Trademark Information Microsoft, MS-DOS and Windows are registered trademarks of Microsoft Corporation in the U.S. and other countries. Ethernet is a registered trademark of Xerox Corporation. IBM and IBM PC-AT are trademarks of International Business Machines Corporation. Adobe and Acrobat are registered trademarks of Adobe Systems Incorporated. All other company and product names in this Operation Guide are trademarks or registered trademarks of their respective companies.

The designations TM and ® are omitted in this guide. FCC PART 68 REQUIREMENTS 1 This equipment complies with Part 68 of the FCC rules and the requirements adopted by the ACTA. On the right side of the equipment to install Assembly Board is a label that contains, among other information, a product identifier in the format US:AAAEQ##TXXXX. If requested, this number must be provided to the telephone company. This equipment connects to the network via USOC RJ11C. A plug and jack used to connect this equipment to the premises wiring and telephone network must comply with the applicable FCC Part 68 rules and requirements adopted by the ACTA. A compliant telephone cord and modular plug is provided with this product. It is designed to be connected to a compatible modular jack that is also compliant. See installation instructions for details. The REN is and batteries indicated in this manual.

Do not dispose of batteries in a fire. They may explode. Check with local codes for possible special disposal instructions. SAVE THESE INSTRUCTIONS vii IMPORTANTES MESURES DE SECURITE Certaines mesures de sécurité doivent être prises pendant l'utilisation de matériel téléphonique afin de réduire les

risques d'incendie, de choc électrique et de blessures. En voici quelques unes: 1 2 3 4 Ne pas utiliser l'appareil près de l'eau, p. ex., près d'une baignoire, d'un lavabo, d'un évier de cuisine, d'un bac à laver, dans un sous-sol humide ou près d'une piscine. Eviter d'utiliser le téléphone (sauf s'il s'agit d'un appareil sans fil) pendant un orage électrique. Ceci peut présenter un risque de choc électrique causé par la foudre. Ne pas utiliser l'appareil téléphonique pour signaler une fuite de gaz s'il est situé près de la fuite.

Utiliser seulement le cordon d'alimentation et le type de piles indiqués dans ce manuel. Ne pas jeter les piles dans le feu: elles peuvent exploser. Se conformer aux règlements pertinents quant à l'élimination des piles. CONSERVER CES INSTRUCTIONS CANADIAN IC REQUIREMENTS "This product meets the applicable Industry Canada technical specifications" "The Ringer Equivalence Number is an indication of the maximum number of devices allowed to be connected to a telephone interface. The termination on an interface may consist of any combination of devices subject only to the requirement that the sum of the RENs of all the devices does not exceed five." The REN (CANADA) of this product is 0.4. CONDITIONS DE L'IC CANADIENNE "Le présent matériel est conforme aux spécifications techniques applicables d'Industrie Canada." "L'indice d'équivalence de la sonnerie (IES) sert à indiquer le nombre maximal de terminaux qui peuvent être raccordés à une interface téléphonique. La terminaison d'une interface peut consister en une combinaison quelconque de dispositifs, à la seule condition que la somme d'indices d'équivalence de la sonnerie de tous les dispositifs n'excède pas 5.

