LINKSYS® by Cisco

Internet Fast

Just connect your DSL or Cable Modem to the EtherFast® Cable/DSL Router with 8-Port Switch and all the computers in your household can share a wired connection to the Internet, at the same time.

When Eight is Enough

The built-in 8-port switch lets you attach four local devices directly, or daisy-chain out to more hubs and switches as your network grows. Once your computers are connected to the Internet through the Router, they can communicate with each other, sharing resources and files.

Easy Installation

The step-by-step Setup Wizard shows you how to configure your router. Universal Plug-and-Play (UPnP) lets specialized Internet applications configure the Router so you don't have to.

Secure Operation

Built-in NAT technology helps keep intruders out of your computers.

DATASHEET

Share your high-speed cable or DSL Internet connection with multiple computers.

Built-in switch connects eight local PCs directly, and daisy-chain out to more hubs and switches as your network grows.

Supports QoS, DHCP, Universal Plug-and-Play (UPnP), and includes a user-friendly Setup Wizard for easy configuration.

Compatible with all Internet Service Providers.

EtherFast Cable/DSL Router with 8-Port Switch

Model: BEFSR81 (EU)
