Front view Front Camera Lens - Use to take a picture of yourself or to video chat on supported applications. Proximity Sensor/Ambient Light Sensor - Senses proximity toward other objects, such as your head during a call, so that you do not accidentally activate unwanted features. - To avoid problems with the touchscreen, do not block the sensor or near the sensor. Earpiece LED Indicator Quick Keys - Gives you quick access to your most used applications. - To add an icon, drag and drop it in the bar. - To remove an icon, touch and hold it and remove it from the bar.

Menu Key - Displays available options for the current screen or application. Home Key - Returns to the Home screen from any screen. - Touch and hold to access your most recently used applications. Back Key - Returns to the previous screen. - Closes pop-up menus and dialog boxes.

13 Getting to know your phone NOTE: The back cover of this product applies a "self-healing" technology, which self-repairs minor scratches in just a few minutes. Minor scratches are those caused by ordinary and normal use of the phone. Scratches caused by abrasive surface, misuse, including but not limited to intentional scratches, and damages caused by a fall or dropping the product, may not disappear. The "self-healing" results may vary depending on the extent of the damage as well as other conditions. Any warranty on the "self-healing" is hereby expressly excluded.

Warning! Placing a heavy object on the phone or sitting on it can damage its LCD and touch screen functionalities. Do not cover the LCD's proximity sensor with a protective film. This can cause the sensor to malfunction. TIP! whenever you open an application to check what Tap the Menu Key options are available. Side view Microphone (Sub) Micro SIM card slot Eject Button Aperture Microphone (Main) 3.5mm Headset Jack Charger/Accessory Port 14 Rear view Back Camera Lens IR (infrared) LED Volume Keys Flash Power/Lock Key NFC touch point Speaker Notice The NFC antenna for this model is on the back cover. 15 Getting to know your phone Installing the micro SIM card Before you can start exploring your new phone, you'll need to set it up. The micro SIM card tray eject button is a small round aperture on the tray door. To install a new micro SIM card: 1 Insert the micro SIM eject tool that comes with the phone (or a thin pin) into the eject button aperture and push gently but firmly until the tray pops out. Eject button aperture 2 Remove the tray and place the micro SIM card inside it (see image above).

There is only one possible way to fit the card snugly into the tray. 3 Carefully reposition the tray in the slot and push it gently back into the phone. NOTE: Turn the phone off before inserting or removing the SIM card. Warning! Always be careful. The ejection tool is a very sharp. 16 Charging your phone 1 Connect the wall adapter and USB cable as shown below. The USB symbol on the USB cable should face toward you. 2 Plug the USB cable (as shown below) into the phone's Charger/Accessory Port. Make sure the USB symbol is facing upwards. Always unplug the charger from the wall socket after the phone is fully charged to save unnecessary power consumption of the charger.

17 Getting to know your phone NOTE: • The battery must be fully charged initially to improve battery lifetime. • Your phone has an internal antenna. Be careful not to scratch or damage this rear area, as that will cause loss of performance. Warning! • Use only LG-approved chargers, batteries and cables.

When using unapproved chargers or cables, it may cause battery slow charging the message regarding charging delay.

Or, unapproved chargers or cables can cause the battery to explode or damage the device, which are not covered by the warranty. • Charging may be interrupted when you use a USB hub, which is not retained rated voltage. NOTE: Non-Removable Battery Your phone has an internal, rechargeable battery that should be replaced only by LG or an authorized LG repair center. You should never try to open or take apart this phone yourself. Opening the phone can cause damage that will void your warranty.

18 Switching between and exiting applications Multi-tasking is easy with Android because open applications keep running even when you open another application. There is no need to quit an application before opening another. Use and switch among several open applications. Android manages each application, stopping and starting them as needed, to ensure that idle applications don't consume resources unnecessarily. Switching between applications - Touch and hold the Home Key . A list of recently used applications will be displayed. Then tap the application you want to access. - To remove an application from the list, swipe the app preview to the left or right. To stop/exit an application 1 From the Home screen, tap the Menu Key and tap System settings > General tab > Apps. 2 Tap one of the tabs at the top of the screen, choose the desired application and tap Force stop (or Stop) to stop the application.

