MAXDATA FAVORIT 1000 I

The Entry-Level PC for Small and Mid-Sized Businesses

Its business-oriented graphics performance and Intel® Celeron® D processor make the FAVORIT 1000 I the most convincing entry-level system for small and mid-sized businesses. The numerous expansion options and outstanding value for the money it offers are two features that round out the list of this PC's great qualities.

With the Intel® Celeron® D processor and business-oriented graphics performance, the FAVORIT 1000 I was conceived as an entry-level system for small and mid-sized businesses. Its numerous expansion options and the extremely attractive value for the money it provides, distinguish this entry-level system from the rest.

For entry-level use: MAXDATA FAVORIT 1000 I is the right choice when system reliability is a requirement in addition to an attractive price. MAXDATA systems in the entry-level segment live up to the demand for sufficient computing power at an attractive price. All of the components are sought out based on the day-to-day requirements of smaller and mid-sized businesses and are designed to be optimally compatible with each other while at the same time conforming to our strict quality criteria.

Highlights:

- Attractive price for entry-level business use
- Business-oriented graphics performance
- Expandable standard features

Application areas:

The MAXDATA FAVORIT 1000 I is designed for both the small office/home office with a limited budget as well as for home users.