" Le IES (CANADA) pour ce produit est 0.4. viii Declarations to European Directives DECLARATION OF CONFORMITY TO 2004/108/EC, 2006/95/EEC, 93/68/EEC, 1999/5/EC and 2009/125/EC We declare under our sole responsibility that the product to which this declaration relates is in conformity with the following specifications. Limits and methods of measurement for immunity characteristics of information technology equipment Limits and methods of measurement for radio interference characteristics of information technology equipment Limits for harmonic currents emissions for equipment input current 16A per phase Limitation of voltage fluctuations and flicker in lowvoltage supply systems for equipment with rated current 16A Safety of information technology equipment, including electrical business equipment Terminal Equipment (TE); Attachment requirements for pan-European approval for connection to the analogue Public Switched Telephone Networks (PSTNs) of TE (excluding TE supporting the voice telephony service) in which network addressing, if provided, is by means of Dual Tone Multi Frequency (DTMF) signalling EN55024 EN55022 Class B EN61000-3-2 EN61000-3-3 EN60950-1 TBR 21 ix Technical regulations for terminal equipment This terminal equipment complies with: TBR21 AN 01R00 AN 02R01 AN 05R01 AN 06R00 AN 07R01 AN 09R00 AN 10R00 AN 11R00 AN 12R00 AN 16R00 DE 03R00 DE 04R00 DE 05R00 AN for P AN for CH and N AN for D, E, GR, P and N AN for D, GR and P AN for D, E, P and N AN for D AN for D AN for P AN for E General Advisory Note National AN for D National AN for D National AN for D DE 08R00 DE 09R00 DE 12R00 DE 14R00 ES 01R01 GR 01R00 GR 03R00 GR 04R00 NO 01R00 NO 02R00 P 03R00 P 04R00 P 08R00 National AN for D National AN for D National AN for D National AN for D National AN for E National AN for GR National AN for GR National AN for GR National AN for N National AN for N National AN for P National AN for P National AN for P x Network Compatibility Declaration The manufacturer declares that the equipment has been designed to operate in the public switched telephone networks (PSTN) in the following countries: Austria Belgium Bulgaria Cyprus Czech Denmark Estonia Finland France Germany Greece Hungary Iceland Ireland Italy Latvia Liechtenstein Lithuania Luxembourg Malta Norway Poland Portugal Romania Slovakia Slovenia Spain Sweden Switzerland The Netherlands United Kingdom xi Introduction About This Guide This guide consists of the following chapters. Chapter 1 - Part Names and Functions Explains the parts of the machine and keys on the operation panel. Chapter 2 - Preparation Before Use Explains the settings required before using fax. Chapter 3 - FAX Operation (Basic) Explains general usage of the fax function such as sending originals and receiving originals. Chapter 4 - FAX Operation (Advanced) Explains convenient fax functions such as setting the transmission time, continuous sending of the same originals to multiple recipients and scheduling the next transmission.

[You're reading an excerpt. Click here to read official KYOCERA FS-C2126MFP user guide](http://yourpdfguides.com/dref/3409473)
<http://yourpdfguides.com/dref/3409473>

Also explains advanced fax communication such as limiting the destinations and systems from which you receive originals, as well as forwarding, saving, and printing the received originals for each requirement. Furthermore, explains sub address communication functions of the machine that are compatible with other makers' systems and job accounting functions convenient for checking the communication status of fax.

Chapter 5 - Checking Transmission Results and Registration Status Explains how to check the status of recent transmissions on the message display. Also, explains how to print administrative reports to check communication results and settings and registration status of the machine. Chapter 6 - Setup and Registration Explains various settings and registration pertaining to functions, such as adjusting the volume of the alarm sound. Chapter 7 - About Network FAX Explains how to use Network FAX functions. Read the Network FAX Driver Operation Guide in the included CDROM (online manual) as well.

Chapter 8 - Troubleshooting Explains how to respond to error indications and trouble. Appendix Explains character entry and the specifications of the machine. xii Conventions in This Guide The following conventions are used depending on the nature of the description. Convention **Bold** [Regular] *Italic*

Description Indicates the operation panel keys or a computer screen. Indicates a selection item on the Message Display.

Indicates a message displayed on the Message Display. Used to emphasize a key word, phrase or references to additional information. *Note* Indicates supplemental information or operations for reference. Indicates items that are required or prohibited so as to avoid problems. Indicates what must be observed to prevent injury or machine breakdown and how to deal with it. A link function allows you to jump to a related page. Position the pointer over the underlined text until the pointer changes to a hand with appointing finger (). Then click the text. (In the Contents, Index and Menu List, the linked areas are not underlined.) Example Press the Start key.

Select [System]. Ready to copy is displayed. For details, refer to the machine's Operation Guide. NOTE: Important **IMPORTANT**: Caution **CAUTION**: Refer to Contents. Underline *Description of Operation Procedure* In this Operation Guide, the continuous operation of the keys on the message display is as follows: Actual procedure Press [FAX]. Press [Next] of Transmission. Press [Next] of Basic. Press [Change] of TTI. *Description in this Operation Guide* Press [FAX], [Next] of Transmission, [Next] of Basic, and then [Change] of TTI. xiii xiv 1 Part Names and Functions This chapter explains the names of parts of the fax device.