19 Your Home screen Touch screen tips With the touch of your finger, you can access available applications, make menu selections, and access data saved to your phone. The following terms are used for describing the different available actions using the touchscreen: Tap - A single finger tap selects items, links, shortcuts and letters on the on-screen keyboard. Touch and hold - Touch and hold an item on the screen by touching it and not lifting your finger until an action occurs. For example, to open a contact's available options, touch and hold the contact in the Contacts list until the context menu opens. Drag - Touch and hold an item for a moment and then, without lifting your finger, move your finger on the screen until you reach the target position. You can drag items on the Home screen to reposition them. Swipe or slide - To swipe or slide, quickly move your finger across the surface of the screen, without pausing when you first touch it (so you don't drag an item instead). For example, you can slide the screen up or down to scroll through a list, or browse through the different Home screens by swiping from left to right (and vice versa). Double-tap - Double-tap to zoom on a Web page or a map. For example, quickly double-tap a section of a Web page to adjust that section to fit the width of the screen.

You can also double-tap to zoom in and out when using Maps. Pinch-to-Zoom - Use your index finger and thumb in a pinch or spread motion to zoom in or out when using the browser, Maps, Camera, or browsing pictures. Rotate the screen - From many applications and menus, the orientation of the screen adjusts to the device's physical orientation. 20 NOTE: • To select an item, tap the center of the icon. • Do not to press too hard; the touch screen is sensitive enough to pick up a light, firm touch.

• Use the tip of your finger to tap the option you want.

[You're reading an excerpt. Click here to read official LG G FLEX user guide](http://yourpdfguides.com/dref/5528296)

<http://yourpdfguides.com/dref/5528296>

Be careful not to tap any other keys or icons. Proximity sensor When receiving and making calls, this sensor automatically turns the backlight off and locks the touch keypad by sensing when the phone is near your ear. This extends battery life and prevents the touch keypad from activating unintentionally during calls. NOTE: When turning the screen on, make sure you do not cover the proximity sensor.

Doing so will not allow you to turn the screen on. 21 Your Home screen Lock your phone When you are not using the phone, press the Power/Lock Key to lock your phone. This helps prevent accidental presses and saves battery power. Also, if you do not use the phone for a while, the Home screen, or other screen you are viewing, is automatically replaced with the lock screen after 30 seconds (depending on the screen timeout settings) of inactivity to conserve the battery and prevent pocket dialing. To wake up your phone, press the Power/Lock Key appear. Swipe the screen in any direction to unlock. The last screen you were working on opens. NOTE: • The automatic screen timeout can be configured manually in Settings. To change it, tap the Menu Key > System settings > Display tab > Screen timeout.

• If there are any programs running when you lock the phone, they may still be running in lock mode. It is recommended that you exit all programs before entering the lock mode to avoid unnecessary charges (e.g., phone call, web access and data communications). Quick Switch to Silent/Vibrate Mode To quickly set your phone to silent or vibrate mode, slide the Status Bar down and tap until or appears. 22 Home Screen Overview The main Home screen is the starting point for many applications and functions, and it allows you to add items like application icons, shortcuts, folders or widgets to give you instant access to information and applications. This is the default page and accessible from any menu by tapping the Home Key. On your Home screen, you can view menu icons at the bottom of the screen. Menu icons provide easy and one-touch access to the functions you use the most. 23 Your Home screen Navigating Through the Home Screen Canvases Your phone has several Home screen canvases.

If you like, you can place different applications on each of the Home screen canvases. From the main Home screen canvas, swipe the screen with your finger in either direction. The main Home screen canvas is located in the middle. Edit canvases To add more canvases, pinch in on the Home screen and tap. To move a panel to another location, touch and hold it, then drag and drop it at the desired location.

To set a canvas as the default canvas, tap Set default Home screen, then tap the desired canvas. To return to the Home screen, pinch out or tap the Back Key. You can also customize each canvas with shortcuts, folders, and widgets, which are shortcuts to your favorite applications. NOTE: On the Home screen, you can view the Quick Keys at the bottom of the screen. The Quick Keys provide easy, one-touch access to the functions you use the most.

24 Unlocking the Screen 1 Press the Power/Lock Key appear. to turn on your screen. Your Lock Screen will NOTE: Avoid covering the proximity sensor when turning the screen on. Doing so immediately turns the screen off. 2 From the center of the screen, swipe in any direction to unlock it. • Shortcuts can be added for quick access to your favorite apps. To add shortcuts, access the Settings menu, tap the Display tab > Lock screen > Shortcuts. • To use a shortcut, swipe the shortcut icon at the bottom of the screen in any direction. The screen will unlock and open the application. 25 Your Home screen QuickTheater QuickTheater allows you to see the slideshow for photos, videos, and YouTube.

