Manual abstract:

31 V WARNINGS: (To prevent accidents and damage) • DO NOT install any unit or wire any cable in a location where; – it may obstruct the steering wheel and gearshift lever operations. □ it may obstruct the operation of safety devices such as air bags. – it may obstruct visibility. □ DO NOT operate the unit while driving. If you need to operate the unit while driving, be sure to look around carefully. □ The driver must not watch the monitor while driving. For DDX3071BT/DDX2071: The marking of products using lasers INITIAL SETTINGS . 65 How to read this manual: • Illustrations of DDX771 are mainly used for explanation. The displays and panels shown in this manual are examples used to provide clear explanations of the operations. For this reason, they may be different from the actual displays or panels.

□ This manual mainly explains operations using the buttons on the monitor panel and touch panel. For operations using the remote controller (RC-DV340: supplied only for DDX3071BT/DDX2071), see page 49. □ < > indicates the various screens/menus/operations/settings that appear on the touch panel. □ [] indicates the buttons on the touch panel. □ Indication language: English indications are used for the purpose of explanation.

You can select the indication language from the <Setup> menu. (Page 48) The label is attached to the chassis/case and says that the component uses laser beams that have been classified as Class 1. It means that the unit is utilizing laser beams that are of a weaker class. There is no danger of hazardous radiation outside the unit. 2 DDX_Entry_K.

Indb 2 2013/11/01 16:10 BEFORE USE For DDX771/DDX491HD/DDX471HD/DDX371/ DDX310BT/DDX271: V CAUTION Use of controls or adjustments or performance of procedures other than those specified herein may result in hazardous radiation exposure. In compliance with Federal Regulations, the following are reproductions of labels on, or inside the product relating to laser product safety. JVC KENWOOD Corporation 2967-3 , ISHIKAWA-MACHI , HACHIOJI-SHI , TOKYO , JAPAN THIS PRODUCT COMPLIES WITH DHHS RULES 21CFR SUBCHAPTER J IN EFFECT AT DATE OF MANUFACTURE. Location : Top plate For DDX771/DDX491HD/DDX471HD/DDX371/ DDX310BT/DDX271: FCC WARNING This equipment may generate or use radio frequency energy. Changes or modifications to this equipment may cause harmful interference unless the modifications are expressly approved in the instruction manual. The user could lose the authority to operate this equipment if an unauthorized change or modification is made. FCC NOTE This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment may cause harmful interference to radio communications, if it is not installed and used in accordance with the instructions. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures: • Reorient or relocate the receiving antenna. □ Increase the separation between the equipment and receiver. □ Connect the equipment into an outlet on a circuit different from that to which the receiver is connected. □ Consult the dealer or an experienced radio/TV technician for help. V Cautions on the monitor: • The monitor built into this unit has been produced with high precision, but it may have some ineffective dots. This is inevitable and is not considered defective. □ Do not expose the monitor to direct sunlight. □ Do not operate the touch panel using a ball-point pen or similar tool with a sharp tip. Touch the buttons on the touch panel with your finger directly (if you are wearing a glove, take it off). □ When the temperature is very cold or very hot.

□ Chemical changes occur inside, causing malfunction. □ Pictures may not appear clearly or may move slowly. Pictures may not be synchronized with the sound or picture quality may decline in such environments. for safety. □ Do not raise the volume level too much, as this will make driving dangerous by blocking outside sounds, and may cause hearing loss.

□ Stop the car before performing any complicated operations. temperature inside the car. If you have parked the car for a long time in hot or cold weather, wait until the temperature in the car becomes normal before operating the unit. How to reset your unit DDX771

DDX491HD/DDX471HD/DDX371/DDX310BT/ DDX3071BT/DDX271/DDX2071 If the unit fails to operate properly, press the Reset button. The unit returns to factory settings when the Reset button is pressed (except the registered Bluetooth devices).

pairing allows Bluetooth devices to communicate with each other. □ The pairing method differs depending on the Bluetooth version of the device. – For devices with Bluetooth 2. 1: You can pair the device and the unit using SSP (Secure Simple Pairing) which only requires confirmation.

– For devices with Bluetooth 2. 0: You need to enter a PIN code both on the device and unit for pairing. □ Once the connection is established, it is registered in the unit even if you reset the unit. up to 5 devices can be registered in total. □ Only one device for Bluetooth phone and one for Bluetooth audio can be connected at a time.

□ To use the Bluetooth function, you need to turn on the Bluetooth function of the device. □ To use the registered device, you need to connect the device to the unit. (Page 34) Pairing a Bluetooth device using SSP (for Bluetooth 2. 1) When the Bluetooth device is compatible with Bluetooth 2. Bluetooth is a short-range wireless radio communication technology for mobile devices such as mobile phones, portable PCs, and other devices.

