DA (CD-R/-RW) MP3/WMA/WAV · ISO 9660 level 1, level 2, Romeo, JPEG Joliet DivX/MPEG1/MPEG2 AAC MPEG4 *1 If you insert a DVD Video disc of an incorrect Region Code, "Region code error" appears on the screen. Caution for DualDisc playback The Non-DVD side of a "DualDisc" does not comply with the "Compact Disc Digital Audio" standard.

Therefore, the use of Non-DVD side of a DualDisc on this product may not be recommended. Attenuate the sound (if the power is on). Use only when the internal system malfunctions. Close the monitor panel when <Open/Tilt> menu is displayed. @@ For details on the touch panel operations, see each source operation section. Battery shall not be exposed to excessive heat such as sunshine, fire or the like. The unit is equipped with the steering wheel remote control function. Attenuates the sound if the power is on. Turns off the power if pressed and held (while the power is on). @ / #: Skips back or forward by five minutes for DivX/MPEG1/MPEG2.

Erases the misentry after entering a wrong number. *1 Functions as a number button only (see o). *2 Not used for this unit. *3 Functions when pressed with SHIFT. Before operating the unit Indication language: In this manual, English indications are used for purpose of explanation. Available sources depend on the external components you have connected, media you have attached, and the <Input> settings you have made (page 55). Each time you press DISP, the display changes to show the various information. You cannot select these sources if they are not ready. Back to the beginning In the explanation, they are indicated inside [ ]. You can also use SOURCE on the monitor panel.

Manual Search: Hold either [4]or [¢] until "Manual Search" appears on the screen, then press it repeatedly. The ST indicator lights up when receiving an FM stereo broadcast with sufficient signal strength. This function works only for FM bands. Once you have activated this function (selected <Local>), it always works when searching for FM stations. Only stations with sufficient signal strength will be detected.

The DX indicator goes off, then the LO indicator lights up. This function works only for FM bands. You can preset six stations for each band. The station selected in step 2 is now stored in preset number 4. Local FM stations with the strongest signals are searched and stored automatically in the FM band. Tuning in to stations with sufficient signal strength 5 MHz into preset number 4 of the FM1 band. The following features are available only for FM RDS stations. You can search for your favorite programmes being broadcast by selecting the PTY code for your favorite programmes. You can also easily access <PTy Search> menu by pressing [SHORT CUT] on the touch panel, then. If there is a station broadcasting a programme of the same PTY code as you have selected, that station is tuned in. In the example below, a PTY code is selected from the Preset List. If you enter <PTy Code> menu below, you can select one from 29 PTY codes. You can store your favorite PTY codes into the PTY Preset List. The unit will temporarily switch to Lights up Traffic Announcement (TA) if available, from any source other than AM. The volume changes to the preset TA volume level if the current level is lower than the preset level (page 54).

You can easily activate or deactivate the PTY Standby Reception by pressing [SHORT CUT] on the touch panel, then. The unit will temporarily switch to Lights up your favorite PTY programme from any source other than AM. To deactivate, press [Off] for <PTy Standby> in step 3 on the next column. When a DAB tuner is connected, TA Standby/PTY Standby Reception also works for the DAB tuner and searches for the services. When driving in an area where FM reception is not sufficient enough, this unit automatically tunes in to another FM RDS station of the same network, possibly broadcasting the same programme with stronger signals. When shipped from the factory, Network-Tracking Reception is activated. Usually when you select preset stations, the preset station is tuned in. If the signals from the FM RDS preset station are not sufficient for good reception, this unit, using the AF data, tunes in to another station broadcasting the same programme as the original preset station is broadcasting. The unit takes some time to tune in to another station using programme search. The disc type is automatically detected, and playback starts automatically (for some discs: automatic start depends on its internal program).

If a disc does not have any disc menu, all tracks on it will be played repeatedly until you change the source or eject the disc. If " " appears on the screen, the unit cannot accept the operation you have tried to do. In some cases, without showing " ," operations will not be accepted. By pressing and holding the button, you can open the monitor panel and eject the disc. Do not place your finger behind the monitor panel.

