### Protect sensitive data with FIPS 140-2 Level 2 validation and 100-percent privacy.

Protect your organization's portable data and comply with data-at-rest agency directives by choosing Kingston's ultra-secure DataTraveler® 5000 USB Flash drive. Its FIPS 140-2 Level 2 validated and features 256-bit AES hardware-based encryption in XTS mode. XTS is much stronger than CBC and ECB modes. The DataTraveler 5000 uses elliptic curve cryptography encryption algorithms (ECC) which meet the Suite B standards approved by the U.S. Government. Complex password protection enforces device lockdown after a specified number of invalid attempts. DataTraveler 5000 is rugged and waterproof; with a titanium-coated stainless-steel casing for added data protection. And it's easy to set up and use, with no admin rights or application installation required. DataTraveler 5000 is backed by a five-year warranty and legendary Kingston® reliability.
