..... Maintain or fix quality problems Troubleshoot All-In-One problems Device status and ink levels More printing ideas and how to's Contact information Advanced (Skin, voice, and communication options) View the software version and copyright information Note: For more information about the All-In-One Main Page, click the Help button located in the upper right corner of the screen. For more information about the Lexmark Solution Center, see page 8. Note: For more information about this page, click the Help button located in the upper right corner of the screen. 6 Using Print Properties Print Properties is the software that controls the All-In-One printing function. You can change the settings in Print Properties based on the type of project you want to create. You can open Print Properties from almost any program: Print Properties tabs All of the print settings are on the three main tabs of the Print Properties software: Quality/Copies, Paper Setup, and Print Layout. 1 From the program File menu, click Print. 2 In the Print dialog box, click Properties, Preferences, Options, or Setup (depending on the program). The Print Properties screen appears. From this tab: Quality/Copies You can change these settings: Quality/Speed -- Select a Quality/Speed setting.

Multiple Copies -- Customize how the All-In-One prints several copies of a single print job, collated or normal. Print Color Images in Black and White -- Select this to print color images in black and white. Note: Some programs open Print Properties differently. Print Properties Quality Copies tab and I Want To menu Print Properties tabs Use the Quality/ Copies, Paper Setup, and Print Layout tabs to select the print settings. "I Want To" menu Select one of the projects from the menu to help print photos, banners, envelopes, posters, and more. Paper Setup Type -- Select the type of paper you are using. Paper Size -- Select the size of the paper you are using. Orientation -- Select how you want the document oriented on the printed page.