1 From the lock screen, hold the phone horizontally. 2 Use both thumbs and slide them apart. 3 Choose the desired option. NOTE: The screen lock mode should be set as Swipe in order to use the QuickTheater function. KnockON The KnockON feature allows you to double-tap the screen to easily turn it on or off. You can enable/disable this feature in the Gestures settings. To enable or disable KnockON 1 From the Home screen, tap the Menu Key > System settings > General tab > Gestures. 2 Tap the check box next to the Screen on/off option to enable or disable KnockON. To turn the screen on Quickly double-tap the center of the Lock screen to turn the screen on. 26 To turn the screen off Quickly double-tap an empty area of the Home screen, Lock screen, or the Status Bar. NOTE: Tap on the center area of the screen. If you tap on the bottom or the top area, the recognition rate may decrease. Navigating Through the Sub-Menus Sub-menus are available when you are at any Home screen or have selected a feature or application such as Phone, Contacts, Messaging or Browser. 1 Touch the Menu Key. A sub-menu displays at the bottom of the phone screen.

2 Tap an option. 27 Your Home screen Customizing your Home screen You can customize your Home screen by adding quick access items, such as shortcuts to an application, widgets, or changing the wallpaper. • Apps: Add shortcuts to applications on the Home screen. • Widgets: Add dynamically updating widgets to your Home screen to allow quick access to applications without opening the full application • Wallpapers: Change the Home screen wallpaper. To add shortcuts to apps or widgets on the Home screen: 1 Touch and hold an empty part of the Home screen.

2 Select a location (Home screen canvas) to add an item by swiping the Home screen from left to right or vice versa. 3 Tap the type of item you want to add on the screen: Apps or Widgets. 4 Tap the desired app or widget. 5 You will see a new icon on the Home screen. To place it on a different canvas, touch and hold it to drag it to the desired location and release your finger from the screen. 28 TIP! To add a preloaded application or an application you have downloaded from Play Store to the Home screen, simply touch and hold the icon you want in the Apps screen and drag it to the desired Home screen canvas. To remove an item from the Home screen: If there is no available space on a particular Home screen panel, you must delete or remove an item before you can add another item. In this case, you have the option of switching to another Home screen panel. To delete an application icon from the Home screen, touch and hold the at the top of shortcut icon or widget you want to delete and drag to Remove the screen. When changes to, lift your finger.

You cannot delete the preloaded applications. (Only their icons can be deleted from the screen). Customizing application icons on the Home screen You can customize each application icon with images from your Gallery. 1 Touch and hold an application icon until it's unlocked from its current position. Then drop it on the screen. The editing icon will appear in the upper right corner of the application. NOTE: If an icon you placed can be resized, you will see a blue box around the icon after you touch, hold and release it.

[You're reading an excerpt. Click here to read official LG G FLEX user guide](http://yourpdfguides.com/dref/5528296)

<http://yourpdfguides.com/dref/5528296>

Drag the edges of the box to resize it. 2 Tap the application icon. 3 Tap the icon design you want from the available Theme icon choices and change the size (if desired), then tap OK.

OR Tap Photo icon, then tap Add new. Set the size for the icon, then tap OK. Select the image want to use for the application. Crop the image if necessary, then tap OK. 29 Your Home screen NOTE: •Your customized application icon(s) are only applied to icons on your Home screen.

The Applications screen is not affected. •Your custom photo icons are saved so you can easily select them for any of your icon images. Creating Folders on the Home screen You can create application folders to hold similar applications if you wish. On the Home screen 1 Touch and hold an icon to unlock it from its positions. Then drag it over another icon and release it.

2 A folder will be created. On the Apps screen 1 From the Home screen, tap the Apps Key to open the Apps screen. 2 Touch the Apps tab (if necessary), touch , then touch and hold the desired icon to release it from its position. 30 3 Drag the icon over another icon and release it to create a folder. NOTE: To rename a folder or change its color, touch the desired folder. Touch the drop-down menu to change the name or select a folder color. Customizing the Apps screen 1 From the Home screen, tap the Apps Key . 2 Tap the Apps tab at the top of the screen to go to the Apps screen, if it is not already selected. 3 Touch the Menu Key to access the following options: • View apps by: Tap to sort your applications either in alphabetical order, by downloaded date, or user customized. • Show small/large icons: Tap to change the application icons to either small or large, then tap Yes to set your choice.