For other parts, refer to the machine's Operation Guide. · · Operation Panel...

..... 1-4 1-1 Part Names and Functions Operation Panel For the names of keys and indicators required when functions other than FAX are used, refer to the machine's Operation Guide. Displays the Address Book screen, where you can add destinations. Displays the System Menu/Counter menu screen.

Displays the Document Box screen. Displays the Status/Job Cancel screen. Displays the Copy screen. Switches between on-hook and off-hook when manually sending a FAX. Message Display. Check what is shown here while operating the machine. Selects the menu displayed at the lower right in the Message Display. Calls the previous destination. Also used to enter a pause when entering a FAX number. Destinations can be checked and added.

Displays the FAX screen. Used to call destinations registered to the one-touch key numbers (1 to 22). Also used to register and delete call destinations. Not used in fax mode. Blinks while the machine is accessing the memory.

Blinks during printing and transmission/reception. Displays the Send screen. Selects the menu displayed at the lower left in the Message Display. Shifts to

switch the one-touch key numbers (1 to 11 and 12 to 22). Lamp is lit while shifted (12 to 22).

1-2 Part Names and Functions 1 Used to select a menu item, move the cursor when entering characters, change a value, etc. Selects the chosen item or finalizes the entered value. Clears entered numbers and characters. Resets settings and displays the basic screen. Puts the machine to sleep or wakes it up. Lit when the machine's main power is on. Displays the function menu for FAX. Numeric keys. Enter numbers and symbols. Returns the Message Display to the previous screen.

Lights or blinks when an error occurs. Ends operation (logs out) on the Administration screen. Used to register or recall programs. Cancels the printing job in progress. Starts sending operations and processing for setting operations. 1-3 Part Names and Functions Machine This chapter explains the names of parts of the fax device. For the parts required when functions other than FAX are used, refer to the machine's Operation Guide. 1 4 5 2 3 1 2 Operation panel Main power switch MP (Multi Purpose) tray LINE connector TEL connector Perform the fax operation with this panel. Set this switch to ON when performing the fax or copier operation. The message display lights to enable operation.

Set the paper in this tray when using a type of paper other than the cassette (e.g., when using special paper). Connect the modular cord for the telephone line to this connector. When using a commercially available telephone set, connect the modular cord to this connector.

3 4 5 IMPORTANT: You cannot automatically receive a fax when the main power switch is turned off. To put the machine to sleep, press the Power key on the operation panel. 1-4 Part Names and Functions Document Processor 6 7 1 8 9 10 6 Document Processor Cover Original width guides Original table Original eject table Opening handle Open this cover when the original jammed in the Document Processor. Adjust these guides according to the original width. Stack the sheet originals on this table.

***** 2 Transmission 3 Reception [Exit] Press the System Menu/Counter key.

[You're reading an excerpt. Click here to read official KYOCERA FS-C2126MFP user guide](#)
<http://yourpdfguides.com/dref/3409473>

Press the or key to select [FAX]. Press the OK key. Press the or key to select [Transmission].

4 5 Transmission: ab 3 Local FAX ID 4 Local FAX Number 5 FAX Dialing Mode ***** [Exit] Press the OK key. Press the Mode]. or key to select [FAX Dialing 6 7 FAX Dialing Mode: a b 1 *Tone(DTMF) ***** 2 Pulse(10pps) 3 Pulse(20pps) Press the OK key. Press the or key to select [Tone(DTMF)] , [Pulse(10pps)] or [Pulse(20pps)] according to the type of telephone line you are contracted with. 8 9 Press the OK key. 2-2 Preparation Before Use Selection of Transmit Terminal Identification (TTI) The transmit terminal identification (TTI) is the information about the machine (transmit terminal) to be printed out on the fax on the receiving system. The information includes transmission date and time, the number of transmission pages, the Local FAX Name, and the Local FAX number/ID. This machine enables the user to select if the TTI is printed out on the fax on the receiving system. Regarding the location of the information to be printed, you can select inside or outside of the page image being sent. 2 NOTE: Normally, the Local FAX Name is printed in the transmit terminal identification (TTI).

