@@@@@@@@@@@@@To do so, follow these steps: 1. @@@@@@@@@@@@@@@@@@@@@@1. Double-click the DTL+ CD-ROM icon.

2. @@3. Double-click the DTLplus application icon found in the window displayed in Figure 6.3. This will start the initialization process. Figure 6.1 – DTLplus Figure 6.2 – DTL+ Contents Figure 6.3 – DTL+ Application Document No. 48008071-001.

A02 DataTraveler Locker+ ® Page 12 of 22 Device Initialization (Mac Environment) 1. Select your language preference from the drop-down menu and click 'Next' (Figure 7.1.) Figure 7.1 – Language Selection 2.

Review the license agreement and click 'Next' (Figure 7.2.) (Note: You must accept the license agreement before continuing; otherwise the 'Next' button will remain disabled.) Figure 7.2 – License Agreement Document No.

48008071-001.A02 DataTraveler Locker+ ® Page 13 of 22 3. Create a password to protect your data on the DTL+. @@@@Passwords must contain 6 characters or more (up to 16 characters.) 2. @@@@@@48008071-001.A02 DataTraveler Locker+ ® Page 14 of 22 4. @@@@of attempts.) The 'lock-out' counter tracks each failed login and gets reset one of two ways: 1) A successful login prior to reaching MaxNoA or 2) reaching MaxNoA and performing a device format.\* If an incorrect password is entered, an error message will appear just below the 'Hint' field, indicating a login failure.

See Figure 10.1. If and when a 7th failed attempt is made, you will see an additional error message indicating you have 3 attempts left before reaching MaxNoA (which is set to 10 by default.) See Figure 10.2. After a 10th failed login attempt, the DTL+ will permanently block the data partition and require a device format prior to next use. This means that all data stored on the DTL+ will be lost and you will need to create a new password. Figure 10.1 – Login Failure

This security measure limits someone (who does not have your password) from attempting countless login attempts and gaining access to your sensitive data. If you are the owner of the DTL+ and have forgotten your password, the same security measures will be enforced, including a device format.

\* For more on this feature, see 'Forgot Password' on page 21. Figure 10.2 – 7th Login Failure \*Note: A device format will erase ALL of the information stored on the DTL+'s secure data partition. ® Document No. 48008071-001.

A02 DataTraveler Locker+ Page 20 of 22 Forgot Password If you forget your password, you can click on the 'Forgot Password' link that appears in the device login window when DTLplus\_Launcher is executed (see Figure 10.3.) This option will allow you to create a new password, but in order to protect the privacy of your data, the DTL+ will be formatted. @@@@@@@@@@@@@@What this means is, Windows may assign the DTL+ a drive letter that's already in use by a network share or Universal Naming Convention (UNC) path, causing a drive letter conflict. If this happens, please consult your administrator or helpdesk department on changing drive letter assignments in Windows Disk Management (administrator privileges required).

) Figure 10.5 – My Computer In this example, the DTL+ uses drive F:, which is the first available drive letter after drive E: (the last physical disk before the drive letter gap.) Because letter G: is a network share and not part of the hardware profile, the DTL+ may attempt to use it as its second drive letter, causing a conflict. If there are no network shares on your system and the DTL+ still won't load, it is possible that a card reader, removable disk, or other previously-installed device is holding on to a drive-letter assignment and still causing a conflict. Please note that Drive Letter Management, or DLM, has improved significantly in Windows XP SP3, Vista, and 7, so you may not come across this issue, but if you are unable to resolve the conflict, please contact Kingston's Technical Support Department for further assistance.
