**Manual abstract:**

@@@ Before using battery charger, read all instructions and cautionary markings on (1) battery charger, (2) battery, and (3) product using battery. 3. CAUTION To reduce risk of injury, charge only MAKITA rechargeable batteries. Other types of batteries may burst causing personal injury and damage. 4. Non-rechargeable batteries cannot be charged with this battery charger. 5. Use a power source with the voltage specified on the nameplate of the charger.

Do not expose charger to rain or snow. 8.

Never carry charger by cord or yank it to disconnect from receptacle. 9. After charging or before attempting any maintenance or cleaning, unplug the charger from the power source. Pull by plug rather than cord whenever disconnecting charger. 10.

Make sure cord is located so that it will not be stepped on, tripped over, or otherwise subjected to damage or stress. 11. @@ 12. @@@@ 13. @@ 14. @@ 15. @@ 16. @@ Plug the battery charger into the proper AC voltage source. The charging light will flash in green color. 2. @@ 3. @@ The charging light will remain lit steadily during charging. 4. @@ 5. After charging, unplug the charger from the power source.

18 V batteries can be charged with the charger DC1804 only. @@@@ If you charge a battery cartridge from a just operated tool or a battery cartridge which has been exposed to direct sunlight or heat for a long time, the charging light may flash in red color. If this occurs, wait for a while. If the charging light flashes alternately in green and red, charging is not possible. The terminals on the charger or battery cartridge are clogged with dust or the battery cartridge is worn out or damaged. If you leave the battery cartridge in the charger to prevent spontaneous discharging after full charge, the charger will switch into its "trickle charge (maintenance charge)" mode and keep the battery cartridge fresh and fully charged. To maintain product SAFETY and RELIABILITY, repairs, any other maintenance or adjustment should be performed by a Makita Authorized Service Centers, always using Makita replacement parts. @@@@.