However, when job accounting has been enabled, and you send originals after entering an Account ID, the Account Name is printed. 1 2 3 4 5 6 7 TTI: ab 1 *Off ***** 2 Outside 3 Inside Press the System Menu/Counter key. Press the or key to select [FAX]. Press the OK key. Press the or key to select [Transmission]. Press the OK key. Press the or key to select [TTI]. Press the OK key. Press the or key to select the desired location for printing the information or [Off] if you don't want to print it. 8 9 Press the OK key.

2-3 Preparation Before Use Setting the TTI information Register the name (local FAX name), fax number, and local FAX ID printed in the transmit terminal identification (TTI) area. By registering the TTI data, the receiver can easily find out where the FAX came from. Part that is operated Local FAX Name Registration Register the local FAX name printed on in the transmit terminal identification. NOTE: To change the entry, follow the same operation. 1 2 3 4 5 6 7 Local FAX Name: Bb * S ABC [Text] Press the System Menu/Counter key. Press the or key to select [FAX]. Press the OK key. Press the or key to select [Transmission]. Press the OK key. Press the or key to select [Local FAX Name].

Press the OK key. Enter the Local FAX Name to be registered. Up to 32 characters can be entered. 8 NOTE: For details on character entry, refer to Specifications (Fax function) on Appendix-6. 9 Press the OK key. 2-4 Preparation Before Use Local FAX Information Entry Register the local FAX information (local FAX number/ID) printed on in the transmit terminal identification (TTI) area. The Local FAX ID is used for transmission limit purposes. (Refer to Transmission Restriction on page 628.) 1 2 3 4 5 2 Press the System Menu/Counter key. Press the or key to select [FAX].

Press the OK key. Press the or key to select [Transmission]. Press the OK key. When you register the Local FAX Number, go to next step. When you register the Local FAX ID, go to step 10.

Local FAX Number Entry 6 7 Local FAX Number: T b * S Press the Number]. or key to select [Local FAX Press the OK key. Use the numeric keys to enter the local FAX number to be registered. Up to 20 digits can be entered. or key to move the cursor.

8 NOTE: Press the To correct the number, press the Clear key to delete the digits one by one before reentering the number. To delete all entered digits and return to the default screen, press the Reset key. 9 Local FAX ID Entry Press the OK key. 10 Press the or key to select [Local FAX ID]. 11 Press the OK key.

Local Fax ID: Db (0000 - 9999) ****1409* 12 Use the numeric keys to enter the local FAX ID number in 4 digits. 13 Press the OK key. 2-5 Preparation Before Use Date and Time Entry Register the date and time of the machine's built-in clock. Because the FAX delayed transmission is conducted based on the time registered here, be sure to register the correct date and time. IMPORTANT: Correct the time displayed on the operation panel regularly.

The time displayed may deviate from the current time due to errors. 1 2 3 4 5 Login User Name: L b ***** Login Password: [Login] Press the System Menu/Counter key. Press the Settings]. or key to select [Common Press the OK key. Press the or key to select [Date Setting]. Press the OK key. A login screen will appear. Then, enter the Login User Name and Login Password to log in. 6 Date Setting: ab 1 Date/Time ***** 2 Date Format 3 Time Zone [Exit] 7 Press [Login] (the Right Select key). The Date Setting menu appears.

8 9 Time Zone: ab 1 *-12:00 Internati ***** 2 -11:00 Midway 3 -10:00 Hawaii Press the or key to select [Time Zone]. Press the OK key. or key to select your region. 10 Press the 11 Press the OK key. 12 Press the or key to select [Summer Time].

2-6 Preparation Before Use NOTE: If you select a region that does not utilize summer time, the summer time setting screen will not appear. 13 Press the OK key. Summer Time: ab 1 *Off ***** 2 On 2 key to select [On] or [Off]. 14 Press the or 15 Press the OK key. 16 Press the or key to select [Date/Time].

17 Press the OK key. ab Date/Time: Year Month Day *2010* 01 01 (Time Zone:Tokyo) 18 Press the or key to move the cursor position, enter year, month and day. 19 Press the OK key. Date/Time: ab Hour Min. Second ****11: 45: 50 (Time Zone:Tokyo) 20 Press the or key to move the cursor position, enter hours, minutes and seconds. 21 Press the OK key. 2-7 Connection to PBX (Private Branch Exchange) (Europe only) When using this machine in environment in which PBX for connection to multiple phones for business use is installed, perform the following PBX setting. NOTE: Before connecting this machine to PBX, it is recommended to contact the company that installed the PBX system to request connection of this machine. Note that correct operation cannot be guaranteed in environment in which this machine is connected to PBX because the functions of this machine may be restricted. PBX Setting Setting value PSTN PSTN/PBX setting Item Description Use when connecting this machine to a public switched telephone network (default).

