.....

@@Top recording engineers and producers in studios around the world use M-Audio monitors. @@The Studiophile AV 40 has been designed and tested by veteran audio engineers to meet your needs in a desktop audio monitoring environment. Custom-tuned cabinets, optimized speaker design, and advanced crossover technology deliver the best sound you can get in monitors this size. Complete with magnetic shielding for desktop use, Studiophile AV 40 delivers great audio experiences from your music and multimedia applications. @@@@It is designed to discharge very low frequency signals and enhance the overall bass response.

Along with the other components, the Studiophile AV 40's enclosure plays an important role. In order to provide more stable performance, we used a special medium-density fiberboard (MDF) and unique interior reinforcement designed to absorb vibration and impact generated under extreme conditions. Additionally, our innovative speaker monitor cabinet includes carefully placed acoustic material that makes the Studiophile AV 40 sound much bigger than it is--resulting in a smooth, natural bass response. Studiophile AV 40 User Guide | 3 English Italiano Español Deutsch Français 6. Stereo Auxiliary Input and Headphone Output 7.

Network & Power Amplifiers For maximum flexibility, we have included a stereo "Aux" input which allows you to plug in a secondary audio source (such as your portable music player) in addition to the main RCA and 1/4" TRS inputs in the back. The volume control works on all inputs simultaneously.

@@@@@WARNING! @@@@You can also use the black 1/8" stereo mini cable to connect a secondary audio device to the "Aux" input on the front of the Studiophile AV 40. 2 Setting the "Bass Boost" EQ Switch 3 This 2-position switch provides a subtle increase in bass response. The On mode increases the low-frequency gain slightly via the woofer and bass-reflex port. The Off mode produces a natural, even response for most listening conditions. @@@@1. @2. @@Visit [www.m-audio.com](http://www.m-audio.com).