• Apps wallpaper: Tap to change the wallpaper background. Scroll horizontally to view all of your choices, tap the one you want, then tap Apply. • Hide/Show apps: Tap to set which application icons will be displayed in your Applications screen. Checkmark the icons you want to hide, then tap OK. 31 Your Home screen Home screen clean view You can see the wallpaper without items on the Home screen by pinching out. Pinch in or tap the Back Key to see applications and widgets again. Quick access To view the quick access items, touch anywhere in the front key area and drag up. The following options are available: Voice Mate, Google Search, and QuickMemo. 32 Notifications Notifications alert you to the arrival of new messages, calendar events, and alarms, as well as to ongoing events, such as video downloads. From the Notifications panel, you can view your phone's current status and pending notifications.

When a notification arrives, its icon appears at the top of the screen. Icons for pending notifications appear on the left, and system icons showing things like Wi-Fi or battery strength on the right. NOTE: The available options may vary depending on the region or service provider. Notification icons System icons Accessing notifications Swipe the Status Bar down to open the Notifications panel to access notifications. To close the Notifications panel, swipe the bar at the bottom of the screen upwards.

Quick Settings Use the Quick Settings to easily toggle function settings like Wi-Fi, manage display brightness and more. To access the Quick Settings, swipe the Status Bar down to open the Notifications panel and select any of the available Quick Setting apps at the top of the screen. 33 Your Home screen NOTE: Touch and hold an icon on the Quick Settings menu to go directly to that setting's menu screen. To rearrange Quick Setting items on the Notification panel Open the Notifications panel, swipe the Quick Settings to the left, and tap To rearrange items, drag to the desired location. To add more icons, checkmark the desired functions.

. Notification icons on the Status Bar Notification icons appear on the Status Bar at the top of the screen to report missed calls, new messages, calendar events, device status and more. The icons listed in the table below are some of the most common ones. Icon Description No Micro SIM card inserted No network signal Airplane mode is on Icon Description Vibrate mode is on Battery fully charged Battery is charging 34 Connected to a Wi-Fi network Wired headset connected Call in progress Call hold Missed call Bluetooth is on NFC is on System warning Alarm is set New voicemail message Mobile HotSpot active or USB tethering active DLNA music playing Downloading data Uploading data GPS is acquiring location Receiving location data from GPS Data is syncing New Gmail message New Hangouts message New text/multimedia message Song is playing Phone is connected to PC via USB cable DLNA content share 35 Your Home screen Entering Text You can enter text using the on-screen keyboard. The on-screen keyboard displays automatically on the screen when you need to enter text. To manually display the keyboard, simply tap a text field where you want to enter text. There are following types of keyboards that you can use: Google voice typing and LG Keyboard. To select the default keyboard type From the Home screen, tap the Menu Key > System settings > General tab > Language & input > Default (Under Keyboard & Input Methods). 2 Select the default keyboard. 1 To select the keyboard type while using the On-screen Keyboard While entering text, you will see on the Status Bar.

To change the input method: 1 Pull down the Status Bar to open the Notifications Panel. 2 Tap Choose input method and select the desired input method. 36 Google Voice Typing Google voice typing uses Google voice recognition to convert speech to text. 1 Pull down the Status Bar and tap Choose input method > Google voice typing. OR Tap on the keyboard. 2 Speak into the phone's microphone and watch your text being entered on screen. 3 If the text is incorrect, tap the word and correct it. LG Keyboard The LG Keyboard allows you to choose from a QWERTY keyboard, Phone keyboard, and Handwriting input modes. To change the keyboard: 1 While entering text, touch and hold , then tap . 2 Tap Input language and type, then tap next to the desired language.

3 Tap the desired keyboard type and tap the Back Key repeatedly to go back to the entry screen. 37 Your Home screen NOTE: To use the Handwriting feature, touch and hold then tap . on the keyboard, QWERTY Keyboard Letters Entry Keyboard Shift Key - Tap once to capitalize the next letter you type. Tap again to turn on CAPS lock. Tap again to turn off CAPS lock.

Each half withdraws to left and right of the screen. Tips for Editing Text Your phone gives you many options to make entering text easier, including copying, cutting, and pasting text, using voice-to-text input, customizing the user dictionary, using predictive text, and more. To cut/copy and paste: 1 Touch and hold a word to highlight it. 2 Drag the blue highlight markers to highlight the text you want. OR To select all the text, tap Select all in the context menu. •To cancel the selection, simply tap unselected text or empty area.