Use when connecting this machine to PBX. Set a number to access an outside line. For the number, contact the PBX administrator. 6 PBX 0-9 00 - 99 Outside call number setting 1 2 3 4 5 6 7 8 9 Refer to Basic Operation Procedure on page 6-7. Press the or key to select [FAX Call Set.]. Press the OK key. Press the or key to select [Exchange Select.]. Press the OK key. Press the or key to select [PBX].

... 3-29 3-1 FAX Operation (Basic) Automatic Send General transmission using the numeric keys is explained. Switching to the Send Screen Part that is operated Ready to send.

2010/05/25 1 12:30 Press the FAX key. Check that the basic send screen is displayed. Text+Photo 200x100dpi [Orig.Img] [FAX Res.] NOTE: Depending on the settings, the Address Book screen may appear.

In this event, press Reset to display the basic screen for sending. In addition to fax, you can include e-mail transmission and/or folder (SMB/FTP) transmission in a single transmission job (Multi Sending). Press the Send key to select the destinations. For details, refer to Sending in the Operation Guide for the machine. Selection of Transmission Method 2 There are two transmission methods - memory transmission and direct transmission. The default is memory transmission. To select direct transmission, use the following procedure. 1 Press the Function Menu key. Press the TX]. or key to select [FAX Direct Function Menu: ab 7 JobFinish Notice 8 FAX Delayed TX 9 FAX Direct TX ***** [Exit] 2 3 Press the OK key.

3-2 FAX Operation (Basic) 4 5 Press the or key to select [On]. Press the OK key. Setting for Direct transmission Off On Description Starts memory transmission. After originals are scanned into memory, the communication starts. Starts direct transmission. Dials the receiving system, and after the communication has started, originals are scanned. 3 NOTE: In direct transmission, you can designate only one destination for one transmission. Memory Transmission (When originals are placed in the document processor) After originals placed in the document processor are scanned and stored in the memory, the receiving system is dialed. This method is very convenient because you can have originals returned to you without waiting for sending of the originals to be completed. It is suitable for sending multiple-page sheet originals.

Memory Transmission (When originals are placed on the glass surface) This method is suitable for sending book originals that cannot be placed in the document processor. After originals placed on the glass surface are scanned and stored in the memory, the receiving system is dialed. NOTE: When continuous scan is set, you can continue with scanning of a next original after an original on the glass surface has been stored in memory. Every time one page is scanned, you perform an operation to allow continued scanning, and after all the originals have been stored in memory, the receiving system is dialed. Direct Transmission (When originals are placed in the document processor) After the telephone line has connected with the receiving system, scanning of the originals placed in the document processor starts.

When multiple-page originals are placed, each page is scanned after the previous one is sent. Direct Transmission (When originals are placed on the glass surface) This method is suitable for sending book originals that cannot be placed in the document processor. After the telephone line has connected with the receiving system, the originals placed on the glass surface are scanned and sent. NOTE: When continuous scan is set, you can continue with scanning of a next original after an original on the glass surface has been sent. Every time one page is scanned, you perform an operation to allow continued scanning.

3-3 FAX Operation (Basic) Placing Originals 3 Place the originals on the glass surface or in the document processor. Refer to the machine's Operation Guide for placing originals. Dial the Receiving System FAX No. Entry: * Bb 4 Enter the fax number of the receiving system using the numeric keys. [Chain] [Detail] NOTE: When you press the numeric keys to enter numbers, the screen changes to the entry screen for the fax number. NOTE: Up to 64 digits can be entered as the fax number of the receiving system. Spaces will be automatically inserted if you use at the end of the row to advance the cursor before entering more characters. Use or to move the cursor. To correct the number, press the Clear key to delete the digits one by one before reentering the number. To delete all entered digits and return to the default screen, press the Reset key.

