At 16.5" x 13" (WxH), the magicolor 4750EN/4750DN is the smallest color laser printer in its class. But this downsized powerhouse has built-in productivity and quality that rival high-end models. It prints at 31 ppm in color and B&W, delivers a first page in less than 12.9 seconds and can produce up to 120,000 pages each month – perfect for office work teams that rely on high performance. The driving force is an Emporion® Print System with an 800 MHz processor that powers image processing for fast results. Simtrip® HD toner uses biomass, a renewable organic resource that delivers 600 x 600 dpi resolution, while reducing emissions compared to other toners. For high-definition color that makes a big impact, count on the low-profile magicolor 4750EN/4750DN.

step up to the next big thing in compact color printing.