3 Tap Cut or Copy in the context menu. 4 Place the cursor on the location where you want to paste the text. 5 Tap the cursor and tap Paste. The text that you pasted also remains in the phone's memory (temporarily), so you can paste that same text in another location. 44 Using the Clip Tray Easily access the contents you stored in the Clip Tray whenever and wherever you want.

You can copy images or texts and keep them in the Clip Tray. Then you can paste them whenever you want. 1 Touch and hold text and images while editing them and tap Clip Tray. 2 Touch and hold the text input field and select Clip Tray. You can also access the Clip Tray by touching and holding > .

NOTE: •This function may not be supported in downloaded apps. •You can save up to 20 items in the Clip Tray. •Touch and hold an item in the Clip Tray, then tap to delete it. Text Link Text Link recommends apps related to text in messages or other text you've selected. It connects directly to Calendar, Contacts, Phone, Messaging, Email, Browser, Maps, YouTube, Calculator, and more. NOTE: •If your phone is set to English or Korean, Text Link performs more functions than in other language settings. •Overly long sentences are subject to limitations. •Arithmetic operators (such as +, -, * and /) start the Calculator. •If Text Link is not linked to an app, the Browser can be used for searching. 45 Your Home screen To use Text Link: ••• Tap a message bubble with the icon.

Highlight text on a webpage or emails and select Text Link. Tap Share and select Text Link . 46 Dual Window This feature allows you to use two apps at the same time. Setting up Dual Window Dual Window should be set before using the feature. 1 From the Home screen, tap the Menu Key > System settings > General tab > Multitasking. 2 Tap the Dual Window checkbox to enable/disable this feature. Using Dual Window 1 Touch and hold the Back Key to split the screen. 2 Touch or drag an app icon to the desired space. (Switch icon) : Switch two screens. (Drag icon) : Drag to resize the split screens.

(Menu icon) : Tap to view the app list, change to full screen or close the current app. 47 Your Home screen Plug & Pop Plug & Pop allows you to quickly choose apps to use when plugging in an earphone or On-the-Go device, such as a mouse or keyboard. 1 Plug in an earphone or OTG (On-the-Go) device (i.e., mouse, keyboard, etc.

). 2 The applications panel will display at the bottom of the screen and you can select an app to run. NOTE: You can edit the applications to display on the panel and set not to show the applications panel. Tap > > System settings > General tab > Accessory > USB storage or Earphone. Select the desired options on the Edit app panel menu.

48 Google account setup The first time you open a Google application on your phone, you will be required to sign in with your existing Google account. If you do not have a Google account, you will be prompted to create one. Creating your Google account 1 From the Home screen, tap the Apps Key . 2 Tap Settings > General tab > Accounts & sync > Add account > Google > New. 3 Enter your username and tap . Your phone will communicate with Google servers and check for username availability. 4 Enter and re-enter your password. Then follow the instructions and enter the required and optional information about the account. Wait while the server creates your account. Signing into your Google account 1 From the Home screen, tap the Apps Key .

2 Tap Settings > General tab > Accounts & sync > Add account > Google > Existing.

[You're reading an excerpt. Click here to read official LG G FLEX user guide](http://yourpdfguides.com/dref/5528296)
<http://yourpdfguides.com/dref/5528296>

3 Enter your email and password and tap . 4 Read the disclaimer about signing in and checkmark if you want to keep updated with news and offers from Google Play. Then tap OK. 5 After signing in, you can use Gmail and take advantage of Google services on your phone. 6 Once you have set up your Google account, your phone will be automatically synchronized with your Google account on the web. (Depending on your synchronization settings.) 49 Google account setup After signing in, your phone will sync with your Google services, such as Gmail, Contacts, Calendar, and Google+ photo albums. You can also use Maps, download applications from Play Store, back up your settings to Google servers, and take advantage of other Google services on your phone.

IMPORTANT • Some applications, such as Calendar, work only with the first Google Account you add.

If you plan to use more than one Google Account with your phone, be sure to sign into the one you want to use with such applications first. When you sign in, your contacts, Gmail messages, Calendar events, and other information from these applications and services on the web are synchronized with your phone. If you don't sign into a Google Account during setup, you will be prompted to sign in or to create a Google Account the first time you start an application that requires one, such as Gmail or Play Store. • If you have an enterprise account through your company or other organization, your IT department may have special instructions on how to sign into that account. 50 Calls Making a call 1 2 3 4 From the Home screen, tap the Phone Key to open the keypad.