Address Recall/Pause Pressing this key adds about three seconds of waiting time during dialing. For example, when dialing the receiving system on an external line, you can use this method to insert a pause before resuming dialing after you dial a specific number. FAX No. Entry: 0123456789* Ab [Chain] [Detail] Make detailed settings for sending as necessary. Press [Detail] (the Right Select key) to display the FAX Detail menu. Press the or key to select [Sub Address], [Encrypted TX], [TX Start Speed] or [ECM] and change settings, and then press the OK key. 3-4 FAX Operation (Basic) Key Sub Address

Description To communicate using the sub address, press this key. For details, refer to Sub Address Communication on page 4-32. To send faxes using encryption, press this key. For details, refer to Encryption on page 6-21.

If a communication error occurred, press this key to change the TX Start Speed. Select the speed from 33,600 bps, 14,400 bps, and 9,600 bps. ECM (error correction mode) is a function to automatically resend an image that has not been correctly sent or received due to the effects of noise on the telephone line during transmission. To change the ECM communication setting, press this key. On Hook Press this key to connect to the telephone line.

When the FAX number has been entered, the machine starts dialing to the receiving system. After pressing this key, you can dial the number of the receiving

system using the numeric keys. For details, refer to Manual Send on page 4-10. Dialing methods without using the numeric keys . . . Using the Address Book (Refer to page 3-15.) Using One-touch Keys (Refer to page 3-26.

) Manual Redial (Recall) (Refer to page 3-29.) Encrypted TX TX Start Speed 3 ECM 3-5 FAX Operation (Basic) Selecting the Resolution 5 Select the resolution suitable for sending originals. ·200 × 100 dpi (Normal): when sending originals with standard size characters Typical character size: 10.5 point (example: Resolution Resolution) ·200 × 200 dpi (Fine): when sending originals with relatively small characters and thin lines Typical character size: 8 point (example: Resolution Resolution) ·200 × 400 dpi (Super Fine): when sending originals with minute characters and lines Typical character size: 6 point (example: Resolution Resolution) ·400 × 400 dpi (Ultra Fine): when sending originals with minute characters and lines more finely Typical character size: 6 point (example: Resolution Resolution) NOTE: The default setting is 200 × 100 dpi (Normal).

[You're reading an excerpt. Click here to read official KYOCERA FS-C2126MFP user guide](http://yourpdfguides.com/dref/3409473)
<http://yourpdfguides.com/dref/3409473>

The higher the resolution, the clearer the image. However, higher resolution also means longer send times. Normally, 400 × 400 dpi (Ultra Fine) is recommended. The scan resolution should be equal to or higher than the fax resolution. If the selected resolutions are not in this condition, the machine automatically adjusts the resolution and changes the selection. 1 2 Press the Function Menu key.

Press the or Resolution]. Press the OK key. Press the resolution. or key to select the desired key to select [FAX 3 FAX Resolution: ab 1 *200x100dpi Norm. ***** 2 200x200dpi Fine 3 200x400dpi S.Fin 4 5 Press the OK key. 3-6 FAX Operation (Basic) IMPORTANT: -If you select a high resolution, the image becomes clearer. However, the higher the resolution is, the longer the send time is. -When you send originals at a resolution of 200 × 400 dpi (Super Fine) or higher, the fax machine on the receiving system needs to be capable of receiving the originals at such image quality. When the receiving system does not have such capability, originals are sent at an image quality of 200 × 200 dpi (Fine).

Selecting the Density 3 6 Adjusting the density when scanning originals -Manual (-3 to +3): You can adjust the density using seven levels. -Auto: The optimal density is chosen according to the density of the originals. 1 2 3 Press the Function Menu key. Press the or key to select [Density]. Press the OK key.

Press the [Manual]. or key to select [Auto] or Density: ab 1 *Auto ***** 2 Manual 4 5 Press the OK key. Proceed to the next step if you selected [Manual] in step 4. Press the density. or key to select the desired Manual: ab 1 u Lighter -3 ***** 2 v Lighter -2 3 w Lighter -1 6 7 Press the OK key.

