Store and share your favorite content with your favorite people.

With integrated Wi-Fi and four hours of battery life, Kingston's new Wi-Drive™ offers pocket-sized portable storage and easy file sharing for mobile devices, including iPad, iPhone, iPod touch, Android™ devices, and Amazon Kindle Fire. Accessing or sharing your personal media has never been easier. With Wi-Drive, you can add 32GB or 64GB of space accessed wirelessly from your mobile device. The contents can be shared by three people so you are no longer limited to the space available on your portable device.

Whether at home, on the road or in a meeting, Wi-Drive lets you take more content with you without running out of storage space. Just load your files before you go and wirelessly access them from Wi-Drive when you need them. Kingston's Wi-Drive offers great:

- Portability: Wi-Fi enabled and Flash-based storage ensures against accidental data loss from drops, bumps and knocks so you can take your favorite media with you. Just use your digital device as a player and display.
- Expanded storage: Wi-Drive adds up to 64GB of storage space for more of your favorite music, photos, videos, PDF's and more. It's also a great companion for Windows users on iPads, as it removes the frustration of using auto sync to view content.
- Casual Sharing: Wi-Drive lets you share your favorite media with three users simultaneously — without any hassles.
- Multiplatform wireless streaming so you can use any combination of mobile devices whether iOS or Android-based mobile devices.

Access to the drive is over the 802.11g/n protocol, just like your typical home wireless hub. Carry extra files and content with you and use your mobile device as a display to share information.

Best of all, Wi-Drive is backed by legendary Kingston™ reliability and a one-year warranty.

- > Works with iPad, iPhone, iPod touch, Android devices and Amazon Kindle Fire
- > Share your data with 3 users simultaneously