Bluetooth devices can be connected without cables and communicate with each other. Notes • While driving, do not perform complicated operations such as dialing numbers, using the phonebook, etc. When you perform these operations, stop your car in a safe place. □ Some Bluetooth devices may not connect to this unit depending on the Bluetooth version of the device. □ This unit may not work for some Bluetooth devices. □ Connecting conditions may vary depending on your environment. □ For some Bluetooth devices, the device is disconnected when the unit is turned off. 2 Confirm the request both on the device and the unit. On the <Top Menu> screen: • If you skip changing the PIN code, go to step 3. • The PIN code is initially set to “0000”.

□ The maximum number of digits in the PIN code is 16. 4 Select the “KENWOOD BT MM-8U2” for your Bluetooth device. KENWOOD BT MM-8U2 • If the PIN code is required, enter “0000” (initial). PIN code 0000 OK When pairing is complete, the device is listed on <Paired Device List>. □ To use the paired device, connect the device on <Paired Device List>. (Page 33) Using the Bluetooth mobile phone Receiving a call When a call comes in. 2 2 3 Select the device you want to connect (1), then select the usage of the device (2). □ Phone operation is not available while the picture from the rear view camera is displayed. (Page 31) To reject a call * * When <Auto Response> is set to [On] (Page 39) The unit answers the incoming call automatically. [TEL (HFP)]: for mobile phone [Audio (A2DP)]: for Bluetooth audio player [PANDORA (SPP)]: for Pandora* • Selectable items depend on the device you are operating.

□ If you connect a device while another device is connected, the device previously connected is disconnected and the connection for the device recently connected is established. Notifying SMS reception If the mobile phone is compatible with SMS (Short Message Service), the unit tells you a message has been received. (Page 39) • To read a received message, operate the mobile phone after stopping the car in a safe place. □ You cannot read, edit, or send a message through the unit. □ For some mobile phones, the notification message may not be shown even if the SMS function is supported.

Making a call 1 Display the <Handsfree> screen. On the <Top Menu> screen: • You can adjust the volume level between –20 to +8 (initial: 0). □ This adjustment does not affect the volume level of the other sources. □ Use the monitor panel to adjust the call/earpiece volume. 1 2 3 4 Switching between handsfree mode and phone mode While talking.

1 2 3 4 From the phone book/call lists Direct number entry Voice dialing Preset list • To preset, see page 37. Indb 52 2013/11/01 16:10 *CONNECTION/INSTALLATION* Before installing the unit *V WARNING* • If you connect the ignition wire (red) and the battery wire (yellow) to the car chassis (ground), you may cause a short circuit, that in turn may start a fire. Always connect those wires to the power source running through the fuse box. □ Do not cut out the fuse from the ignition wire (red) and the battery wire (yellow).

The power supply must be connected to the wires via the fuse. *v Precautions on installation and connection* • Mounting and wiring this product requires skills and experience. For best safety, leave the mounting and wiring work to professionals. □ Make sure to ground the unit to a negative 12 V DC power supply. □ Do not install the unit in a spot exposed to direct sunlight or excessive heat or humidity.

Also avoid places with too much dust or the possibility of water splashing. □ Do not use your own screws. Use only the screws provided. If you use the wrong screws, you could damage the unit. □ If the power is not turned on (“Miswiring DC Offset Error”, “Warning DC Offset Error” is displayed), the speaker wire may have a short circuit or have touched the chassis of the vehicle and the protection function may have been activated. Therefore, the speaker wire should be checked. □ If your car’s ignition does not have an ACC position, connect the ignition wires to a power source that can be turned on and off with the ignition key. If you connect the ignition wire to a power source with a constant voltage supply, such as with battery wires, the battery may be drained. □ Only for DDX771: If the console has a lid, make sure to install the unit so that the monitor panel will not hit the lid when closing and opening. □ If the fuse blows, first make sure the wires are not touching to cause a short circuit, then replace the old fuse with one with the same rating.

□ Insulate unconnected wires with vinyl tape or other similar material. To prevent a short circuit, do not remove the caps on the ends of the unconnected wires or the terminals. □ Connect the speaker wires correctly to the terminals to which they correspond. The unit may be damaged or fail to work if you share the s wires or ground them to any metal part in the car. □ When only two speakers are being connected to the system, connect both connectors either to the front output terminals or to the rear output terminals (do not mix front and rear). For example, if you connect the t connector of the left speaker to a front output terminal, do not connect the s connector to a rear output terminal. □ After the unit is installed, check whether the brake lamps, blinkers, wipers, etc. On the car are working properly. □ Mount the unit so that the mounting angle is 30° or less. □ Do not press hard on the panel surface when installing the unit to the vehicle.

Otherwise scars, damage, or failure may result. *V CAUTION* Install this unit in the console of your vehicle. Do not touch the metal part of this unit during and shortly after the use of the unit. Metal parts such as the heat sink and enclosure become hot. *Supplied accessories for installation* 1 2 3 4 5 6 7 *Wiring harness* x 1 *Trim plate* x 1 *Extension wire* x 1 *Extraction keys* x 2 *Flat head screws (M5 x 7 mm)* x 6 *Round head screws (M5 x 6 mm)* x 6 *Microphone* x 1 * * Only for DDX771/DDX491HD/DDX471HD/DDX371/DDX310BT/DDX3071BT.