3-7 FAX Operation (Basic) Send Start 7 Press the Start key. Transmission begins. NOTE: When On is selected in Destination Check before Send, a destination confirmation screen is displayed when you press the Start key. For details, refer to Confirmation Screen of Destinations on page 5-13. Checking the Send Status 1 Press the Status/Job Cancel key. 2 Press the Status]. or key to select [Send Job Send Job Status: a b 0010 b 0667643333 r

***** 0011 p Broadcast 0017 b 0324256345 [Cancel] [Menu] 3 Press the OK key. A list of send job statuses appears. Cancelling the Transmission 1 In the above screen for checking send jobs, press the or key to select the job you want to cancel. Press [Cancel] (the Left Select key).

Send Job Status: a b 0010 b 0667643333 r 0011 p Broadcast 0017 b 0324256345 ***** [Cancel] [Menu] 2 3 Press [Yes] (the Left Select key). This cancels the transmission. NOTE: Pressing the Stop key on the operation panel while originals are being scanned cancels the transmission.

3-8 FAX Operation (Basic) FAX Automatic Reception When using this machine as a FAX-dedicated machine that does not receive telephone calls, set the machine to FAX-dedicated reception. No special operation is required when receiving faxes. NOTE: When you are receiving DRD service from a telephone company, change the reception method to [Auto (DRD)]. For details, refer to DRD Reception on page 6-11. 3 Part that is operated Reception Method This machine allows the following five reception methods. Auto (Normal) Auto (FAX/TEL) (Refer to page 6-2.) Auto (TAD) (Refer to page 6-4.)

) Auto (DRD) (Refer to page 6-11.) Manual (Refer to page 4-12.) Checking and Changing the Reception Method 1 Press the System Menu/Counter key. 2 3 4 5 Press the or key to select [FAX]. Press the OK key.

Press the or key to select [Reception]. Press the OK key. 3-9 FAX Operation (Basic) Reception: ab 4 Rings(FAX/TEL) 5 Forward Settings 6 RX Settings ***** [Exit] 6 Press the or key to select [RX Settings]. 7 RX Settings: ab 1 *Auto(Normal) ***** 2 Auto(FAX/TEL) 3 Auto(TAD) Press the OK key. Press the or key to select [Auto(Normal)].

8 9 Reception Starts Press the OK key. 1 When a fax has been sent to you, the machine rings the registered number of times, and then starts receiving the fax. After reception has started, the Processing indicator blinks. NOTE: You can change the number of times the ringing tone rings. (Refer to Rings on page 6-16.)

To cancel the reception, refer to Cancelling Transmission (Disconnection of Communication) on page 3-13. Reception Print 2 Received originals are output on the top tray with the print side facing downward. Up to 150 sheets of plain paper (80 g/m²) can be held on the top tray. However, the number of sheets varies with the condition of the paper to be used. IMPORTANT: When the number of sheets to be printed exceeds the number of sheets that can be held, remove all the paper on the top tray.

3-10 FAX Operation (Basic) Memory Reception When the machine cannot print a fax due to paper running out or a paper jams, it temporarily stores originals that have been sent in the image memory. When the machine returns to the printable state, printing starts. During memory reception, FAX Reception

Printing Jobs are displayed on Printing Jobs of the Status screen. To print the received originals, supply paper or remove jammed paper. 3 NOTE: For the Status screen, refer to the machine's Operation Guide. 3-11 FAX Operation (Basic) Cancelling Communication The method for cancelling communication with this machine differs depending on the transmission method (memory transmission or direct transmission) and communication form. Methods of cancelling in various cases are explained here. Cancelling Memory Transmission (while originals are being scanned) During memory transmission, to cancel scanning of originals, press the Stop key on the operation panel. Scanning of originals is canceled, and the originals are ejected. When originals remain in the document processor, take them out from the original output table.

Cancelling Memory Transmission (during communication) During memory transmission, to cancel communication after it has started following the completed scanning of originals, use the following procedure. NOTE: If user management is set to On, the administrator or the user who performs the memory transmission can be canceled the job. You can cancel transmission by disconnecting the telephone line. For details, refer to Cancelling Transmission (Disconnection of Communication) on page 3-13. 1 Press the Status/Job Cancel key.

