MAXDATA recommends Microsoft® Windows® XP Professional for Business.

MAXDATA INDIVIDUALTECHNOLOGY

MAXDATA FAVORIT 4000 I

The Business PC with Image Stability and Expandability

Guaranteed image stability and good expandability are the identifying traits of the new FAVORIT 4000 I. The expandability is provided by a variety of PCI slots in PCI and PCI Express™ formats. With the FAVORIT 4000 I, mid-sized and large companies in particular are able to plan for the long term.

With its focus on the stability of the components employed, the FAVORIT 4000 I ensures investment security and allows for particularly long-term planning of IT structures. With extensive management tools, the FAVORIT 4000 I is optimum for use in mid-sized and large network environments. MAXDATA follows Intel's Granite Peak program for stable platforms, an initiative from Intel and leading hardware and software partners in the IT industry. The continuity of the individual components used makes it possible to use identical images and therefore reduces operating costs.

With Microsoft® Windows® XP Professional, MAXDATA PCs possess the most stable Microsoft® operating system of all time. The improved security functions protect against unauthorized access, data loss, viruses, and hackers.

Highlights:
- The latest technology
- High-quality components
- Good expandability due to the variety of interfaces

Application areas:
The MAXDATA FAVORIT 4000 I PC is designed for professional users in any size company.