Discs produce very little noise compared with other sources. Lower the volume before playing a disc to avoid damaging the speakers by the sudden increase of the output level. When playing back a multi-channel encoded disc, the multi-channel signals are downmixed.

You can fully enjoy multi-channel sound by connecting an amplifier or a decoder compatible with these multi-channel sources. In the explanation, they are indicated inside [ ].

These buttons also work when they are not shown on the touch panel (while watching the playback pictures on the screen). While playing the following discs, press . Each time you press the button, the display changes to show the different information. While playing the following discs, press . Each time you press the button, the display changes to show the different information (page 9). Moisture may condense on the lens inside the unit in the following cases: · If it becomes very humid inside the car. Should this occur, the unit may malfunction.

In this case, eject the disc and leave the unit turned on for a few hours until the moisture evaporates. To keep discs clean A dirty disc may not play correctly. If a disc does become dirty, wipe it with a soft cloth in a straight line from center to edge. Do not use any solvent (for example, conventional record cleaner, spray, thinner, benzine, etc. When removing a disc from its case, press down the center holder of the case and lift the disc out, holding it by the edges. Do not touch its recording surface. When storing a disc into its case, gently insert the disc around the center holder (with the printed surface facing up). Make sure to store discs into the cases after use. New discs may have some rough spots around the inner and outer edges. If such a disc is used, this unit may reject the disc.

To remove these rough spots, rub the edges with a pencil or ball-point pen, etc. Do not use the following discs: Transparent or semi-transparent on its recording area More about this unit general Turning on the power By pressing SOURCE on the monitor panel, you can also turn on the power. This unit can recognize a total of 5 000 files and 250 folders (a maximum of 999 files per folder). This unit can play back multi-session discs; however, unclosed sessions will be skipped while playing. This unit can recognize a total 25 characters for file/ folder names. Some discs or files may not be played back due to their characteristics or recording conditions. When SSM is over, received stations are preset in no. In this manual, words "track" and "file" are interchangeably used. This unit can only play back audio CD (CD-DA) files if different type of audio files (MP3/WMA/WAV) are recorded on the same disc. This unit can display only one-byte characters.

No other characters can be correctly displayed. For details about DVD-VR format and Playlist, refer to the instructions supplied with the recording equipment. This unit can play back DivX files with the extension code <. This unit supports the DivX files whose resolution is 720 x 576 pixels or less. The file encoded in the interlaced scanning mode may not be played back correctly. When a disc is inserted upside down or has no playable files, "Cannot play this disc Check the disc" appears on the screen. If "No disc" appears after removing a disc, insert a disc or select another playback source. If the ejected disc is not removed within 15 seconds, the disc is automatically inserted again into the loading slot to protect it from dust. This unit can play back MPEG1/MPEG2 files with the extension code <. This unit can play back files recorded in VBR (variable bit rate).

This unit cannot play back the following files: MP3 files encoded with MP3i and MP3 PRO format. MP3 files encoded with Layer 1/2. WMA files encoded with lossless, professional, and voice format. WMA files which are not based upon Windows Media® Audio. This unit can play back JPEG files with the extension code <.

This unit can play back baseline JPEG files. The following screens appear only on the external monitor. This unit can play back files with the extension code <. This unit can play back the files meeting the conditions below: Bit rate: MP3/WMA: 32 kbps -- 320 kbps Sampling frequency: 48 kHz, 44.

This unit can show ID3 Tag Version 1.

This unit can also show WAV/WMA Tag. Track : 6 / 14 Cloudy Fair Fog Hail Indian summer Rain Shower Snow Thunder Typhoon Wind Winter sky Selected playback mode Elapsed playing time of the current track Operation status Current track number/total number of tracks on the disc 5 Track information 6 Track list 7 Current track (highlighted bar) While driving, do not perform complicated operation such as dialing the numbers, using phone book, etc. When you perform these operations, stop your car in a safe place.