2 3 4 5 Press the or key to select [Send Job Status]. Press the OK key. Press the cancel. or key to select the job you want to Send Job Status: a b 0010 b 0667643333 r 0011 p Broadcast 0017 b 0324256345 ***** [Cancel] [Menu] Press [Cancel] (the Left Select key). 6 Press [Yes] (the Left Select key).

[You're reading an excerpt. Click here to read official KYOCERA FS-C2126MFP user guide](http://yourpdfguides.com/dref/3409473)

Press the OK key. Press [Yes] (the Left Select key). The destination is registered to the One-touch key. When deleting registration contents 1 2 3 Press the or key to select [Delete]. Press the OK key. Press [Yes] (the Left Select key). This deletes the content registered to the One-touch key.

5 Press [Exit] (the Right Select key). 3-28 FAX Operation (Basic) Dialing the Same Receiving System (Redial) Redial is a function allowing you to dial the last entered number once again. Automatic Redial This function automatically redials a receiving system that does not respond when you try to send fax. No particular setting is required for automatic redial. Because the machine redials repeatedly at a regular interval, you do not need to worry even when the communication by the receiving system is prolonged.

3 NOTE: When using direct transmission, the machine does not automatically redial. You can change the number of automatic redials from between 0 and 14. For details, refer to Retry Times on page 6-13. You cannot send delayed transmission immediately while the machine is waiting for redial. Manual Redial (Recall) Use this when the receiving system does not respond when you have tried to send a fax. When you want to send the fax to the same receiving system, press the Address Recall/Pause key, and you can call the receiving system you dialed on the destination list. Ready to send. Dest.: 1 b :0987654321 Text+Photo 200x100dpi [Orig.Img] [FAX Res.

] 1 Press the Address Recall/Pause key. The receiving system you dialed is displayed on the destination list. NOTE: When the last transmission included multiaddress transmissions and computers and e-mail destinations, they are also displayed. If necessary, add or delete the receiving system. 2 Press the Start key. The transmission will start. NOTE: When On is selected in Destination Check before Send, a destination confirmation screen is displayed when you press the Start key. For details, refer to Confirmation Screen of Destinations on page 5-13. Recall information is canceled in the following conditions. . . . When you turn the power off When you send a next fax (new recall information is registered) When you log out 3-29 FAX Operation (Basic) 3-30 4 FAX Operation (Advanced) This chapter explains the method to effectively use FAX.

.... 4-55 4-1 FAX Operation (Advanced) Delayed Transmission When you have set a transmission start time, this function automatically sends originals at the preset time. You can use delayed transmission together with the broadcast transmission function, etc. The method for sending originals to one destination after setting the start time is explained here. IMPORTANT: If the current time is incorrect, the communication cannot be performed correctly at the specified time. If the indicated current time is incorrect, adjust the time correctly. In this case, adjust the time.

For details, refer to Date and Time Entry on page 2-6. NOTE: You cannot select direct transmission. Set the time from between 00:00 and 23:59 in one-

minute increments. Together with standby transmission and interrupt send, you can set up to 30 destinations for delayed transmission. When two or more delayed transmissions are set for the same time, the communication will start in the order that the delayed transmissions have been set.

When delayed transmissions have been set in reverse order, however, sending of originals to be sent to the same destination is prioritized over the ones to be sent to different destinations. You can cancel a delayed transmission any time before the specified transmission time. You can also send a delayed transmission before the specified time. (Refer to *Canceling and Sending Delayed Transmissions (Queued)* on page 3-13.) You can change destinations of a delayed transmission any time before the specified transmission time.

(Refer to *Checking Scheduled Job* on page 4-3.) **Batch Transmission Function** When fax originals to be sent to the same destination are set to the same transmission start time with delayed transmission, you can send up to 10 groups of originals using batch transmission. This function prevents repeated communication to the same destination and reduces the communication cost. **NOTE:** You cannot send originals as a batch transmission in the case of direct transmission. You cannot select destinations using a combination of direct entry and One-touch keys. In the case of broadcast transmission, when you have set two or more groups of originals to the same transmission start time, and each group includes the same receiving system fax number, you cannot send the originals as a batch transmission. When the transmission start time has come, and there are fax originals waiting for redial to the same receiving system, the waiting originals are also sent together as a batch transmission. When job accounting is ON, only the originals with the same account ID set using delayed transmission are sent as a batch transmission.
